

Manual

On post-trade transparency under MiFID II/ MiFIR

Table of Contents

1	Executive Summary	10
2	Summary table of updates.....	11
3	Introduction	12
3.1	Purpose and Legal Basis.....	12
3.2	Background and content	12
3.2.1	Post-trade transparency reports	15
3.2.2	Transparency calculations.....	16
3.2.3	Level 3 Guidance	16
4	Post-trade transparency	33
4.1	Post-trade transparency reports: instruments and transactions	39
4.1.1	General overview on transactions and instruments subject to post-trade transparency	39
4.1.2	Scope of instruments subject to post-trade transparency	40
4.1.2.1	Equity and equity-like financial instruments	42
4.1.2.2	Non-equity financial instruments.....	43
4.1.2.3	Classification of certain financial instruments.....	53
4.1.3	Scope of transactions subject to post-trade transparency	59
4.1.3.1	Execution venue: general principles	60
4.1.3.2	Execution venue: transactions with a third-country dimension	62
4.1.3.2.1	Transactions with a third-country dimension: general principles	64
4.1.3.2.2	Transactions with a third-country dimension: detailed guidance	66
4.1.3.3	Type of transactions subject to post-trade transparency	70
4.2	Post-trade transparency reports: who, when, what to publish?.....	81
4.2.1	What: which details of a trade have to be made public for the purpose of post-trade transparency?	81
4.2.1.1	Equity and equity-like financial instruments	81

4.2.1.2	Non-equity financial instruments	86
4.2.1.2.1	Common fields of Table 2 of Annex II of RTS 2	87
4.2.1.2.2	Specific fields of Table 2 of Annex II of RTS 2 adapted for each combination of instrument/asset class – contract type	92
4.2.1.2.3	Bonds	93
4.2.1.2.4	SFPs	98
4.2.1.2.5	ETCs and ETNs	101
4.2.1.2.6	Derivatives	103
4.2.2	Who: who has to report and make public the post-trade transparency details of a trade?	173
4.2.2.1	General rule on the definition of the reporting entity	173
4.2.2.2	Definition of the reporting entity in the case of back-to-back trades (Article 12(4), (5) and (6) of RTS 1 and Article 7(5), (6) and (7) of RTS 2)	174
4.2.2.3	Definition of the reporting entity in the case of prime brokerage arrangement	175
4.2.2.4	Definition of the reporting entity in the case of specific contract types	176
4.2.2.5	Definition of the applicable deferral regime	177
4.2.3	To whom: to whom the post-trade transparency details of an off-venue trade have to be reported?	178
4.2.4	When: when the post-trade transparency details of a trade have to be made public?	179
4.2.4.1	General rule on the definition of the reporting time	179
4.2.4.2	Detailed principles on the definition of the reporting time	179
4.2.5	Flags	181
4.2.5.1	How are flags applied?	181
4.2.5.2	Is it possible to combine flags?	189
4.2.5.3	Equity flags specified in Table 4 of Annex 1 of RTS 1	189
4.2.5.4	Non-equity flags specified in Table 3 of Annex II of RTS 2	192
4.2.6	Package transactions	194
4.2.7	Guidance and Schemes of non-equity post-trade transparency publication	197
4.2.7.1	Guidance on non-equity post-trade transparency publications	197
4.2.7.2	Scheme of non-equity post-trade transparency publications	202

4.2.7.2.1	Case 1: D+2 deferral	203
4.2.7.2.2	Case 2: D+2 deferral with publication of limited details	204
4.2.7.2.3	Case 3: D+2 deferral with publication of aggregated information	206
4.2.7.2.4	Case 4: D Volume omission for an extended period of deferral I	209
4.2.7.2.5	Case 5: Publication of aggregated information for an extended period of deferral	210
4.2.7.2.6	Case 6: Publication of aggregated information for an indefinite period - for sovereign debt only	213
4.2.7.2.7	Case 7: Volume omission for an extended period of deferral and subsequent publication of aggregated information for an indefinite period - for sovereign debt only	214
4.2.7.2.8	Case 8: Cancellation	218
4.2.7.2.9	Case 9: Amendment	222
5	Transparency calculations	226
5.1	IT Systems and type of data used	226
5.2	Scope of instruments	230
5.2.1	CFI code - MiFIR identifier mapping table	230
5.2.2	The use of reference data	231
5.3	Transparency calculations: types and frequency of publication	232
5.3.1	Transparency calculations <i>strictu sensu</i>	232
5.3.2	Additional transparency calculations	233
5.3.3	Frequency of publication	234
5.4	Detailed description of the transparency calculations	235
5.4.1	The use of quantitative data	235
5.4.2	Equity and equity-like financial instruments transparency calculations <i>strictu sensu</i>	238
5.4.2.1	Liquidity	239
5.4.2.2	MRMTL	245
5.4.2.3	ADT which determines the LIS	246
5.4.2.4	AVT which determines the SMS	247
5.4.2.5	ADNTE on MRMTL which determines the tick-size	248
5.4.2.6	Guidance on equity and equity-like transparency calculations <i>strictu sensu</i>	249

5.4.3	Non-equity financial instruments transparency calculations <i>strictu sensu</i> ...	254
5.4.3.1	Liquidity for BONDS (excluding ETCs and ETNs)	255
5.4.3.2	LIS and SSTI for BONDS (excluding ETCs and ETNs)	257
5.4.3.3	Liquidity for non-equity instruments other than BONDS (excluding ETCs and ETNs) 258	
5.4.3.4	LIS and SSTI for non-equity instruments other than BONDS (excluding ETCs and ETNs).....	266
5.4.3.5	Guidance on non-equity transparency calculations <i>strictu sensu</i>	279
5.4.4	Additional transparency publications	295
5.4.4.1	DVC publication	295
5.4.4.2	SI publication	296
5.4.4.3	Consolidated Tape Provider (CTP) publication	297
5.5	Scope of transactions	298
5.5.1	Execution venue: general principles	299
5.5.2	Type of transactions subject to post-trade transparency.....	301

SI Systematic Internaliser

1 Executive Summary

Reasons for publication

ESMA publishes this Manual as a convergence tool to promote common approaches and practices in the areas of post-trade transparency and the transparency calculations. Further details are provided in Section 3.

Contents

Section 3 provides the legal background and the purpose of this document. Section 4 deals with the different aspects of post-trade transparency for equity and non-equity instruments. Section 5 tackles the transparency calculations for equity and non-equity instruments.

Next Steps

This Manual is expected to be updated shortly in the context of the MiFID II/ MiFIR review and the subsequent RTS 1 and 2 review and any further legislative or legal change impacting its content. Furthermore, this Manual will also be regularly updated addressing new questions from market participants similarly to the Q&A documents. Further details are provided in Section 3.

2 Summary table of updates

Type of publication	Description of the update	Last update
First publication of the Manual		10 July 2023

3 Introduction

3.1 Purpose and Legal Basis

[Last update on: 10/07/2023]

1. ESMA publishes this Manual under Article 29(2) of the ESMA Regulation which allows for the development by ESMA of new practical instruments and convergence tools to promote common supervisory approaches and practices as appropriate. Therefore, this document is a soft-law Level 3 tool similar to Q&As with the advantage of focusing on convergence by providing all relevant guidance on post-trade transparency in a consolidated format and providing more context.
2. This Manual neither intends to provide EU law interpretation nor contains supervisory elements. This document is intended to promote common approaches and practices in the implementation of the applicable MiFID II and MiFIR post-transparency legal requirements by clarifying the relevant legal provisions and thus assisting competent authorities, natural or legal persons.
3. This Manual incorporates inter alia responses to questions posed by the general public, market participants and competent authorities in relation to the practical application of MiFID II and MiFIR.
4. The content of this document is not exhaustive. ESMA will periodically review this Manual to update it where required. Given that to a great extent this document consolidates guidance of an implementing nature on post-trade transparency requirements already made public by ESMA in the form of Q&As, a formal consultation has taken place only in respect of Section 4.2.1, on the CFI code – MiFIR identifier mapping whose link is provided in Section 5.2.1 and on the additional guidance on the portfolio flag which is now reflected in Section 4.2.5.
5. With regard to some specific new technical topics, outside the scope of the formal consultation, ESMA may check them with representatives of ESMA's Securities and Markets Stakeholder Group, the relevant Standing Committees' Consultative Working Group or, where specific expertise is needed, with other external parties.

3.2 Background and content

[Last update on: 10/07/2023]

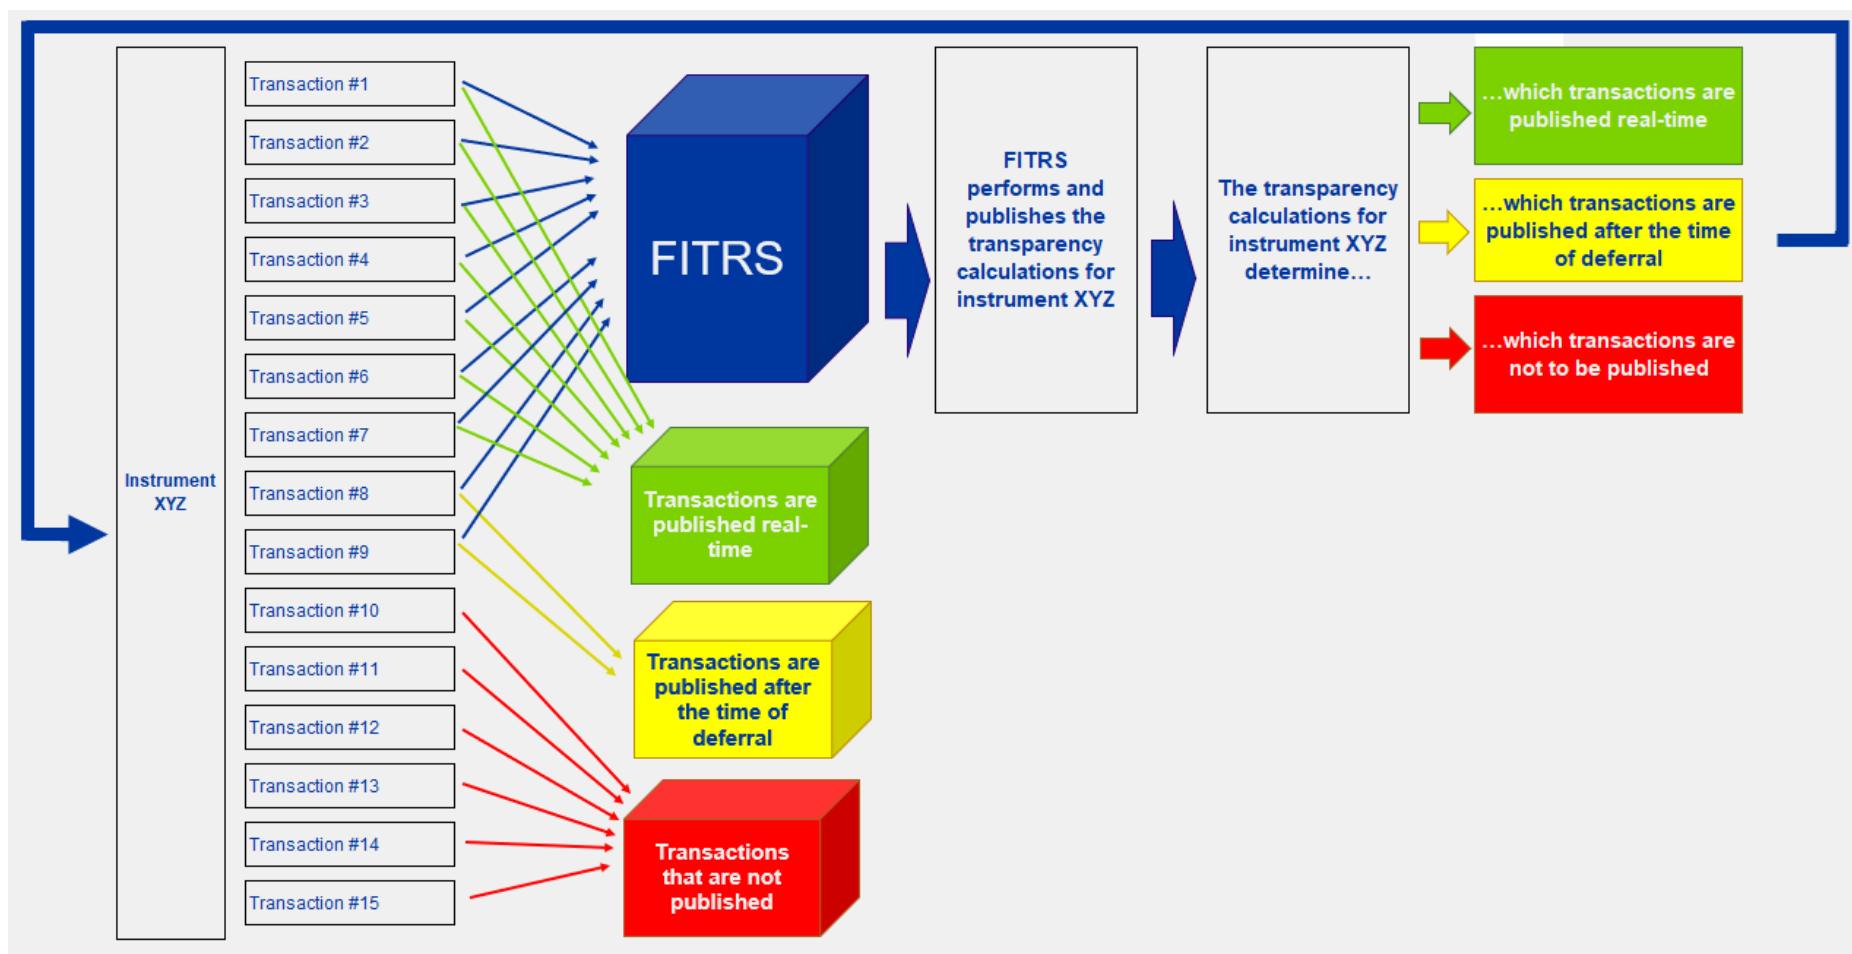

6. The final legislative texts of Directive 2014/65/EU ([MiFID II](#)) and Regulation (EU) No 600/20142 ([MiFIR](#)) were approved by the European Parliament on 15 April 2014 and by the European Council on 13 May 2014. The two texts entered into force on 2 July 2014.

7. MiFID II and MiFIR, together with the related Level 2, have been applicable since 3 January 2018.
8. MiFIR provides for pre-trade and post-trade transparency requirements across equity, equity-like and non-equity financial instruments. Those obligations can be waived (pre-trade requirements) or deferred (post-trade requirements) in certain circumstances. To determine the transparency obligations, which are calibrated for each financial instrument, a number of parameters have to be calculated on the basis of the trading activity of the instrument. To perform such calculations ESMA developed the Financial Instruments Transparency System (FITRS) which collects and processes the data and publish the results of those calculations.
9. The main Level 2 provisions on which this Manual is focused are contained in RTS 1, RTS 2, RTS 3 and Commission Delegated Regulation 2017/567. RTS 1¹ and 2² were reviewed by ESMA in March 2022 and, in that context, ESMA identified two main areas that would have benefitted from further Level 3 guidance: (i) post-trade transparency and (ii) the transparency calculations.
10. Post-trade transparency obligations and the transparency calculations are closely linked. Trades to be made transparent are also to be reported to determine the trading activity to be used for the performance of the transparency calculations, the results of which, in turn determine the transparency obligations applicable when executing transactions on a specific instrument (see Figure 1).

FIGURE 1 – LINK BETWEEN POST-TRADE TRANSPARENCY REPORTING AND FITRS REPORTING

3.2.1 Post-trade transparency reports

[Last update on: 10/07/2023]

11. In the context of the RTS 1 and 2 review published in March 2022, ESMA proposed several amendments to the post-trade transparency reports which aimed at providing more clarity on the type, content, and format of making information available to the public, with the goal to improve data quality and data aggregation especially with the view of a possible future establishment of a CTP.
12. However, from the feedback received by stakeholders to the public consultation on the review of the two RTS, it became evident that further technical guidance was still necessary especially on how to populate the fields in Table 3 of Annex I of RTS 1 and Table 2 of Annex II of RTS 2 for each asset-class and contract type.
13. As a result, this Manual aims at providing further clarity in this regard and aggregates in one single place the relevant provisions in this context:
 - it refers to Level 1 provisions setting out for the post-trade transparency requirements for trading venues and investment firms, including Systematic Internaisers (SIs):
 - o Articles 6 and 20 of MiFIR provide for post-trade transparency requirements in respect of shares, depositary receipts, ETFs, certificates and other similar financial instruments (i.e. equity and equity-like financial instruments);
 - o Articles 10 and 21 of MiFIR provide for post-trade transparency requirements in respect of bonds, structured finance products, emission allowances and derivatives (i.e. non-equity financial instruments).
 - it refers to Level 2 provisions setting out the details to be published for the purpose of post-trade transparency by (i) trading venues, (ii) APAs on behalf of investment firms and SIs and, by (iii) CTPs as per Articles 15 and 15a of RTS 13, set out in Annex I of RTS 1 (for equity and equity-like financial instruments) and in Annex II of RTS 2 (for non-equity financial instruments).
 - it provides for Level 3 guidance on the implementation of the above-mentioned requirements:
 - o relevant Q&As previously published in the [Q&A document on transparency topics](#) are moved into this document as indicated in Table 1 below. Only Q&As related to post-trade transparency (and to the transparency calculations) are moved to this Manual, all Q&As on pre-trade transparency, the SI regime and the double volume cap (DVC) remain in the current Q&A document;
 - o new guidance is included in this document as indicated in Table 2 below.

3.2.2 Transparency calculations

[Last update on: 10/07/2023]

14. In the context of the transparency calculations, the Final Report on the RTS 1 and 2 review included proposals aiming at clarifying how the Financial Instruments Reference Data System (FIRDS) reference data (DATINS) and the Financial Instruments Transparency System (FITRS) reference data to be reported by trading venues in the Equity Transparency Reference Data (DATETR) reports and in the Non-Equity Transparency Reference Data (DATNTR) reports are interlinked with the segmentation criteria defined in RTS 1, RTS 2 and the Commission Delegated Regulation 567/2017.
15. However, some uncertainties about the transactions to include in the Equity Transparency Quantitative Data (DATEQU) and Non-Equity Transparency Quantitative Data (DATNQU) to be reported to FITRS remain. Therefore, this Manual also aims at providing further clarity in this regard.
16. Similar to the area of post-trade transparency, this Manual aims at providing further clarity on the area of the transparency calculations and aggregates in one single place the relevant provisions in this context:
 - it refers to Level 1 provisions setting out the structure and application of the transparency regime. See Sections 5.3.1 and 5.3.2 for a description of the transparency calculations;
 - it refers Level 2 provisions setting out how the transparency parameters have to be calculated and applied (RTS 1, RTS 2, RTS 3 and Commission Delegated Regulation 2017/567);
 - it provides for Level 3 guidance:
 - o relevant Q&As previously published in the [Q&A document on transparency topics](#) are moved into this document as indicated in Table 1 below. Only Q&As related to the transparency calculations (and to post-trade transparency) are moved to this Manual, all Q&As on pre-trade transparency, the SI regime and the double volume cap (DVC) remain in the current Q&A document;
 - o new guidance is included in this document as indicated in Table 2 below.

3.2.3 Level 3 Guidance

17. Table 1 below presents the Q&As that are now in the Manual and deleted from the Q&A document on MiFID II and MiFIR transparency topics.

18. Whenever the reference to the Section where the Q&As can now be found in the Manual is marked with an (*) at the end, it means that the Q&A version in the Manual has been updated compared to the previous published version in the Q&A document. The Q&As can be identified in the Manual since their text is highlighted in grey and modifications compared to the published version in the Q&A document are identified by text in red.

TABLE 1 – Q&A PREVIOUSLY PUBLISHED IN THE Q&A DOCUMENT NOW INCLUDED IN THIS MANUAL

Section 2 - General Q&As on transparency topics				
#	Topic of the Question	Level 1/Level 2 issue	Last Updated	Move to the Manual?
1	Obligation on trading venues to make available their arrangements for the publication of quotes and transactions	Articles 3(3), 6(2), 8(3) and 10(2) of MiFIR	03/04/2017	Keep in the Q&A document.
2a	Flags and details for the purpose of post-trade transparency	Tables 3 and 4 of Annex I of RTS 1; Tables 2 and 3 of Annex II of RTS 2	03/04/2017	Moved to the manual. Sections 4.2.5(*) and 4.2.7.2(*)
2b				Moved to the manual. Section 4.2.7.1 (Table 72) and Sections 4.2.7.2.1-4.2.7.2.6(*)
2c				Keep in the Q&A document.
3a	Which investment firm reports	Article 12(4), (5) and (6) of RTS 1 and Article 7(5), (6) and (7) of RTS 2	03/04/2017	Moved to the manual. Sections 4.2.2.1(*), 4.2.2.2, 4.2.2.3 and 4.2.2.4(*)
3b				Keep in the Q&A document.
4	Application of the transparency regime for primary transactions	Title II and III of MiFIR	03/04/2017	Moved to the manual. Section 4.1.3.3 (Table 10) and Section 4.1.3.3 (Table 11)
5	ISINs for pre-trade transparency	Articles 3 and 8 of MiFIR	03/04/2017	Keep in the Q&A document.
6	Use of 'PNDG' as price when making transactions public	Articles 20 and 21 of MiFIR, Annex I of RTS 1, Annex II of RTS 2	03/04/2017	Moved to the manual. Section 4.2.1.1 (Table 12)(*)

Section 2 - General Q&As on transparency topics				
#	Topic of the Question	Level 1/Level 2 issue	Last Updated	Move to the Manual?
				and Section 4.2.1.2.1 (Table 13)(*)
7	RFQ systems	Annex I of RTS 1 and RTS 2	14/11/2018	Keep in the Q&A document.
8	Application of post-trade transparency requirements by trading venues and SIs	Articles 6 and 10 of MiFIR	03/10/2017	Moved to the manual. Section 4.2.2.5
9	Obligation to make available data free of charge 15 minutes after publication	Article 13(1) of MiFIR	15/11/2017	Keep in the Q&A document.
10	Requirements to publish information on post-trade data 15 minutes after publication free of charge	Article 13(1) of MiFIR, Articles 64(1) and 65(1) and (2) of MiFID II	14/11/2018	Keep in the Q&A document.
11	Publication of transactions – how to populate the field ‘publication date and time’	table 2 of Annex II of RTS 1 and table 3 of Annex I of RTS 2	29/05/2018	Moved to the manual. Section 4.2.1.1 (Table 12)((*) and Section 4.2.1.2.1 (Table 13)(*)
12	Voice trading systems – guidance on the application of pre-trade transparency requirements	Article 8 of MiFIR and annex 1 of RTS 1 and 2	29/05/2018	Keep in the Q&A document.
13	Reporting of a new ISIN in FIRDS and FITRS following a corporate action	Article 1 of RTS 23 and Article 17(5) of RTS 1 and Article 13(16) of RTS 2	03/06/2019	Moved to the manual. Section 5.4.2.6 (Table 86)

Section 3 - Equity transparency				
#	Topic of the Question	Level 1/Level 2 issue	Last Updated	Move to the Manual?
1	Trading obligation for shares	Article 23 of MiFIR	03/04/2017	Keep in the Q&A document.
2	Scope of the trading obligation for shares	Article 23 of MiFIR	15/11/2017	Keep in the Q&A document.
3	Default transparency regime for equity instruments	Articles 2(1)(17)(b), 4(1)(a) and (c), 7(1), 14(2) and (4) and 20(2) of MiFIR	30/09/2021	Moved to the manual. Section 5.4.2.6 (Table 86)(*)
4	Publication of request for market data (RFMD) transactions	Article 20 of MiFIR	04/01/2019	Moved to the manual.

Section 3 - Equity transparency				
#	Topic of the Question	Level 1/Level 2 issue	Last Updated	Move to the Manual?
				Section 4.1.3.3, (Table 10)(*)
5	Determination of the turnover to be used for the average value of transactions (AVT) calculation	Article 11 of RTS 1	02/10/2019	Moved to the manual. Section 5.4.2.6 (Table 86)

Section 4 - Non-equity transparency				
#	Topic of the Question	Level 1/Level 2 issue	Last Updated	Move to the Manual?
1	Definition of Exchange for physical	Article 2(1)(48) of MiFIR	31/05/2017	Moved to the manual. Section 4.2.5.1 (Table 68)(*)
2a	Deferred publication: application for OTC-trades	Article 21 of MiFIR	03/10/2017	Moved to the manual. Section 4.2.2.5(*)
2b				Moved to the manual. Section 4.2.2.5(*)
3	Supplementary deferral regime	Article 11(3)(a) of MiFIR and Article 11(1)(a)(ii) of RTS 2	03/10/2017	Moved to the manual. Section 4.2.7.1 Table 72
4a	Questions related to package orders/transactions	Article 2(1)(49) & (50) of MiFIR and Article 18 of MiFIR	15/11/2017	Moved to the manual. Section 4.2.6 (Table 61). This Q&A remains in the Q&A document for the part on orders
4b				Moved to the manual. Section 4.2.6 (Table 61). This Q&A remains in the Q&A document for the part on orders.
4c				Keep in the Q&A document
4d				Keep in the Q&A document
4e				Keep in the Q&A document
4f				Moved to the manual. Section 4.2.6 (Table 61)

Section 4 - Non-equity transparency				
#	Topic of the Question	Level 1/Level 2 issue	Last Updated	Move to the Manual?
4g				Moved to the manual. Section 4.2.6 (Table 61). This Q&A remains in the Q&A document for the part on orders
4h				Moved to the manual. Section 4.2.6 (Table 61). This Q&A remains in the Q&A document for the part on orders
4i				Keep in the Q&A document
5	Normal trading hours for non-equity instruments	Article 21 of MiFIR	03/10/2017	Moved to the manual. Section 4.2.4.2
6	Publication of transactions in an aggregated form by APAs	Article 11(3)(a), (c) and (d) of MiFIR	15/11/2017	Moved to the manual. Section 4.2.7.1, Table 72
7	Publication of transactions in an aggregated form by APAs	Article 11(3)(a), (c) and (d) of MiFIR	15/11/2017	Moved to the manual. Section 4.2.7.1 (Table 72)(*)
8	Temporary suspension of transparency for bonds	Articles 9(4) and 11(2) of MiFIR	15/11/2017	Keep in the Q&A document.
9	Geographical scope of the temporary suspension of transparency	Articles 9(4) and 11(2) of MiFIR	15/11/2017	Keep in the Q&A document.
10	Default liquidity status of bonds	Article 2(1)(17)(a) of MiFIR	04/10/2018	Moved to the manual. Section 5.4.3.5 (Table 91)
11	The “nominal value” of bonds	Table 4 of Annex II of RTS 2	18/12/2017	Moved to the manual. Section 4.2.1.2.3 (Table 14)(*) and Section 5.4.1 (Table 75)(*)
12	Scope of the trading obligation for interest rate derivatives	Commission Delegated Regulation (CDR) 2017/2417	28/03/2018	Keep in the Q&A document.
13	Classification of derivatives on derivatives	Annex III of RTS 2	04/10/2018	Moved to the manual.

Section 4 - Non-equity transparency				
#	Topic of the Question	Level 1/Level 2 issue	Last Updated	Move to the Manual?
				Section 5.4.3.5 (Table 91)
14	Scope of Article 9(1)(c) of MiFIR	Article 9(1)(c) of MiFIR	04/10/2018	Keep in the Q&A document.
15	Default LIS and SSTI thresholds for bonds	Articles 8, 9 and 11 of MiFIR and Articles 3,5,9 and 10 of RTS 2	04/01/2019	Moved to the manual. Section 5.4.3.5 (Table 91)
16	Money Market Instruments (MMIs)	Article 11 of Commission Delegated Regulation (CDR) 2017/565	02/04/2019	Moved to the manual. Section 4.1.2.3 (Table 6)
17a	Reporting of prime brokerage transactions	Article 7(7) and Table 2 of Annex II of RTS 2	02/04/2019	Move to the manual. Section 4.2.3.3(*)
17b				Moved to the manual. Section 4.2.3.3
18	Treatment of constant maturity swaps	Article 13 and Annex III of RTS 2	12/07/2019	Moved to the manual. Section 4.1.2.3 (Table 6)(*)
19	Conversion of LIS/SSTI thresholds in lots	Article 13(9) RTS 2	29/05/2020	Moved to the manual. Section 5.4.3.5 (Table 91)
20	Default liquidity status, SSTI and LIS thresholds of non-equity instruments	Article 13 of RTS 2	29/05/2020	Moved to the manual. Section 5.4.3.5 (Table 91)
21	Publication of transactions in an aggregated form	Article 11(3) of MiFIR and Article 11 of RTS 2	29/05/2020	Move to the manual. Section 4.2.7.1 (Table 72)(*)

25	Settlement location	Table 2 of Annex IV of RTS 2	31/03/2023	Moved to the manual.

Section 4 - Non-equity transparency				
#	Topic of the Question	Level 1/Level 2 issue	Last Updated	Move to the Manual?
				Section 5.4.3.5 (Table 92)

Section 5 - Pre-trade transparency waivers				
#	Topic of the Question	Level 1/Level 2 issue	Last Updated	Move to the Manual?
1	Pre-trade transparency waivers under MiFID I	Article 4(7) of MiFIR	03/06/2019	Keep in the Q&A document.
2	Waiver procedure for illiquid non-equity financial instruments	Article 9(1)(c) of MiFIR	18/11/2016	Keep in the Q&A document.
3	Substantial and non-substantial amendments to MiFID I waivers	Article 3(1) and Article 8(1) of MiFIR	31/05/2017	Keep in the Q&A document.
4	Calculation of the “current volume weighted spread reflected in the order book” for negotiated transactions	Article 4(1)(b)(i) of MiFIR	31/05/2017	Keep in the Q&A document.
5	Maximum authorised deviation around the reference price for negotiated transactions in illiquid equity instruments	Article 4(1)(b)(ii) of MiFIR	15/11/2017	Keep in the Q&A document.
6	Partial execution of LIS orders (Article 9(1)(a) of MiFIR) and orders above SSTI	Article 9(1)(b) of MiFIR	15/11/2017	Keep in the Q&A document.
7	SSTI – calculation of indicative pre-trade prices	Article 8(4) of MiFIR	15/11/2017	Keep in the Q&A document.
8	Categorisation of subscription rights	Article 4 of MiFIR	18/12/2017	Moved to the manual. Section 4.1.2.3
9	Process for a waiver under Article 18(2) of MiFIR	Article 18(2) of MiFIR	18/12/2017	Keep in the Q&A document.
10	Reference price waiver and multi-listed shares	Article 4(1)(a) of MiFIR	18/12/2017	Keep in the Q&A document.
11	Pre-arranged/negotiated transactions for non-equity instruments	Article 9 of MiFIR	12/07/2019	Keep in the Q&A document.
11a	Hedging Exemption	Article 8(1) of MiFIR	12/07/2019	Keep in the Q&A document.

Section 5 - Pre-trade transparency waivers				
#	Topic of the Question	Level 1/Level 2 issue	Last Updated	Move to the Manual?
12	Minimum size of orders held in an order management facility for non-equity financial instruments	Article 4 of RTS 2	07/02/2018	Keep in the Q&A document.

Section 6 - Double volume cap				
All Q&As of this section will be kept in the Q&A document				
Section 7 - Systematic internaliser regime				
All Q&As of this section will be kept in the Q&A document				

Section 8 - Data Reporting Services Providers				
#	Topic of the Question	Level 1/Level 2 issue	Last Updated	Move to the Manual?
1	Reports from IF to APAS (time limit for sending the reports and clarification on possible disagreements between the investment firm and the APA)	Articles 7, 11, 20 and 21 of MiFIR	31/05/2017	Moved to the manual. Section 4.2.4.2(*)
2	Assignment of MICs to APAs	Annex I of RTS 1 and Annex II of RTS 2	31/05/2017	Keep in the Q&A document.
3	Timeline for approving connections to ARMs to NCAs	Article 61(3) of MiFID II	15/11/2017	Keep in the Q&A document.
4	APA reports to competent authorities and ESMA	Article 2 of RTS 3	01/02/2019	Moved to the manual. Section 5.4.1 (Table 76)

Section 9 - Third country issues				
#	Topic of the Question	Level 1/Level 2 issue	Last Updated	Move to the Manual?
1	Application of post-trade transparency requirements for transactions by EU investment firms on third-country trading venues	Articles 20 and 21 of MiFIR	31/05/2017	Moved to the manual. Section 4.1.3.2.1(*)

Section 9 - Third country issues				
#	Topic of the Question	Level 1/Level 2 issue	Last Updated	Move to the Manual?
2	Transactions outside the EU/ trades by non-EU firms	Articles 3,4, 6-11, 20, 21 of MiFIR as well as Article 4(1)(20) of MiFID II and 12 to 16 of the Commission Delegated Regulation (EU) No 2017/565	15/11/2017	Moved to the manual (except for the part on SI calculations which will remain in the Q&A). Sections 4.1.3.2.1(*) and 4.1.3.2.2(*)
3	Transparency requirements applicable to transactions executed between a branch and its head office [Q&A from the European Commission]	Articles 3,6,8,10,14,18,20,21 and 26 of MiFIR	05/09/2022	Keep in the Q&A document.

19. For each section in Table 2 below, new guidance can be identified by the two last columns. The last column indicates the last update date and the penultimate one specifies “Guidance” when the section includes it.

TABLE 2 – NEW GUIDANCE INCLUDED IN THIS MANUAL

Section					Topic			Guidance	Last update on
4	4.1	4.1.1			General overview on transactions and instruments subject to post-trade transparency			Description of the framework	10/07/2023

4 Post-trade transparency

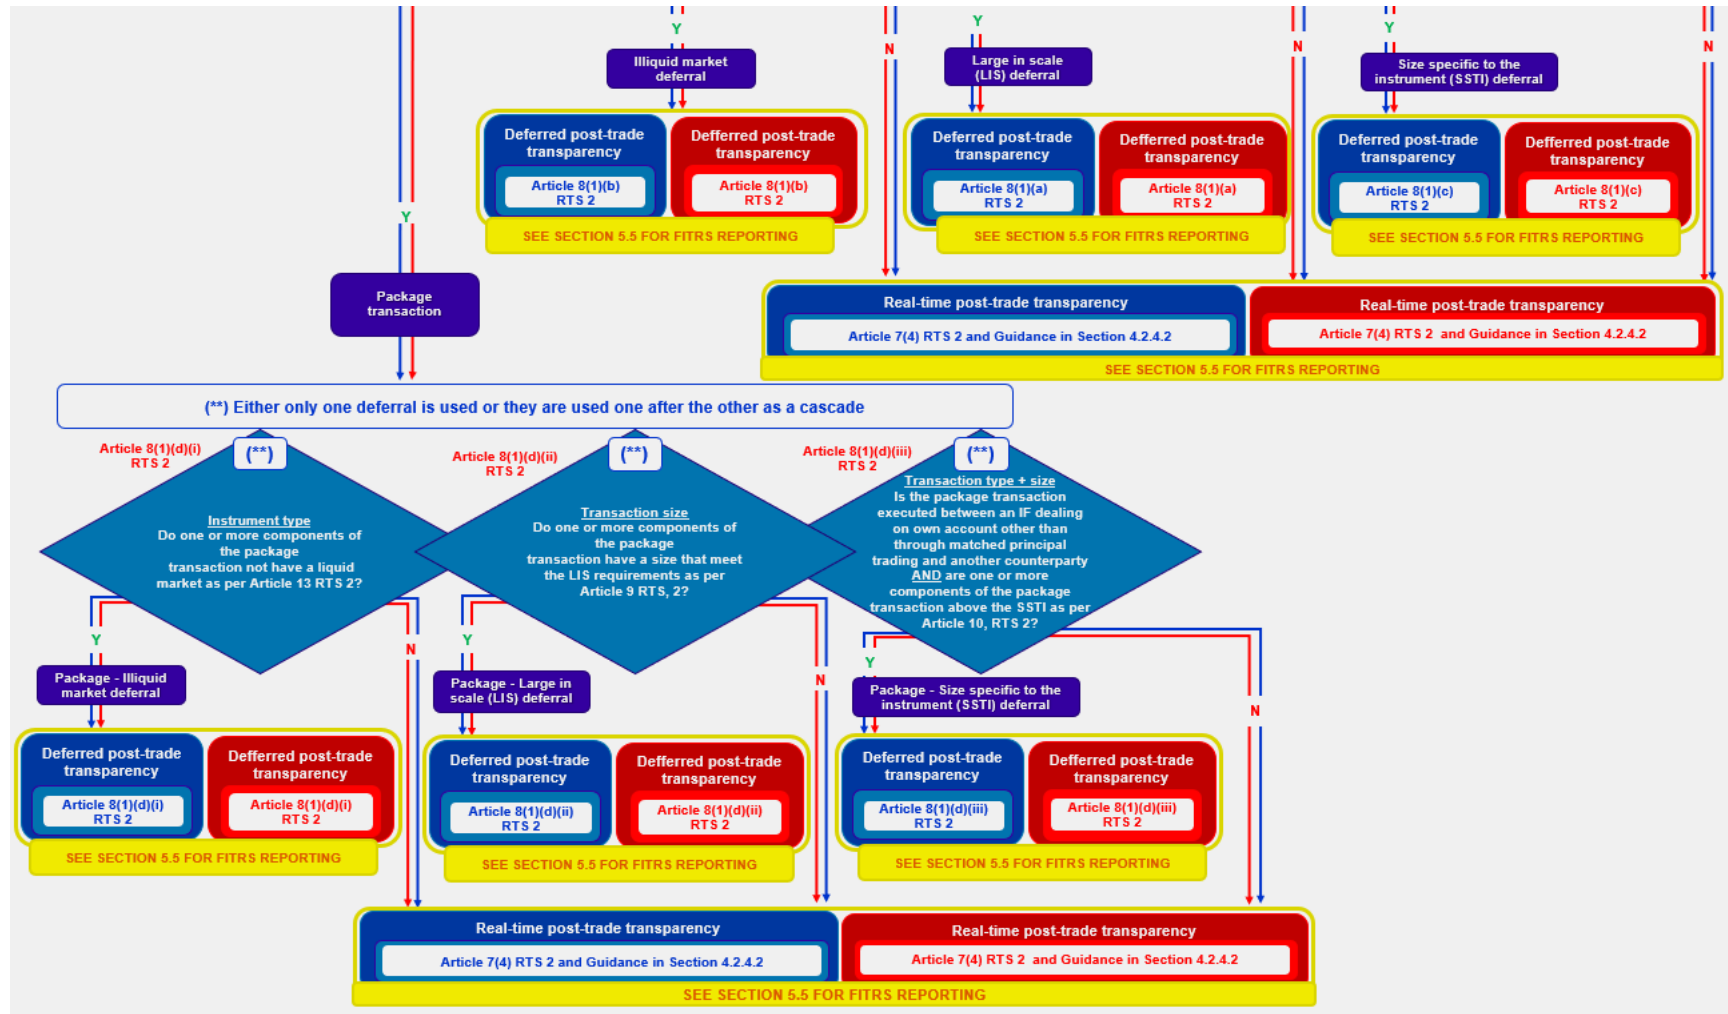

[Last update on: 10/07/2023]

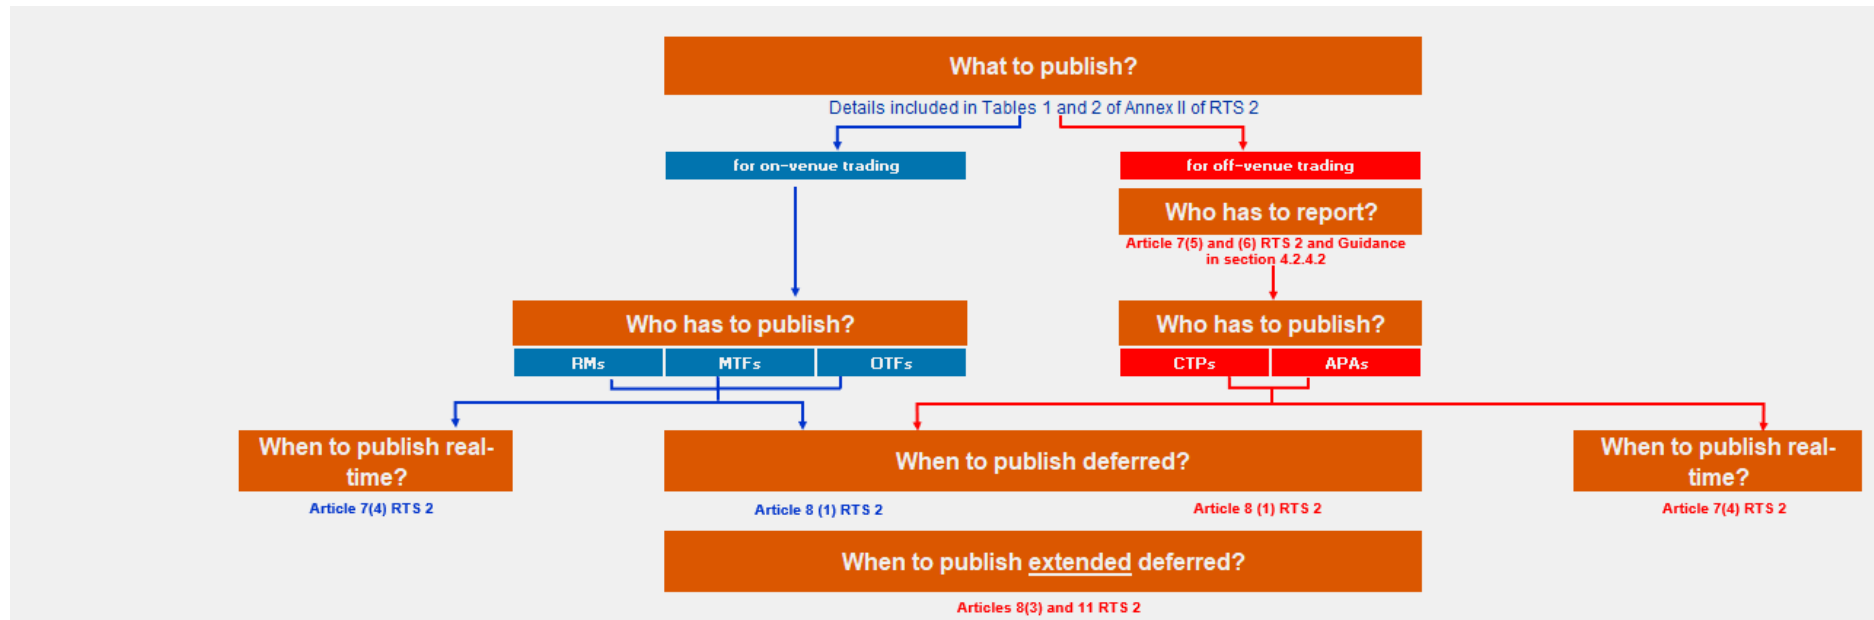

20. The following Figures 2 and 3 describe the post-trade transparency regime for equity and equity-like financial instruments and for non-equity financial instruments, respectively. Those figures are further analysed and enriched with guidance in the following sub-sections of this Section.

FIGURE 2 – POST-TRADE TRANSPARENCY FOR EQUITY AND EQUITY-LIKE INSTRUMENTS, THE BASICS

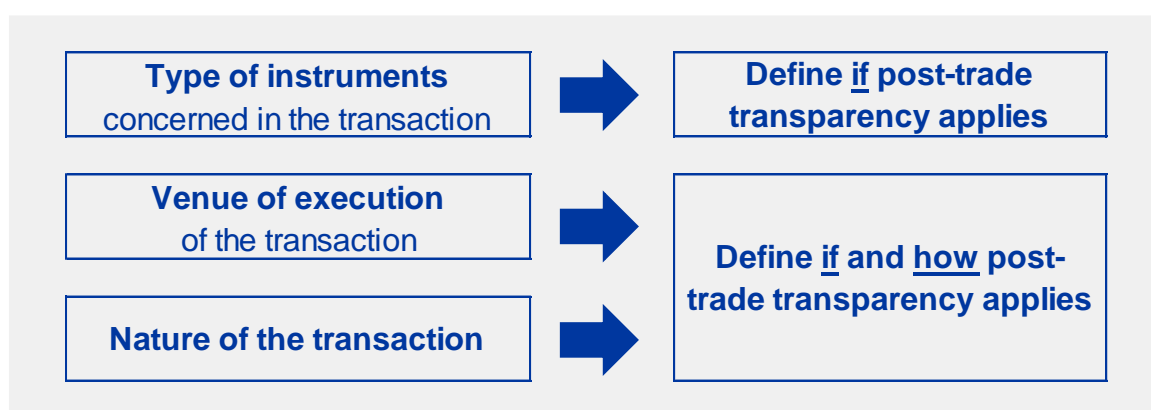

4.1 Post-trade transparency reports: instruments and transactions

4.1.1 General overview on transactions and instruments subject to post-trade transparency

[Last update on: 10/07/2023]

21. The post-trade transparency regime requires the publication of several details of certain trades executed in certain types of financial instruments, both on- and off-venue. To identify if a transaction should be subject to post-trade transparency three aspects have to be analysed (i) the type of instrument subject to the transaction, (ii) the venue of execution of the transaction and, (iii) the nature of the transaction.
22. The first aspect to analyse is the type of instrument concerned in the transaction, as further explained in Section 4.1.2 two conditions have to be met cumulatively for the transaction to be subject to post-trade transparency: (i) the instrument has to be traded on a trading venue (TOTV). (ii) the instrument has to meet a specific definition.
23. After having analysed the type of instrument and having checked that the two conditions are met, the venue of execution of the transaction and the nature of the transaction are to be analysed in conjunction since the same type of transaction might have different transparency requirements based on the venue where it is executed. As further explained in detail in Section 4.1.3, only certain transactions are subject to post-trade transparency and the requirements are different based on the venue of execution.

FIGURE 4 – ASPECTS TO ANALYSE TO DETERMINE IF POST-TRADE TRANSPARENCY APPLIES

4.1.2 Scope of instruments subject to post-trade transparency

[Last update on: 10/07/2023]

24. As mentioned above, post-trade transparency requirements are applicable to transactions executed on financial instruments meeting two conditions:

Condition #1: being TOTV

25. ESMA published an Opinion ([ESMA70-156-117](#)) to clarify this concept, especially for derivatives. Based the Opinion only OTC derivatives sharing the same reference data details as the derivatives traded on a trading venue (regulated markets, Multilateral Trading Facilities (MTFs) and Organised Trading Facilities (OTFs)) should be considered TOTV and, hence, subject to the MiFIR transparency requirements. Accordingly, only derivatives executed off-venue sharing the same ISIN as TOTV derivatives are subject to the MiFIR transparency requirements.

26. In this context, it is also important to clarify that the TOTV concept should not be confused with the concept of an 'exchange-traded derivative' (ETD) which is defined in Article 2(1)(32) of MiFIR as a derivative that is traded on a RM or on a third-country market considered to be equivalent to a regulated market in accordance with Article 28 of MiFIR. Consequently, OTC derivatives are derivatives traded on an MTF or OTF as well as derivatives traded only bilaterally, i.e. on SIs or OTC (See Table 3).

TABLE 3 – TOTV VS. ETD

		Are TOTV derivatives?
ETDs - derivatives traded on a RM or on a third-country market considered to be equivalent to a regulated market in accordance with Article 28 of MiFIR		Yes, they are all TOTV derivatives
OTC derivatives according to Regulation (EU) No. 648/2012	traded on MTF and OTF but not traded on a RM	Yes, they are all TOTV derivatives
	not traded on neither a RM, nor an MTF nor an OTF	No, they are all non-TOTV derivatives

Condition #2: falling under specific definitions

27. Post-trade transparency requirements are, in general, applicable to financial instruments as defined in point 15 of article 2(1) of MiFID II, referred to Section C of Annex I to MiFID II and in accordance with Member States' laws, regulations and administrative provisions implementing MiFID II.
28. The definition of the types of instruments subject to post-trade transparency requirements are further specified in MiFID II and MiFIR; in the Directive 2003/87/EC of the European Parliament and of the Council of 13 October 2003 establishing a system for greenhouse gas emission allowance trading within the Union and amending Council Directive 96/61/EC (ETS Directive) for emission allowances; in RTS 1 for other equity-like financial instruments, and in RTS 2 for Exchange Traded Commodities (ETCs), Exchange Trade Note (ETNs), Financial contracts for differences (CFDs) and securitised derivatives. In summary, the types of financial instruments subject to post-trade transparency are listed in Tables 4, 5 and 6 below.

4.1.2.1 Equity and equity-like financial instruments

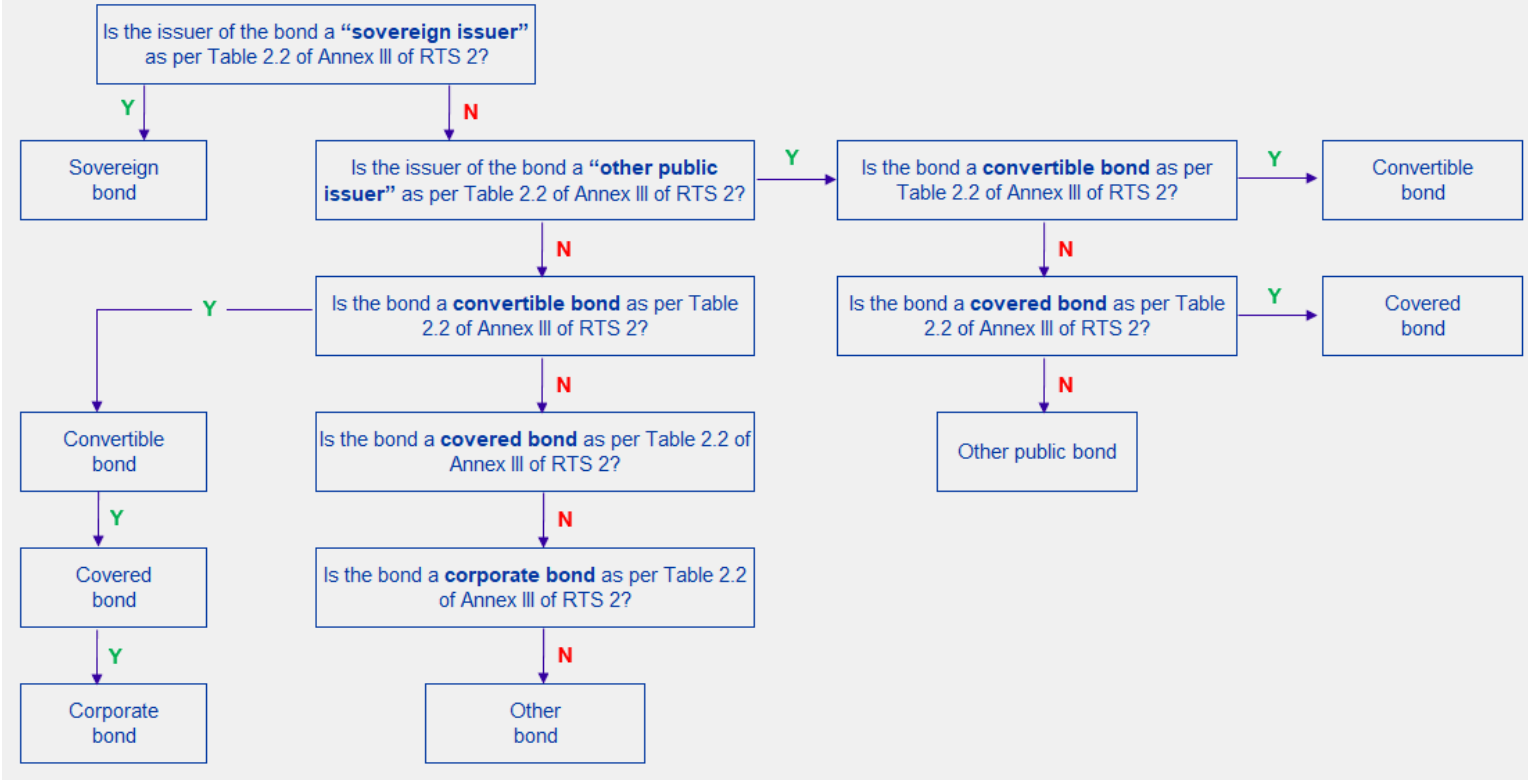

TABLE 4 – LEGAL REFERENCES AND GUIDANCE ON THE TYPES OF EQUITY AND EQUITY-LIKE FINANCIAL INSTRUMENTS

Instrument type	Level 1 Legal references	Level 2 Legal references	Guidance
Shares	MiFID II Article 4(1) (44)(a)		[Last update on: 10/07/2023] Share-based real estate investment trusts (REITs) may be classified as shares, if referred as such in the CFI code - MiFIR identifier mapping table (see Section 5.1).
Depository receipts	MiFID II Article 4(1) (45)		
Exchange-Traded Fund (ETF)	MiFID II Article 4(1) (46)		[Last update on: 10/07/2023] Collective investment undertakings can be classified as ETFs insofar as they fulfil the definition in MiFID II Article 4(1) (46). The definition of a UCITS ETF is provided in <u>ESMA Guidelines on ETFs and other UCITS issues</u>
Certificates	MiFIR Article 2(1) (27)		
Other equity-like		RTS 1 Annex III Table 2	[Last update on: 10/07/2023] Collective investment undertakings that are not classified as ETFs may be classified as ‘other equity-like financial instrument’ if referred as such in the CFI code - MiFIR identifier mapping table (see Section 5.1).

4.1.2.2 Non-equity financial instruments

<div><input checked="" type="checkbox"/> Sovereign bonds</div> <div><input checked="" type="checkbox"/> Other public bonds</div> <div><input checked="" type="checkbox"/> Convertible Bonds</div> <div><input checked="" type="checkbox"/> Covered Bonds</div> <div><input checked="" type="checkbox"/> Corporate Bonds</div> <div><input checked="" type="checkbox"/> Other Bonds</div>	<div>[Last update on: 10/07/2023]</div> <div><i>Which characteristics should prevail in the classification of a bond: its “structure” or its “issuer”?</i></div> <div>The classification of a bond determines its transparency regime. Indeed, different thresholds for the issuance size are applied to newly issued bonds to determine their liquidity and also different pre-trade and post-trade LIS and SSTI thresholds are applied based on the bond type. In this context, it is necessary to further specify the “hierarchy” to allow for a consistent classification of bonds. The decision tree below shows the hierarchy to be followed for the classification of bonds.</div> <div>The below hierarchy is in line with the definitions in RTS 2 since sovereign issuers cannot issue neither convertible bonds (since this requires the issuance of shares) nor covered bonds (which are issued by a credit institution) while this can be the case for other public entities.</div>		

Asset class	Guidance
	 <pre> graph TD Q1[Is the issuer of the bond a "sovereign issuer" as per Table 2.2 of Annex III of RTS 2?] -- Y --> SB[Sovereign bond] Q1 -- N --> Q2[Is the issuer of the bond a "other public issuer" as per Table 2.2 of Annex III of RTS 2?] Q2 -- Y --> Q3[Is the bond a convertible bond as per Table 2.2 of Annex III of RTS 2?] Q2 -- N --> Q4[Is the bond a convertible bond as per Table 2.2 of Annex III of RTS 2?] Q3 -- Y --> CB1[Convertible bond] Q3 -- N --> Q5[Is the bond a covered bond as per Table 2.2 of Annex III of RTS 2?] Q4 -- Y --> CB2[Convertible bond] Q4 -- N --> Q6[Is the bond a covered bond as per Table 2.2 of Annex III of RTS 2?] Q5 -- Y --> CB3[Covered bond] Q5 -- N --> OPB[Other public bond] Q6 -- Y --> CB4[Covered bond] Q6 -- N --> Q7[Is the bond a corporate bond as per Table 2.2 of Annex III of RTS 2?] Q7 -- Y --> CB5[Corporate bond] Q7 -- N --> OB[Other bond] </pre> <p>The flowchart classifies bonds based on the issuer and the bond's characteristics. It starts with a decision on whether the issuer is a "sovereign issuer". If yes, it's a Sovereign bond. If no, it checks if the issuer is an "other public issuer". If yes, it checks if it's a convertible bond; if yes, it's a Convertible bond, and if no, it checks if it's a covered bond; if yes, it's a Covered bond, and if no, it's an Other public bond. If the issuer is not an "other public issuer", it checks if it's a convertible bond; if yes, it's a Convertible bond, and if no, it checks if it's a covered bond; if yes, it's a Covered bond, and if no, it checks if it's a corporate bond; if yes, it's a Corporate bond, and if no, it's an Other bond.</p>

4.1.2.3 Classification of certain financial instruments

[Last update on: 10/07/2023]

29. Despite the comprehensive scope of instruments covered above, the classification of certain instruments, which are usually typically only in one or few Member States, is not straightforward. In this context, ESMA provides the Level 3 guidance published in the past and new guidance on additional classes of instruments in Table 6 below.

TABLE 6 – GUIDANCE ON THE CLASSIFICATION OF CERTAIN FINANCIAL INSTRUMENTS

Financial instrument	Guidance	
	Classification	Legal references and background
Interim shares, redemption shares, depository interests	Shares	<p>[Last update on: 10/07/2023]</p> <p>The Opinion on the assessment of pre-trade transparency waivers for equity and non-equity instruments (ESMA70-155-6641) provides that financial instruments that are functionally similar to the categories explicitly mentioned in MiFIR (i.e. shares, depository receipts, ETFs, certificates) should be categorised under the category of instruments which they resemble.</p> <p><i>For example, [...] interim shares, redemption shares and depository interests should be categorised as shares.</i></p>

Guidance		
Financial instrument	Classification	Legal references and background
Subscription rights, including allotment rights and purchase rights	Shares	<p>[Last update on: 18/12/2017]</p> <p>Subscription rights, including allotment rights and purchase rights, should be treated as an extension of the 'shares' category and therefore as equity instruments for the purpose of the provisions mentioned below⁴. While ESMA considers that subscription rights share some characteristics of securitised derivatives, the market practice for trading subscription rights resembles closely the trading of shares and therefore the following applies:</p> <ul style="list-style-type: none"> - Subscription rights should be subject to the pre- and post-trade transparency regime for equity instruments (Articles 3, 6, 14-17 and 20 of MiFIR) and should be eligible for waivers and deferrals from pre-trade transparency for equity instruments (Articles 4, 7, and 20(2) of MiFIR). - The liquidity status of subscription rights should be the same as the liquidity status of the underlying share (Article 1 of Commission Delegated Regulation (EU) 2017/567). - The standard market size (SMS) of subscription rights should be the same as the SMS of the underlying shares (Article 11 and table 3 of Annex II of RTS 1).

⁴ The same approach also applies to redemption shares and unit rights traded in Scandinavian countries as well as allotment rights in Romania.

Guidance		
Financial instrument	Classification	Legal references and background
		<ul style="list-style-type: none"> - The large in scale thresholds for waivers and deferrals for subscription rights should be determined on the basis of the average daily turnover of the underlying share (Articles 7 and 15 and tables 1 and 4 of Annex II of RTS 1). - The most relevant market in terms of liquidity for subscription rights should be the same as the most relevant market in terms of liquidity for the underlying share (Article 4 of RTS 1). - Subscription rights should be subject to the trading obligation for shares and the double volume cap (Articles 5 and 23 of MiFIR). - Subscription rights should be subject to the tick size regime (Article 49 of MiFID II and as further specified in RTS 11). Subscription rights should use the same liquidity band as the underlying share (Article 2 and Annex of RTS 11).
Guidance		
Financial instrument	Classification	Legal references and background
Money Market Instruments (MMIs)	Out of scope	<p>[Last update on: 10/07/2023]</p> <p>Article 4(1)(17) of MiFID II and Article 11 of CDR 2017/565 define money market instruments. In this regard, ESMA clarifies that those instruments falling under such definition are not subject to the transparency obligations.</p>

	Guidance	
Financial instrument	Classification	Legal references and background
Zero coupon bonds	Money market instruments or bonds on the basis of the maturity at issuance	<p>[Last update on: 02/04/2019]</p> <p>Zero-coupon bonds (i.e. bonds issued at discount) should only be considered MMIs if they have a maturity at issuance of 397 days or less.</p>
Reverse convertible bonds	Bonds	<p>[Last update on: 02/04/2019]</p> <p>Reverse convertible bonds (i.e bonds that can be converted to cash, debt, or equity at the discretion of the issuer at set dates) and bonds which are issued as fixed rate with a coupon rate equal to 0 (that can also be increased in the course of the life of the bond) should never be considered as MMIs even if they have a maturity at issuance of 397 days or less.</p>
CDS index tranches of an index CDO	SFPs	<p>[Last update on: 10/07/2023]</p> <p>CDS index tranches are derivatives instruments used for the transfer of credit risk. More specifically, the contract type is an index CDO (Collateralized debt obligation) which is a particular type of CDO where the reference portfolio is a standard CDS index.</p> <p>A CDO is a security pooling debt obligation and creating tranches with different risks but backed by the same pool of debt obligations.</p> <p>Therefore, the index CDO comprises instruments with varying degrees of exposure to the joint loss distribution of the firms composing the index. These tranches provide claims to the cash flows of the CDS portfolio.</p> <p>Consequently, being a type of CDO, CDS index tranches of an index CDO should be classified as SFPs.</p>

	Guidance	
Financial instrument	Classification	Legal references and background
Total return swaps	Swaps	<p>[Last update on: 10/07/2023]</p> <p>A total return swap is a type of swap contract as defined in RTS 2, Annex III, point 1(10). More specifically, a total return swap allows the party receiving the total return to gain exposure and benefit from a reference asset without actually owning it.</p> <p>The underlying asset of a total return swap is usually an equity index. In such case, they should be classified under the asset class of equity derivatives and sub-asset class of (equity) swaps.</p> <p>Where the underlying is a basket of loans, or bonds they should be classified under the asset class of interest rate derivatives and sub-asset class of other interest rate derivatives.</p>
Constant Maturity Swaps (CMS) or Constant Maturity Futures (CMF)	Interests rate swaps	<p>[Last update on: 10/07/2023]</p> <p>Constant Maturity Swaps (CMS) or Constant Maturity Futures (CMF) are interest rate swaps where the floating leg is pegged not to a standard benchmark interest rate but to a point on the swap curve (the other leg of swap being usually referenced to a standard benchmark interest rate LIBOR or to a fixed rate). They are typically used by market participants as a bet on the direction of rates or for hedging purposes.</p> <p>ESMA understands that those products are designed to align as closely as possible to the interest rate swap market they are referenced to. Therefore, ESMA considers that it is appropriate to treat those products similarly. For instance, a CMS where one of the legs pays (respectively receives) the ten-year swap rate and receives (respectively pays) the fixed rate should be classified and treated in the same way as a standard fixed-to-float interest rate swap with a ten-year maturity.</p>

	Guidance	
Financial instrument	Classification	Legal references and background
Crypto-assets	To be assessed for each crypto-asset	<p>[Last update on: 10/07/2023]</p> <p>Article 2(5) of the MiCA Regulation mandates ESMA to develop Guidelines on the conditions and criteria for the qualification of crypto-assets as financial instruments.</p> <p>Post-trade transparency requirements could therefore apply to crypto-assets that are classified as financial instruments in the future in accordance with such Guidelines. Therefore, if they fall in the scope of transparency will have to be determined for each crypto-asset</p>

4.1.3 Scope of transactions subject to post-trade transparency

[Last update on: 10/07/2023]

30. As mentioned in the general overview, the venue of execution of the transaction and the nature of the transaction are to be analysed in conjunction since the same type of transaction might have different transparency requirements based on the venue where it is executed.

Execution venue (including third-country aspects)

31. A transaction can be executed:

- either on-venue, which means:
 - for equity and equity-like instruments: executed on RMs or MTFs;
 - for non-equity instruments: executed on RMs, MTFs or OTFs;
- or off-venue which means:
 - executed by a systematic internaliser (SI), when at least one of the two investment firms involved in the transaction is an SI in that particular instrument/(sub) asset class;
 - executed over the counter (OTC), when neither of the two investment firms involved in the transaction neither is an SI.

32. The basic principles on transactions subject to / exempted from post-trade transparency based on the execution venue are presented in Tables 7 and 8 in Section 4.1.3.1.

33. In this context, it is also relevant to analyse transactions with third-country aspects to determine if they are subject to post-trade transparency, those are analysed in Section 4.1.3.2.

Type of transaction

34. Finally, Tables 10 and 11 in Section 4.1.3.3 illustrates the type of transactions which are subject to / exempted from the post-trade transparency regime specifying the flags to be used when to report those transactions.

4.1.3.1 Execution venue: general principles

[Last update on: 10/07/2023]

35. MiFIR only provides for the possibility to exempt certain OTC-transactions from post-trade transparency, those are identified in Article 13 of RTS 1 and Article 12 of RTS 2 as described in the tables below. In consequence, on-venue transactions meeting the conditions of a transaction listed in those articles are subject to transparency but will be flagged so that market participants can identify that those transactions.

TABLE 7 – EQUITY: SCOPE OF TRANSACTIONS SUBJECT TO POST-TRADE TRANSPARENCY, THE BASICS

	TOTV instrument ⁵	non-TOTV instrument
On-venue transaction	<p>All transactions executed on-venue, which are, by definition, executed in TOTV instruments, are subject to post-trade transparency.</p> <p>The publication of post-trade transparency reports should be real-time, excepts if the trading venue is authorised to defer publication for trades executed between an investment firm dealing on own account other than matched principal trading and another counterparty and the transaction is above a certain size (LIS). In this case, they are subject to deferred post-trade transparency.</p>	By definition, they do not exist.
Off-venue transaction	<p>All transactions executed off-venue in TOTV instruments are subject to post-trade transparency unless they fall under Article 13 of RTS 1 which in turn cross refer to Article 2(5) of RTS 22.</p> <p>The publication of post-trade transparency reports should be real-time, but it can be deferred if deferred publication is applicable to a trading venue in the country of the IF responsible for making the trade public through an APA.</p>	All transactions executed off-venue in non-TOTV instruments are not subject to post-trade transparency (i.e. neither real-time nor deferred).

⁵ Articles 2 and 6 of RTS 1 include three types of transactions (benchmark transactions, portfolio transactions and contingent transactions executed as a single lot) which are subject to post-transparency when executed on-venue and off-venue. However, they can benefit from a pre-trade waiver, and they are not subject to the share trading obligations (STO)

TABLE 8 – NON-EQUITY: SCOPE OF TRANSACTIONS SUBJECT TO POST-TRADE TRANSPARENCY, THE BASICS

	TOTV instrument	non-TOTV instrument
On-venue transaction	<p>All transactions executed on-venue which do not fall under Article 14 of RTS 2 (irrespective from falling under Article 15 of RTS 2), which are, by definition, executed in TOTV instruments, are subject to post-trade transparency.</p> <p>The publication of post-trade transparency reports should be real-time, excepts if the trading venue is authorised to defer publication and if the additional necessary conditions (for the illiquid, LIS, SSTI or package deferrals) are also met.</p> <p>Transaction falling in the scope of Article 14 and not covered by Article 15 of RTS 2 are not subject to post-trade transparency.</p>	By definition, they do not exist.
Off-venue transaction	<p>All transactions executed off-venue on TOTV instruments are subject to post-trade transparency unless they fall under Article 12 of RTS 2 which in turn cross refer to Article 2(5) of RTS 22.</p> <p>The publication of post-trade transparency reports should be real-time, but it can be deferred if the IF has been authorised to defer publication and the additional necessary conditions (for the illiquid, LIS, SSTI or package deferrals) are also met.</p> <p>Transaction falling in the scope of Article 14 and not covered by Article 15 of RTS 2 are not subject to post-trade transparency.</p>	All trades executed off-venue on non-TOTV instruments are not subject to post-trade transparency (i.e. neither real-time nor deferred).

4.1.3.2 Execution venue: transactions with a third-country dimension

[Last update on: 10/07/2023]

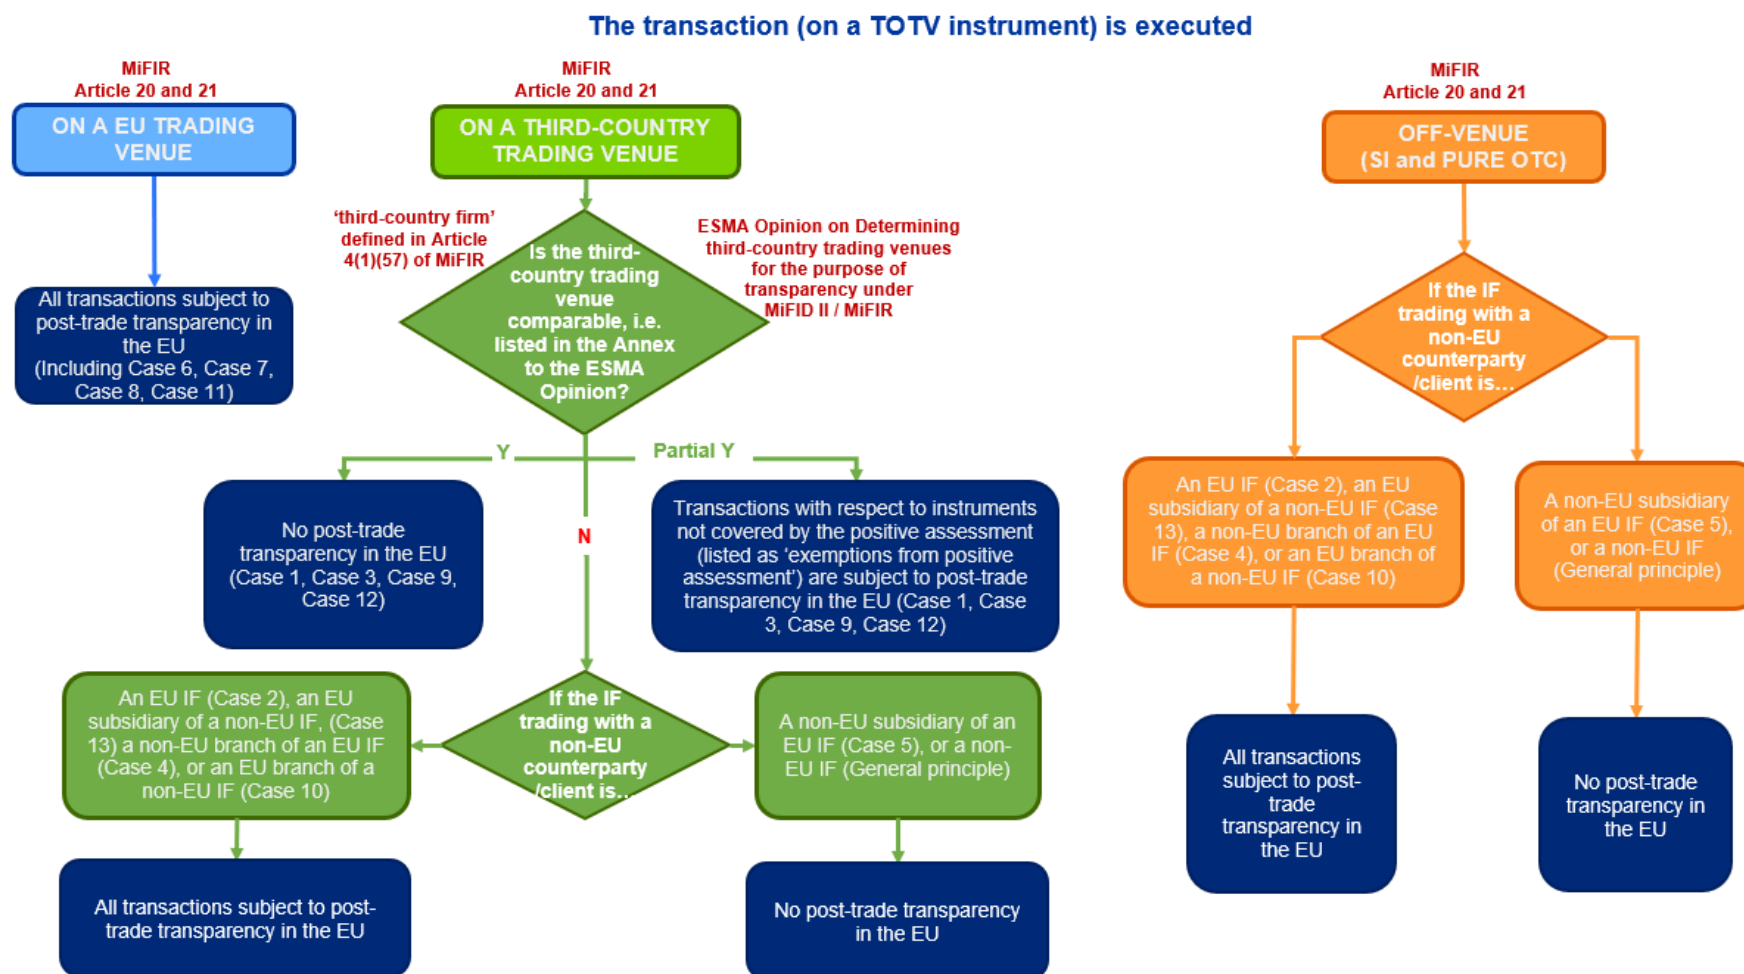

36. MiFID II and MiFIR do not provide specific guidance on the treatment of transactions with a third country dimension for the purposes of the MiFIR transparency regime, namely for:

- trades executed by EU investment firms (i.e. where at least one counterparty is an investment firm authorised in the EU) outside the EU, i.e.:
 - o trades executed on non-EU venues, i.e. a third-country trading venue (TCTV);
 - o OTC trades involving an EU investment firm; or
- trades executed by branches or subsidiaries of non-EU firms within the EU, i.e. the trade is executed on an EU trading venue by a non-EU firm.

37. ESMA considers it important to clarify how those MiFID II / MiFIR requirements should apply to transactions with a third country dimension. In this context, ESMA issued an opinion specifying the criteria to be met by third-country trading venues to be considered comparable for the purpose of transparency under MiFID II/MiFIR ([ESMA70-154-467](#)). Thereinto, the ESMA Opinion lists the third-country trading venues meeting those criteria. The opinion is in the Annex to the ESMA Opinion and the published Level 3 guidance in the form of Q&As are included in this section of the manual.

38. A summary of the transparency regime for these transactions is provided in Figure 5 below and detailed guidance is provided in the following sub-sections.

FIGURE 5 – TRANSACTIONS WITH A THIRD-COUNTRY DIMENSION

4.1.3.2.1 Transactions with a third-country dimension: general principles

[Last update on: 10/07/2023]

39. The following general principles should apply:

Transactions executed outside the EU and where both counterparties are not authorised EU investment firms

40. Transactions where both counterparties are not authorised EU investment firms and that are executed outside the EU are in any case not subject to the MiFIR transparency requirements.

Transactions executed on EU trading venues

41. The transparency requirements always apply to transactions concluded on EU trading venues, irrespective of the origin of counterparties trading on the trading venue and regardless of whether the counterparties to the transaction are authorised as EU investment firm or not.

Transactions executed on non-EU venues (i.e. TCTV)

42. Articles 6, 10, 20 and 21 of MiFIR provide that post-trade transparency requirements apply to transactions traded on a trading venue, without clarifying whether these requirements apply also to transactions concluded on a third-country trading venue (TCTV).

43. Whether or not information on transactions in instruments traded on a trading venue by investment firms on a third-country trading venue have to be made public through an APA in accordance with Articles 20 and 21 of MiFIR depends on the characteristics of that third-country trading venue as set out in the [ESMA Opinion](#) on determining third-country trading venues for the purpose of transparency under MiFID II/MiFIR (ESMA70-154-467).

44. The opinion clarifies that EU investment firms executing transactions on third-country venues meeting the criteria established in the ESMA's opinion and listed in the Annex of the opinion ("comparable third country trading venues (TCTV)" thereafter) should not be subject to the MiFIR transparency regime. Therefore, they do not need to be made public through an APA.

45. Transactions executed by investment firms on third country trading venues that are not included in the list in the Annex of the ESMA Opinion should be treated as OTC transactions and reported through an APA to make the information on those transactions public in accordance with the Guidance on the Annex to the ESMA Opinion.

OTC transactions involving an EU investment firm

46. If one of the parties of an OTC-transaction is an investment firm authorised in the EU, the transaction is considered as executed within the EU: the MiFIR transparency requirements apply.

Transactions of non-EU subsidiaries of an EU investment firm

47. Subsidiaries are independent legal entities and subject to the regulatory regime of the third country in which they are established. Therefore, the MiFIR transparency requirements do not apply, unless the transaction is concluded on an EU trading venue.

Transactions involving a non-EU branch of an EU investment firm

48. Contrary to subsidiaries, branches do not have legal personality. Therefore, transactions by non-EU branches of EU investment firms are treated as transactions of the EU parent company and, therefore, have to be made transparent under the MiFIR rules.

Transactions involving an EU branch of a non-EU investment firm

49. Where a non EU-firm is required to establish a branch in accordance with Article 39 of MiFID II, this branch has to comply, in accordance with Article 41(2) of MiFID II, with the requirements of Articles 16-20, 23-25 and 27, Article 28(1) and Articles 30-32 of MiFID II and Articles 3 to 26 of MiFIR and the measures adopted pursuant thereto. Therefore, EU branches of non-EU firms are subject to the transparency requirements and have to report their trades to APAs⁶.

⁶ This paragraph was included in case 10 of Table 9 below.

4.1.3.2.2 Transactions with a third-country dimension: detailed guidance

[Last update on: 10/07/2023]

TABLE 9 – DETAILED GUIDANCE ON TRANSACTIONS WITH A THIRD-COUNTRY DIMENSION

Case	Investment Firm (IF)	Counterparty/ Client	Execution place	MiFIR Transparency	Detailed explanation
1	EU IF	EU/non-EU	Comparable TCTV	No	Case 1 – EU investment firm (IF) trading on a comparable third country trading venue (TV): The transaction is treated as executed “on venue”. Therefore, the MiFIR transparency requirements do not apply (to avoid double reporting). For transactions concluded on non-compliant third country TVs, case 2 applies.
2	EU IF	Non-EU	Non-comparable TCTV/ OTC	Yes	Case 2 – EU IF trading with a non-EU counterparty/client OTC: An OTC-transaction, i.e. either a transaction concluded on a non-comparable TCTV or a pure OTC-transaction, that involves an EU IF is subject to the transparency requirements and has to be published through an APA.

Case	Investment Firm (IF)	Counterparty/ Client	Execution place	MiFIR Transparency	Detailed explanation
3	Non-EU branch of EU IF	EU/non-EU	Comparable TCTV	No	Case 3 – non-EU branch of an EU IF trading on a comparable third country TV: The trade is treated as executed “on venue”. Therefore, the same treatment as under case 1 applies, i.e. MiFIR transparency requirements do not apply. For transactions concluded on non-compliant third country TVs, case 4 applies.
4	Non-EU branch of EU IF	Non-EU	Non-comparable TCTV/ OTC	Yes	Case 4 - non-EU branch of an EU IF trading with a non-EU counterparty/client OTC: Non-EU branches of EU IF are treated like their EU parent company. Therefore, the same treatment as under case 2 applies. An OTC-transaction, i.e. either a transaction concluded on a non-comparable third country TV or a pure OTC-transaction, is subject to the transparency requirements and has to be published through an APA.
5	Non-EU subsidiary of EU IF	EU/Non-EU	Non-EU TV Non-comparable TCTV /OTC	No	Case 5 – non-EU subsidiary of an EU IF trading on a non-EU TV or OTC: Subsidiaries are independent legal entities and subject to the regulatory regime of the third country in which they are established. Therefore, the MiFIR transparency requirements do not apply.

Case	Investment Firm (IF)	Counterparty/ Client	Execution place	MiFIR Transparency	Detailed explanation
6	Non-EU subsidiary of EU IF	EU/non-EU	EU TV	Yes	Case 6 – non-EU subsidiary of an EU IF trading on an EU TV: The transparency requirements apply at the level of the trading venue. Therefore, the MiFIR transparency requirements will apply.
7	Non-EU firm	EU/non-EU	EU TV	Yes	Case 7 – non-EU firm trading on an EU TV: The transparency requirements apply at the level of the trading venue. Therefore, the transparency requirements will apply.
8	EU branch of non-EU firm	EU/non-EU	EU TV	Yes	Case 8 – EU branch of a non-EU firm trading on an EU TV: The transparency requirements apply at the level of the trading venue. Therefore, the transparency requirements will apply.
9	EU branch of non-EU firm	EU/non-EU	Comparable TCTV	No	Case 9 – EU branch of a non-EU firm trading on a comparable third country TV: The trade is treated as executed “on venue”. Therefore, the same treatment as under case 1 applies. MiFIR transparency requirements do not apply (to avoid double reporting). For transactions concluded on a non-comparable third country TVs, case 10 applies.
10	EU branch of non-EU firm	Non-EU	Non-comparable TCTV/ OTC	Yes	Case 10 – EU branch of a non-EU firm trading with a non-EU counterpart/client OTC: EU branches of non-EU firms are subject to the transparency requirements and have to report their trades to APAs.

Case	Investment Firm (IF)	Counterparty/ Client	Execution place	MiFIR Transparency	Detailed explanation
11	EU subsidiary of non-EU firm	EU/non-EU	EU TV	Yes	Case 11 – EU subsidiary of a non-EU firm trading on an EU TV: The transparency requirements apply at the level of the trading venue. Therefore, the transparency requirements will apply.
12	EU subsidiary of non-EU firm	EU/non-EU	Comparable TCTV	No	Case 12 – EU subsidiary of a non-EU firm trading on a comparable third country TV: The transaction is considered as executed “on venue”. Therefore, the same treatment as under case 1 applies; MiFIR transparency requirements do not apply. For transactions concluded on non-comparable third country TVs, case 13 applies.
13	EU subsidiary of non-EU firm	Non-EU	Non-comparable TCTV/ OTC	Yes	Case 13 – EU subsidiary of a non-EU firm trading with a non-EU counterparty/client OTC: Subsidiaries are independent legal entities and subject to the regulatory regime of the country where they are established. Therefore, EU-subsidiaries of non-EU firms are subject to the full MiFID II/MiFIR requirements. The transaction is subject to MiFIR transparency.

4.1.3.3 Type of transactions subject to post-trade transparency

50. The tables below clarify for each type of transaction if (i) when executed on-venue, the transaction should be subject to post-trade transparency, if it can benefit from a waiver and, if it should be subject to the STO (ii) when executed off-venue, if it is subject to post-trade transparency.

TABLE 10 – EQUITY: GUIDANCE ON THE SCOPE OF TRANSACTIONS SUBJECT TO / EXEMPTED FROM POST-TRADE TRANSPARENCY

Last update on	Transaction type	Guidance	If executed on venue			If executed off-venue
			s.t.(*) Post-trade transparency?	Can benefit from a Waiver? (Article 6, RTS 1)	s.t.(*) STO? (Article 2, RTS 1)	s.t.(*) Post-trade transparency? (Article 13, RTS 1)
10/07/2023	Benchmark transactions	Defined in Article 2(a) of RTS 1	Y	Y Article 6(a) of RTS 1	N Article 2(a) of RTS 1	Y
10/07/2023	Benchmark transactions - RFMD give-up	A risk trade following the receipt of a request for market data (RFMD) is a give-up/give-in trade flow characterised by being executed as a VWAP trade. As such, the trade should be defined as a transaction not contributing to the price discovery process as defined in Article (2)(a) of Commission Delegated Regulation 2017/587. Therefore, it should be reported using 'XOFF' as the Venue of Execution field and using the 'TNCP' flag	Y	Y Article 6(a) of RTS 1	N Article 2(a) of RTS 1	Y

4.2 Post-trade transparency reports: who, when, what to publish?

4.2.1 What: which details of a trade have to be made public for the purpose of post-trade transparency?

4.2.1.1 Equity and equity-like financial instruments

[Last update on: 10/07/2023]

51. The details to be published for the purpose of post-trade transparency are defined in Level 2, more specifically:

- **Level 1:** Articles 6 and 20 of MiFIR provide for the post-trade transparency requirements for trading venues and investment firms, including SI, in respect of shares, depositary receipts, ETFs, certificates and other similar financial instruments.
- **Level 2:** the details to be published for the purpose of post-trade transparency by trading venues and APAs, on behalf of IFs and SIs, are provided in Tables 2 and 3 of Annex I of RTS 1 and, by means of Article 15 of RTS 13, CTPs are also obliged to publish the same details. Furthermore, to support the publication of those details, Table 4 of Annex I of RTS 1 provides for the flags to be used.

Tables 2, 3 and 4 (flags) of Annex I of RTS 1 define the minimum set of post-trade transparency information to be provided, nothing prevents the TVs and APAs to enrich the post-trade transparency reports with additional information considered to be useful.

- **Level 3:** further guidance on how to populate the fields in Tables 2 and 3 of Annex I of RTS 1 is provided in Table 12 below.

Further guidance on the use of the flags provided in Tables 4 of Annex I of RTS 1 is provided in Section 4.2.5.

TABLE 12 – GUIDANCE ON POST-TRADE TRANSPARENCY REPORTS INCLUDED IN TABLE 3 OF ANNEX I OF RTS 1

#	Field identifier	Description and details to be published	Type of execution or publication venue	Format to be populated as defined in Table 2
1	Trading date and time			
2	Instrument identification code			
3	Price	<p>[Last update on: 10/07/2023]</p> <p>If the price of a transaction is not available at the time of execution, investment firms should fulfil the applicable reporting obligations using 'PNDG' as price, specified in the field 'Price' of table 3 of Annex I of RTS 1, table 2 of Annex II of RTS 2 and/or field 33 of table 2 of Annex I of RTS 22. As soon as the price of the transactions (including the NAV in the particular case of ETFs) becomes available, investment firms should cancel the original reports with the 'PNDG' code in the field Missing pPrice (using the cancellation flag for post-trade transparency publication purposes) and publish new reports / send new transaction reports pertaining to the given transactions using filling the field Price with the actual price that became available (using the amendment flag for post-trade transparency publication purposes). The date and time specified in the field "Trading date and time" of table 3 of Annex I of RTS 1, table 2 of</p>		

#	Field identifier	Description and details to be published	Type of execution or publication venue	Format to be populated as defined in Table 2
		Annex II of RTS 2 and/or field 28 of table 2 of Annex I of RTS 22 should always refer to the original date and time of the execution.		
4	Missing Price			
5	Price currency			
6	Price notation			
7	Quantity	<p>[Last update on: 10/07/2023]</p> <p>For certificates or other equity-like financial instruments which are not traded in units, the nominal or monetary value of the financial instrument.</p> <p>The number of units of the financial instruments should be used in all other cases.</p>		
8	Venue of execution			
9	Third-country trading venue of execution	<p>[Last update on: 10/07/2023]</p> <p>This field shall be filled in for transactions executed by investment firms on third country trading venues that are not included in the list in the Annex of ESMA Opinion determining third-country trading venues for the purpose of transparency under MiFIDII/MiFIR (ESMA70-154-165).</p>		

#	Field identifier	Description and details to be published	Type of execution or publication venue	Format to be populated as defined in Table 2
10	Publication date and time	<p>[Last update on: 10/07/2023]</p> <p>The field 'publication date and time' in table 3 of Annex I of RTS 1 and table 2 of Annex II of RTS 2It should always refer to the effective date and time of the publication of the transaction.</p> <p><i>In the case of the use of deferrals</i></p> <p>This, the field 'publication date and time' should be populated with the effective date of the publication of information on that transaction, i.e. after the lapse of the deferral.</p> <p>Concerning non-equity instruments benefitting from a supplementary deferral, this implies that for the first publication of limited information the field 'publication date and time', should be populated with the effective date and time of the publication of limited information on the transaction. Once the deferral period has lapsed, the information in the field 'publication date and time' should reflect the effective time of publication of the full information. ESMA does not expect trading venues, APAs and CTPs to use the flags 'CANC' and 'AMND' when publishing details of a transaction after a supplementary deferral has lapsed.</p>		

#	Field identifier	Description and details to be published	Type of execution or publication venue	Format to be populated as defined in Table 2
		<p><i>In the case of amendments to trade reports</i></p> <p>In case the trading venue, APA or CTP made an error when populating the this field 'publication date and time', should the flags 'CANC' and 'AMND', as provided in Article 12(3) of RTS 1 and Article 7(3) of RTS 2, be used.</p>		
11	Venue of Publication			
12	Transaction identification code			

4.2.1.2 Non-equity financial instruments

[Last update on: 10/07/2023]

52. The details to be published for the purpose of post-trade transparency are defined in Level 2, more specifically:

- **Level 1:** Articles 10 and 21 of MiFIR provide for the post-trade transparency requirements for trading venues and investment firms, including SI, in respect of bonds, structured finance products, emission allowances and derivatives.
- **Level 2:** the details to be published for the purpose of post-trade transparency by trading venues and APAs, on behalf of IFs and SIs, are provided in Tables 1 and 2 of Annex II of RTS 2 and, by means of Article 15a of RTS 13, CTPs are also obliged to publish the same details. Furthermore, to support the publication of those details, Table 3 of Annex II of RTS 2 provides for the flags to be used.

Tables 1, 2 and 3 (flags) of Annex II of RTS 2 define the minimum set of post-trade transparency information to be provided, nothing prevents the TVs and APAs to enrich the post-trade transparency reports with additional information considered to be useful.

- **Level 3:** further guidance common to all non-equity instruments on how to populate the fields in Tables 1 and 2 of Annex II of RTS 2 is provided in Table 13 – Section 4.2.1.2.1 below.

Furthermore, specific guidance to each combination of asset-class and contract type for the fields "Price", "Price notation", "Price currency", "Notation of the quantity in measurement unit", "Quantity in measurement unit", "Quantity", "Notional amount" and "Notional currency" is provided in following Sections 4.2.1.2.2 to 4.2.1.2.6.

Finally, guidance on the use of the flags provided in Tables 4 of Annex I of RTS 1 is provided in Section 4.2.5.

4.2.1.2.1 Common fields of Table 2 of Annex II of RTS 2

TABLE 13 – GUIDANCE ON POST-TRADE TRANSPARENCY REPORTS FOR COMMON FIELDS IN TABLE 2 OF ANNEX II OF RTS 2

17	Transaction Identification Code				
18	Transaction to be cleared				
19	Number of transactions	For all financial instruments applying the supplementary deferral in Article 11(3)(a) and (c) of MiFIR.	<p>[Last update on: 10/07/2023]</p> <p>This field should be populated with the number of transactions executed when deferred publication of details of several transactions in an aggregated form is required under Article 11(3)(a), (c) or (d) of MiFIR.</p>	RM, MTF, OTF APA CTP	{DECIMAL-18/17}

4.2.1.2.2 Specific fields of Table 2 of Annex II of RTS 2 adapted for each combination of instrument/asset class – contract type

[Last update on: 10/07/2023]

53. The following sub-sections (from 4.2.1.2.3 to 4.2.1.2.6) provide examples and guidance on the relevant fields of price, quantity, and notional amount of the transaction on a per asset class and contract basis. The examples are provided for explanatory purposes and might not therefore, the characteristics of the contracts used in those examples might not be faithful to reality, but they aim to be realistic.

54. ESMA considers useful to clarify to stakeholders a few key concepts to avoid confusion. More specifically, for bonds:

- The “minimum denomination” is the lowest denomination of bond that can be purchased as authorised by the bond document. This concept is not used in this document but, the concept of “minimum trading value (lot size)” is used, this is the lowest denomination of bond that can be purchased on the trading venue. In many cases they match and if they differ, the “minimum trading value (lot size)” is bigger than the “minimum denomination”.
- The “face value” of a bond is the price that the issuer pays at the time of maturity, this is also referred to as “par value.”

55. For derivatives and securitised derivatives, key concepts are provided in section 4.2.1.2.6.

4.2.1.2.3 Bonds

[Last update on: 10/07/2023]

TABLE 14 – BONDS: GUIDANCE ON CERTAIN FIELDS IN TABLE 2, ANNEX II OF RTS 2

#	Field identifier	Financial Instruments	Description and details to be published	Type of execution or publication venue	Format to be populated as defined in Table 1
3	Price		In the case of inflation-linked bonds the price should be reported net of the inflation adjustments.		
5	Price currency		This field should be left blank if the price notation is different from “MONE” – Monetary value.		
6	Price notation				
7	Quantity	Not applicable	Not applicable	Not applicable	Not applicable
8	Quantity in measurement unit	Not applicable	Not applicable	Not applicable	Not applicable

#	Field identifier	Financial Instruments	Description and details to be published	Type of execution or publication venue	Format to be populated as defined in Table 1
9	Notation of the quantity in measurement unit	Not applicable	Not applicable	Not applicable	Not applicable
10	Notional amount		<p>The total face value of the transaction. The face value should be the amount that the issuer pays at the maturity of the bond, as determined at issuance without consideration of subsequent amortisation amounts.</p> <p>More specifically, the total “nominal value” should be calculated according to the following formula: Nominal value * Number of instruments. As an example: Price of transaction: 90 (percentage points per 100 of bond nominal value) Nominal value: EUR 1000 Number of instruments: 50.</p> <p>The nominal value should equal to EUR 1000 x 50 = EUR 50000. The price is not used for the calculation.</p>		

#	Field identifier	Financial Instruments	Description and details to be published	Type of execution or publication venue	Format to be populated as defined in Table 1
			<p>In the case of inflation-linked bonds the face value to report shall be net of the inflation adjustments.</p> <p>In the case of inflation-linked bonds the face value to report shall be net of the inflation adjustments.</p>

4.2.1.2.6 Derivatives

[Last update on: 10/07/2023]

56. For derivatives and securitised derivatives, ESMA considers useful to remind stakeholders of a few key concepts:

- Traded on a trading venue (TOTV) concept (see Section 4.1.2, Condition #1);
- Exchange-traded derivative' vs. OTC derivative (see Section 4.1.2, Condition #1);
- Price multiplier (*):
 - ETDs usually do not have a 1-to-1 ratio with the underlying. In other words, one derivative usually does not correspond to one underlying. The relationship between the derivative contract and the underlying is defined in the contract terms of the derivative and is referred to in this document as price multiplier. The price multiplier is then defined as:
 - The number of units of the underlying instrument represented by a single derivative contract.
 - For a future or option on an index, the amount per index point.
 - For spreadbets the movement in the price of the underlying instrument on which the spreadbet is based
 - In the case of derivatives traded on an MTF or OTF, this feature might not be present and be implicitly set to 1. In other words, for derivatives traded on an MTF or OTF the ratio between the derivative and the underlying is 1-to-1.
 - This information is reported in FIRDS referencing to field #25 — “Price Multiplier” of RTS 23.
 - In the case of equity derivatives with shares as underlying the price multiplier is generally called lot size. In the case of commodity and emission allowance derivatives, the amount of underlying commodity/ number of emission allowances it is referred as contract size;
- Strike price (**): Among the contract terms of an option there is the strike price, i.e. the price at which a put or call option can be exercised. Also, this field is reported to FIRDS as field #31 - “Strike price” of RTS 23.

4.2.1.2.6.1 Interest rate derivatives (IRD)

4.2.1.2.6.1.1 Bond Futures and Forwards

[Last update on: 10/07/2023]

TABLE 20 – BOND FUTURES AND FORWARDS: GUIDANCE ON CERTAIN FIELDS IN TABLE 2, ANNEX II OF RTS 2

#	Field identifier	Financial Instruments	Description and details to be published	Type of execution or publication venue	Format to be populated as defined in Table 1
3	Price		<u>Bond futures:</u> The price of the future contract as executed on the venue expressed in percentage if this is the standard market convention.		
5	Price currency		<u>Bond futures:</u> This field should be left blank if the price notation is different from “MONE” – Monetary value.		
6	Price notation		<u>Bond futures:</u> This field shall be populated with “PERC” - Percentage where a price in percentage is the standard market convention for future contracts. Otherwise, it shall be populated with “YIEL” - Yield, “BAPO” – Basis points or “MONE” - Monetary value, in accordance with the standard market convention.		

#	Field identifier	Financial Instruments	Description and details to be published	Type of execution or publication venue	Format to be populated as defined in Table 1
7	Quantity		<u>Bond futures</u> : The number of contracts bought or sold.		
8	Quantity in measurement unit	Not applicable	Not applicable	Not applicable	Not applicable
9	Notation of the quantity in measurement unit	Not applicable	Not applicable	Not applicable	Not applicable
10	Notional amount		<u>Bond futures</u> : Price x Quantity x Price multiplier (*)		
11	Notional currency				

TABLE 21 – BOND FUTURES AND FORWARDS: EXAMPLES

Field identifier	Example 21.1
	<p>Bond futures: 10 Euro-Bund futures contracts are exchanged at a price of 152.84%. The price quotation is in percent of the par value. The tick size is equal to 0.01 percent and the tick value is equal to EUR 10.</p> <p>The value of one point (price multiplier) is the tick value divided by the tick size hence EUR 100,000.</p> <p>The notional amount is equal to [Price x Quantity x Price Multiplier] = [152.84% X 10 X EUR 100,000] = EUR 1,528,400</p>
Price	152.84
Price currency	
Price notation	PERC

11	Notional currency				

TABLE 25 – IR FUTURES AND FRAS: EXAMPLES

Field identifier	Example 25.1	Example 25.2
	<p>IR futures: 10 Three-Month EURIBOR Futures contracts with 1Y maturity are exchanged at a price of 98.94%. The price quotation is in percentage, expressed as 100 minus the traded rate of interest.</p> <p>The tick size is 0.0025 points, and the tick value is EUR 6.25. Usually multiplier = tick value / tick size but since the interest rate relates to a Three-Month period which is only a quarter of the one-year maturity, the tick value EUR 6.25 has to be multiplied by 4.</p> <p>Therefore, the price multiplier is equal to $\text{EUR } 6.25 \times 4 = \text{EUR } 25$. The contract size (price multiplier) is equal to $\text{EUR } 25 / 0.0025\% = \text{EUR } 1,000,000$. The notional amount is equal to $[\text{Price} \times \text{Quantity} \times \text{Price Multiplier}] = [98.94\% \times 10 \times \text{EUR } 1,000,000] = \text{EUR } 9,894,000$</p>	<p>FRAs: One Three-Month EURIBOR FRA contract 6 x 12 (i.e. the FRA expires in 6 months and pays interest in 12 month) is exchanged at a fixed rate of 2.02%. The total notional amount is EUR 10,000,000.</p>

4.2.1.2.6.1.5 Interest rate swaps (IRS)

[Last update on: 10/07/2023]

57. The interest rate swaps (IRS) covered in the tables below are both single currency and multi-currency swaps and include fixed-to-float, float-to-float, fixed-to-fixed, OIS and inflation swaps.
58. The price elements of swaps are the two rates (fixed and/or floating rates) and the spread (i.e. spread on the floating leg index reference price, in the case there is a spread on the floating leg). The floating rates, their terms and the notional currencies are all reference data fields reported in FIRDS under RTS 23 fields: 13 (Notional currency 1), 40-46 (Underlying index name, Term of the underlying index, Notional currency 2, Floating rate of leg 2, IR Term of contract of leg 2). Therefore, they can be retrieved from FIRDS. To cover the missing information ESMA proposes to:
- report in the field “Price” the fixed rate in line with Q&A#2 of section 16 - Interest Rate Swaps reporting and Q&A#1 of section 14 - Financial instruments’ volatile attributes of the Q&A document on MiFIR data reporting;
 - add a new field where to report the spread on the floating leg. This field is not in RTS 2. Therefore, ESMA considers that this field can be voluntarily provided in the post-trade transparency regime on top of the minimum set of fields required by RTS. When ESMA will review RTS 2 following the MiFIR review, ESMA will then add the field to RTS 2.
59. ESMA acknowledges that reference data, especially for derivatives traded on MTFs or OTFs and those frequently changing ISIN with the change of the maturity but not of tenor, might be reported and published by FIRDS with one day delay with respect to the first day of trading.

TABLE 28 – IR SWAPS: GUIDANCE ON CERTAIN FIELDS IN TABLE 2, ANNEX II OF RTS 2

4.2.1.2.6.3 Credit derivatives

4.2.1.2.6.3.1 Index credit default swap (CDS), Single name credit default swap (CDS)

[Last update on: 10/07/2023]

60. Index CDS - The field price should not be the “fixed rate / standardised coupon” (e.g. 100 bps for investment grade or 500bps for high yield), which is in essence reference data but it should be the “quoted spread”, i.e. the spread that reflects market condition of the trade, expressed in basis points. The difference between the standardised coupon and the quoted spread is settled at the beginning of the trade with an up-front payment.
61. Single name CDS – with the “recouping” in early 2009, a new contract can no longer have zero initial cost and so there must be an initial upfront exchange of cash. As a result, it is expected that also in the case of single name CDS the price represents the “quoted spread”, i.e. the spread that reflects market condition of the trade, expressed in basis points. The difference between the standardised coupon and the quoted spread is settled at the beginning of the trade with an up-front payment.
62. Market participants supported, the provision of the information on the up-front payment in the case of CDSs. However, this field is not in RTS 2. Therefore, ESMA considers that this field can be voluntarily provided in the post-trade transparency regime on top of the minimum set of fields required by RTS. When ESMA will review RTS 2 following the MiFIR review, ESMA will then add the field to RTS 2.

TABLE 42 – INDEX AND SINGLE NAME CDSS: GUIDANCE ON CERTAIN FIELDS IN TABLE 2, ANNEX II OF RTS 2

#	Field identifier	Financial Instruments	Description and details to be published	Type of execution or publication venue	Format to be populated as defined in Table 1
22	Up-front payment		<p>The amount of any up-front payment made or received by the CDS buyer to offset the difference between the standardised coupon and the quoted spread to be settled at the beginning of the contract. The up-front payment amount shall be expressed in monetary amount in the same currency of the notional.</p> <p>The up-front payment amount shall have the sign from the perspective of the buyer of the CDS. Therefore, the up-front payment amount shall have a negative symbol if the payment was made by the buyer of the CDS contract and, no symbol if the up-front payment amount was received by the buyer of the CDS contract.</p>		
3	Price		The coupon should be the total spread, including any standardised spread.

4.2.1.2.6.4 FX derivatives

4.2.1.2.6.4.1 Deliverable forwards (DFs), non-Deliverable forwards (NDFs), FX Futures

[Last update on: 10/07/2023]

63. The standard terminology to identify the currencies in the pair is as follows:

- “base currency”: this is the first currency in the pair (e.g. EUR for the EURUSD currency pair);
- “quote currency”: this is the second currency in the pair (e.g. USD for the EURUSD currency pair);
- 1 unit of base currency = X unit of quote currency, where X is the FX rate (e.g. 0.98 USD per 1 EUR).

64. This terminology is used in the guidance and examples below.

**TABLE 46 – DELIVERABLE FORWARDS (DFS), NON-DELIVERABLE FORWARDS (NDFS) AND FX FUTURES: GUIDANCE ON CERTAIN FIELDS
IN TABLE 2, ANNEX II OF RTS 2**

#	Field identifier	Financial Instruments	Description and details to be published	Type of execution or publication venue	Format to be populated as defined in Table 1
3	Price		<u>DF, NDF, FX futures:</u> All-in-rate = Spot price + Forward points. The forward points being the points added to or subtracted from the current spot rate of a currency pair to determine the forward rate for delivery on a specific value date. The all-in-rate should be expressed in units of “quote currency”, i.e. the second currency in the pair.		
5	Price currency		<u>DF, NDF, FX futures:</u> The “quote currency”, i.e. the second currency in the pair.		
6	Price notation		<u>DF, NDF, FX futures:</u> The price should be expressed in “MONE” – Monetary value.		
7	Quantity		<u>DF, NDF:</u> Not applicable <u>FX futures:</u> The number of contracts bought or sold.		
8	Quantity in measurement unit	Not applicable	Not applicable	Not applicable	Not applicable
9	Notation of the quantity in measurement unit	Not applicable	Not applicable	Not applicable	Not applicable

#	Field identifier	Financial Instruments	Description and details to be published	Type of execution or publication venue	Format to be populated as defined in Table 1
10	Notional amount		<p><u>DF, NDF</u>: It should be the total notional amount on which the cash flow payments are based.</p> <p><u>FX futures</u>: It should be the total notional amount on which the cash flow payments are based. Equivalently, "Quantity" x "Contract size".</p>		
11	Notional currency		<p>In general, the "Notional amount" is denominated in the base currency (i.e. the first currency in the pair).</p> <p>The currency pair underlying the FX contract can be derived from field 13 – "Notional currency 1" and field 47 – "Notional currency 2" of RTS 23.</p>

[Last update on: 10/07/2023]

TABLE 48 – DELIVERABLE OPTIONS (DOS), NON-DELIVERABLE OPTIONS (NDOS): GUIDANCE ON CERTAIN FIELDS IN TABLE 2, ANNEX II OF RTS 2

#	Field identifier	Financial Instruments	Description and details to be published	Type of execution or publication venue	Format to be populated as defined in Table 1
3	Price		The premium of the derivative contract per underlying or index point composed of the intrinsic and extrinsic value of an option.		
5	Price currency				
6	Price notation		The price should be expressed in “MONE” – Monetary value or with BAPO – basis points when the underlying is an index whose price is measured in index points.		
7	Quantity	Not applicable	Not applicable	Not applicable	Not applicable
8	Quantity measurement unit	Not applicable	Not applicable	Not applicable	Not applicable

#	Field identifier	Financial Instruments	Description and details to be published	Type of execution or publication venue	Format to be populated as defined in Table 1
9	Notation of the quantity in measurement unit	Not applicable	Not applicable	Not applicable	Not applicable
10	Notional amount		The total notional amount on which the cash flow payments are based.		
11	Notional currency		<p>In general, the “Notional amount” is denominated in the base currency (i.e. the first currency in the pair).</p> <p>The currency pair underlying the FX contract can be derived from field 13 – “Notional currency 1” and field 47 – “Notional currency 2” of RTS 23.</p>		

TABLE 49 – DELIVERABLE OPTIONS (DOS), NON-DELIVERABLE OPTIONS (NDOS): EXAMPLES

Field identifier	Example 49.1	Example 49.2	Example 49.3
	A trade of EURUSD vanilla option contract with a notional amount denominated in EUR (EUR 10 million), strike price 1.12 USD per EUR, premium EUR 5,000.	A trade of USDJPY vanilla option contract with a notional amount denominated in USD (USD 10 million), strike price 114.84 JPY per USD, premium USD 2,000.	A trade of EURCHF vanilla option contract with a notional amount denominated in CHF (CHF 10 million), strike price 0.9320 EUR per CHF, premium USD 4,000. In this example, it is assumed that the notional is denominated in the quote currency instead of in the base currency.

4.2.2 Who: who has to report and make public the post-trade transparency details of a trade?

4.2.2.1 General rule on the definition of the reporting entity

[Last update on: 10/07/2023]

65. The entity who has to make the post-trade transparency details public depends on the execution venue:

- transactions executed on-venue, should be made public by the respective venue of execution (RM, MTF or OTF);
- transactions in relation to financial instruments traded on a trading venue executed off-venue by investment firms should be made public through an APA as per Article 12(4) and (5) of RTS 1 and Article 7(5) and (6) of RTS 2). Therefore, the investment should report the trade to the APA. **In this context it is essential to avoid double reporting it is essential, to identify who has to report the post-trade information to the APA. More specifically:**
 - when a transaction is executed between an investment firm and a client of the firm that is not an investment firm, the obligation rests only on the investment firm.
 - when a transaction is executed between two MiFID investment firms outside the rules of a trading venue, Article 12(4) of RTS 1 and Article 7(5) of RTS 2 clarify that only the investment firm that sells the financial instrument concerned makes the transaction public through an APA.
 - in addition, according to Article 12(5) of RTS 1 and Article 7(6) of RTS 2 if only one of the investment firms is a systematic internaliser in the given financial instrument and it is acting as the buying firm, only that firm should make the transaction public through an APA.

66. The following table presents the possible constellations and clarifies who is in charge of making the transaction public via an APA:

Trade	Buyer	Seller	IF that reports to APA
Trade 1	IF A	Client of IF A	IF A
Trade 2	Client of IF A	IF A	IF A
Trade 3	IF A	IF B	IF B (the seller)
Trade 4	SI A	IF B	SI A (the SI)

Trade 5	IF A	Client of IF B (IF B on behalf of a client)	IF B on behalf of a client
Trade 6	SI A	SI B	SI B (the seller)

4.2.2.2 Definition of the reporting entity in the case of back-to-back trades (Article 12(4), (5) and (6) of RTS 1 and Article 7(5), (6) and (7) of RTS 2)

[Last update on: 10/07/2023]

67. According to Article 12(6) of RTS 1 and Article 7(7) of RTS 2 two matching trades entered at the same time and for the same price with a single party interposed should be published as a single transaction. Following the general rule, the seller should report the transaction. The party that interposes its own account should not report the trade, except if the seller is not an investment firm. The following table clarifies who is in charge of making the transaction public through an APA:

Case	Trade	Amount	Price	Buyer	Seller	IF that reports to the APA
1	Trade 1	500	20	IF A	IF B	IF B
	Trade 2	500	20	IF C	IF A	Not reported
2	Trade 1	500	20	IF A	Client of IF A	IF A
	Trade 2	500	20	Client of IF A	IF A	Not reported
3	Trade 1	500	20	IF A	IF B	IF B
	Trade 2	500	21	IF C	IF A	IF A

- Case 1: IF A is interposing its own account with no difference in prices. Trade 1 and 2 should be reported as a single transaction by IF B.
- Case 2: IF A is interposing its own account with no difference in price. Trade 1 and 2 should be reported as a single trade by IF A.
- Case 3: The price in trade 1 and 2 is not the same. The conditions for a matched trade are therefore not met and both transactions should be reported by the seller.

4.2.2.3 Definition of the reporting entity in the case of prime brokerage arrangement

[Last update on: 10/07/2023]

68. **Regarding When** a non-equity transaction is concluded outside the rules of a trading venue pursuant to a customary prime brokerage arrangement (PB transaction), where a client of a prime broker (PB) agrees on the terms of a PB intermediated trade with an executing broker (EB) and then the client and/or the EB gives up the trade to the PB for its acceptance:

Who should make public the post-trade information?

[Last update on: 10/07/2023]

69. Article 7(7) of RTS 2 specifies that investment firms shall take all reasonable steps to ensure that the transaction is made public as a single transaction. For that purpose, two matching trades entered at the same time and for the same price with a single party interposed shall be considered to be a single transaction.

70. In this respect, ESMA considers that under a PB transaction, the PB enters into matching transactions with the PB client and with the EB and therefore the above legal provision is applicable. ESMA considers that given the structure of PB transactions the EB should always be charged with making the post-trade information public. This approach avoids double-reporting of PB transactions and reflects the current market practice.

71. According to the **Q&A above previous sub-section 4.2.2.1** on “Which investment firm reports”, the seller to the transaction should report the transaction. The interposing party (i.e. the PB in this case) should not report the transaction unless the seller is not an investment firm. While it may be the case that the EB is not the seller to the transaction, ESMA considers that it should be nevertheless the duty of the EB to make those transactions public. This also reflects the current practice that many clients of PBs, (where they are investment firms) or the PB (where the client is not an investment firm) outsource to the EB the reporting obligations.

72. Where the EB is established outside of the EU or is not an investment firm, it should be for the PB client to report the trade, where the PB client is an investment firm. Should the PB client not be an investment firm, the reporting duty would ultimately fall to the PB.

Which should be the timestamp of the transaction (field ‘trading date and time’ of table 2 of Annex II of RTS 2)?

[Last update on: 02/04/2019]

73. The ‘trading date and time’ of the transaction as specified in table 2 of Annex II of RTS 2 should be the point of time when the agreement between the EB and the PB client is concluded.

74. This approach is in line with the description of the field 'trading date and time' which specifies that "for transactions not executed on a trading venue, the date and time shall be when the parties agree the content of the following fields: quantity, price, currencies (in fields 31, 34 and 40 as specified in Table 2 of Annex I of Delegated Regulation (EU) 2017/590), instrument identification code, instrument classification and underlying instrument code, where applicable."

4.2.2.4 Definition of the reporting entity in the case of specific contract types

[Last update on: 10/07/2023]

75. There are cases where the determination of the seller needs to be clarified. For the purposes of reporting the transaction to an APA the seller should be the same as specified in field 16 of Table 2 of Annex I of RTS 22¹⁸. Therefore:

- In case of options and swaptions, the buyer shall be the counterparty that holds the right to exercise the option and the seller should be the counterparty that sells the option and receives a premium.
- In case of futures, forwards and CFDs other than futures and forwards relating to currencies, the buyer should be the counterparty buying the instrument and the seller the counterparty selling the instrument.
- In the case of swaps relating to securities, the buyer should be the counterparty that gets the risk of price movement of the underlying security and receives the security amount. The seller should be the counterparty paying the security amount.
- In the case of swaps related to interest rates or inflation indices, the buyer shall be the counterparty paying the fixed rate. The seller should be the counterparty receiving the fixed rate. In case of basis swaps (float-to-float interest rate swaps), the buyer should be the counterparty that pays the spread and the seller the counterparty that receives the spread.
- In the case of swaps and futures and forwards related to currencies and of cross currency swaps, the buyer should be the counterparty receiving the currency **of the far leg (which is closer to the maturity date)** which is first when sorted alphabetically by ISO 4217 standard and the seller should be the counterparty delivering this currency.

¹⁸ Commission Delegated Regulation (EU) 2017/590 of 28 July 2016 supplementing Regulation (EU) No 600/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the reporting of transactions to competent authorities (OJ L 87, 31.3.2017, p. 449–478).

- In the case of swap related to dividends, the buyer should be the counterparty receiving the equivalent actual dividend payments. The seller is the counterparty paying the dividend and receiving the fixed rate.
- In the case of derivative instruments for the transfer of credit risk except options and swaptions, the buyer should be the counterparty buying the protection. The seller is the counterparty selling the protection.
- In case of derivative contracts related to commodities, the buyer should be the counterparty that receives the commodity specified in the report and the seller the counterparty delivering this commodity.
- In case of forward rate agreements, the buyer should be the counterparty paying the fixed rate and the seller the counterparty receiving the fixed rate.

4.2.2.5 Definition of the applicable deferral regime

Do real time post-trade transparency requirements apply equally to trading venues and systematic internalisers?

[Last update on: 03/10/2017]

76. The requirements in Articles 6 and 10 of MiFIR as further specified in Article 14 of RTS 1 and Article 7 of RTS 2 apply to both trading venues and investment firms. ESMA expects that trading venues and investment firms, in particular systematic internalisers, that use expedient systems publish transactions as close to real time as technically possible. In particular, since systematic internalisers are competing with trading venues over customers' order flow, it is important to provide for a level playing field. Therefore, trading venues and systematic internalisers using similar technology and systems should process transactions for post-trade publication at the same speed.

Which deferral regime applies to investment firms trading OTC? Is it relevant in what Member State the relevant instrument is traded or admitted to trading on a trading venue?

[Last update on: 10/07/2023]

77. As per Article 15(4) RTS 1 (equity instruments) and Article 8(3) RTS 2 (non-equity instruments), the deferral regime applicable to off-venue OTC trades is determined by the deferral regime applicable in the Member State where the investment firm that has to make the transaction public is established. The location of the APA through which a transaction is made public is not relevant. Where it is for an EU branch to make a transaction public, the deferral regime applicable in the Member State where that branch is located should apply. Furthermore, for off-venue OTC transactions the Member State in which the relevant instrument is traded or admitted to trading on a trading venue is not relevant, only the

deferral regime applicable to the investment firm that has to make a transaction public is relevant.

4.2.3 To whom: to whom the post-trade transparency details of an off-venue trade have to be reported?

To whom the post-trade transparency details of an off-venue trade have to be reported?

[Last update on: 10/07/2023]

78. The post-trade transparency details of an off-venue trade have to be reported by investment firms and systematic internalisers to APAs.

To how many APAs the post-trade transparency details of an off-venue trade can be reported?

[Last update on: 10/07/2023]

79. For the purposes of post-trade transparency for non-equity instruments, Article 21(2) MiFIR requires each individual transaction on to be made public once through a single APA. Therefore, transactions on non-equity instruments should be reported to a single APA.

80. In relation to the publication of post-trade information of transactions in equity and equity-like instruments a similar requirement is not provided. Therefore, to avoid double reporting, Article 16 of RTS 13 provides that either investment firms certify to the APA that they report the transaction in a particular financial instrument only through that APA, or if the transaction is reported to more than one APA, one report is flagged as the original report ('ORGN') and all other reports of the same transaction as duplicates ('DUPL'). Therefore, transactions on equity and equity-like instruments can be reported to multiple APAs with an appropriate flagging.

81. Moreover, investment firms and systematic internalisers may report post-trade transparency reports in equity and equity-like instruments and non-equity instruments for purposes different from post-trade transparency to additional APAs (e.g. for calculation of the reference price for the application of the reference price waiver in equity instruments). However, those reports should neither be published by those additional APAs receiving it for post-trade transparency purposes nor send to FITRS and, this data flow should be clearly identified and separated from the post-trade transparency flow to meet the relevant MiFID II/MiFIR obligations.

4.2.4 When: when the post-trade transparency details of a trade have to be made public?

4.2.4.1 General rule on the definition of the reporting time

[Last update on: 10/07/2023]

82. When a transaction must be made public depends on the execution venue:

- transactions executed on-venue must be made public as per:
 - o Article 6 of MiFIR and Articles 14(1) and 15(1) and (3) of RTS 1 for equity and equity-like financial instruments;
 - o Article 10 of MiFIR, Article 6 of MiFIR and Articles 7(4), 8(1) and 11 of RTS 2 for non-equity financial instruments.
- transactions in relation to financial instruments traded on a trading venue executed off-venue by investment firms must be made public as per:
 - o Article 20 of MiFIR, Article 6 of MiFIR and Article 14(2) of RTS 1 Articles 14(1) and 15(1) and (3) of RTS 1 for equity and equity-like financial instruments;
 - o Article 21 of MiFIR, Article 6 of MiFIR and Articles 7(4), 8(1) and 11 of RTS 2 for non-equity financial instruments.

4.2.4.2 Detailed principles on the definition of the reporting time

What is the time limit for investment firms to report post-trade information to APAs, in particular should information be delayed in case of deferral? Who decides on the applicable deferral period given the possibility of disagreement between the APA and the investment Firm?

[Last update on: 10/07/2023]

83. According to Articles 7 and 20 (equity instruments) and 11 and 21 (non-equity instruments) of MiFIR, NCAs may authorise market operators and investment firms to provide for a deferred publication of certain transactions. Since the authorisation for granting the deferred publication is addressed to market operators and investment firms, it is the investment firm's responsibility to ensure that the APA is informed thereof and publishes the information no later than after the lapse of the deferral. **Therefore**, the investment firm should report the transaction to the APA as soon as technically possible after the execution, regardless of the application of any deferrals. The APA should be in charge of publishing the transaction in due time, according to the deferral period that applies to the specific transaction.

84. As per Article 12(6) RTS 1 and Article 7(7) RTS 2 investment firms shall take all reasonable steps to ensure that the transaction is made public as a single transaction. For that purpose, two matching trades entered at the same time and for the same price with a single party interposed shall be considered to be a single transaction.¹⁹

In the context of Article 8 MiFIR, what are normal trading hours for non-equity instruments? Are investment firms allowed to postpone publication of transactions until the opening of the next trading day in respect of trades in non-equity instruments taking place outside of normal trading hours?

[Last update on: 10/07/2023]

85. Normal trading hours for non-equity instruments should be set on basis of the daily trading hours of trading venues trading non-equity instruments. Normal trading hours may therefore be different for different (classes of) non-equity instruments.

86. Transactions that take place on a given trading venue should be made public as close to real-time as possible. Transactions in a non-equity instrument that take place outside a trading venue during the normal trading hours of the trading venues trading that instrument should be published as close to real-time as possible. Where more than one trading venue trades that instrument, investment firms/APAs are expected to check whether the transaction took place within the daily trading hours of any of those trading venues. Transactions that take place outside the daily trading hours of trading venues trading that instrument should be made public before the opening of trading on those trading venues on the next trading day.

In the context of Article 8 and 11 of RTS 2, how should the notion of working day be understood for investment firms?

[Last update on: 10/07/2023]

87. The deferral regime that an APA has to apply when publishing the trades for the investment firm is that of the country of the investment firm responsible for reporting as per Article 15(4) of RTS 1. Therefore, the working days should be defined based on the working days of the country of the investment firm responsible for the publication.

¹⁹ This paragraph was included in Answer to Q&A17a in Section 4 – Non-equity transparency

4.2.5 Flags

4.2.5.1 How are flags applied?

[Last update on: 10/07/2023]

88. RTS 1 and RTS 2 provides for a series of flags aiming at informing market participants and regulators of specific characteristics of transactions.

General principle for the application of flags

As a general approach, flags should only be applied in case the circumstances described in Table 4 of Annex 1 of RTS 1 or Table 3 of Annex II of RTS 2 apply.

Where none of the specified circumstances apply, the transaction should be published without a flag.

Where a combination of flags is possible, the flags should be reported separated by commas.

89. There are different types of flags and related specific guidance for the use of each flag are provided in Table 68 below.

TABLE 68 – GUIDANCE ON THE DIFFERENT TYPES OF FLAGS

Type of Flag	Description of the type of Flag	Equity and equity-like instruments	Non-equity instruments	Guidance
<u>Cancellation and amendment flags</u>	flags used to signal that a transaction has been amended or cancelled		CANC - Cancellation flag AMND - Amendment flag	[Last update on: 10/07/2023] The flags 'CANC' and 'AMND': - apply in the same way for equity and non-equity instruments as specified in Article 12(2) and (3) of RTS 1 and in Article 7(2) and (3) of RTS 2; - should not be used when publishing all the details of a transaction after the lapse of the supplementary deferrals for non-equity instruments.
<u>Descriptive flags (including Package transaction flags)</u>	flags to identify transactions that are non-price forming and/or where the price has been determined based on factors other than the market price	NPFT - Non-price forming transactions flag TNCP	NPFT - Non-price forming transactions flag	

Type of Flag	Description of the type of Flag	Equity and equity-like instruments	Non-equity instruments	Guidance
	flags to identify transactions with specific characteristics	PORT - Portfolio transactions flag	PORT - Portfolio transactions flag	<p>[Last update on: 10/07/2023]</p> <p>Portfolio transactions flag for non-equity instruments: ESMA notes that the definition in RTS 2 of the portfolio trade flag (PORT) explicitly excludes the possibility to assign to a trade both, the PORT flag and the package transaction flag (TPAC) since it is stated that the portfolio transaction is not a 'package transaction'. Therefore, whenever a portfolio transaction meets the criteria of a package transaction the use of the package transaction flag (TPAC) should prevail and the transaction should be flagged as such.</p>
		CONT - Contingent transactions flag		
		BENC - Benchmark transactions flag	BENC - Benchmark transactions flag	
			TPAC - Package transaction flag	

Type of Flag	Description of the type of Flag	Equity and equity-like instruments	Non-equity instruments	Guidance
			XFPH - Exchange for physicals transaction flag	<p>[Last update on: 10/07/2023]</p> <p>ESMA is aware that currently many trading venues consider also financial instruments as an eligible underlying for EFPs. However, The definition of EFPs in Article 2(1)(48) MiFIR is narrow. Underlying physical assets in that sense only include truly physical assets, such as commodities, but do not include financial instruments as listed under section C of Annex I of MiFID II. In consequence, a financial instrument can never be a physical asset for the purpose of the EFPs. Orders/transactions composed of two financial instruments may meet the definition for other package orders/transactions as specified in Article 2(1)(49)(b) and (50)(b) of MiFIR and thereby be eligible for a waiver/deferral.</p>
		ACTX - Agency cross transaction flag	ACTX - Agency cross transaction flag	
		SDIV - Special dividend transaction flag		

Type of Flag	Description of the type of Flag	Equity and equity-like instruments	Non-equity instruments	Guidance
<u>Pre-trade waiver flags</u>	flags linked to waivers from pre-trade transparency	RFPT - Reference price transaction flag		
		NLIQ - Negotiated transaction in liquid financial instruments flag		
		OILQ - Negotiated transaction in illiquid financial instruments flag		
		PRIC - Negotiated transaction subject to conditions other than the current market price flag		

Type of Flag	Description of the type of Flag	Equity and equity-like instruments	Non-equity instruments		Guidance
<u>Post-trade flags</u>	flags indicating that the transactions were subject to deferred publication	LRGS - Post - trade large in scale transaction flag	LRGS - Post-trade LIS transaction flag		
		NA	SIZE - Post-trade SSTI transaction flag		
		NA	ILQD - Illiquid instrument transaction flag		
		NA	<u>Supplementary deferral flags</u>	<u>Full details flags</u>	
			LMTF - Limited details flag	FULF – Full details flag	
			in accordance with Article 11(1)(a)(i)		
			DATF - Daily aggregated transaction flag	FULA – Full details flag	
			in accordance with Article 11(1)(a)(ii)		
			VOLO - Volume omission flag	FULV – Full details flag	
			in accordance with Article 11(1)(b)		

Type of Flag	Description of the type of Flag	Equity and equity-like instruments	Non-equity instruments		Guidance
			FWAF - Four flag weeks aggregation	FULJ – Full details flag	
			in accordance with Article 11(1)(c)		
			IDAF - Indefinite aggregation flag		
			in accordance with Article 11(1)(d)		
			VOLW - Volume omission flag		
			Consecutive use of Article 11(1)(b) and Article 11(2)(c) for sovereign debt instruments		
			COAF - Consecutive aggregation flag (post volume omission for sovereign debt instruments)		

Type of Flag	Description of the type of Flag	Equity and equity-like instruments	Non-equity instruments	Guidance
			Consecutive use of Article 11(1)(b) and Article 11(2)(c) for sovereign debt instruments	
<u>Algorithmic trading flag</u>	flags introduced due to regulatory requirements	ALGO - Algorithmic transaction flag	NA	
<u>Flag related to reporting to APAs</u>	flags to avoid the double-reporting of OTC transactions	DUPL - Duplicative trade reports flag	NA	
<u>Flags related to Systematic Internalisers</u>	flags to provide information on certain transactions executed on an SI	SIZE - Transaction above the standard market size flag	NA	
		ILQD - Illiquid instrument transaction flag	NA	

Type of Flag	Description of the type of Flag	Equity and equity-like instruments	Non-equity instruments	Guidance
		RPRI - Transactions which have received price improvement flag	NA	

4.2.5.2 Is it possible to combine flags?

[Last update on: 10/07/2023]

90. While some of the circumstances described in Table 4 of Annex 1 of RTS 1 or Table 3 of Annex II of RTS 2 are mutually exclusive, it is possible that several circumstances apply at the same time, thereby requiring the use of more than one flag. Where a combination of flags is possible, the flags should be reported separated by commas. **How those flags can be combined is detailed in the following sections.**

4.2.5.3 Equity flags specified in Table 4 of Annex 1 of RTS 1

[Last update on: 10/07/2023]

i. Descriptive flags: 'BENC', 'ACTX'²⁰, '~~TNCP~~', 'NPFT', 'TNCP', '**PORT**', '**CONT**' and 'SDIV'. They can be combined with each other, with the exception of ACTX, **PORT** and **CONT** which cannot be combined with NPFT, and with the flags under ii), iii), iv), v) and vi).

²⁰ ACTX should only be used when the buyer and the seller is the same investment firm acting on behalf of clients.

ii. Post-trade flag: 'LRGS'. The application of the deferred publication is an option and not an obligation, therefore the 'LRGS' flag has to be used only in case of the effective use of the deferred publication. It can be applied alone or in combination with the flags under i), iii), iv), v) and vi)

iii. Pre-trade waiver flags: 'RFPT', 'NLIQ', 'OILQ' and 'PRIC'. Those flags should only be used in case of the effective use of the reference price waiver or the negotiated transaction waiver. Transactions benefitting from a LIS waiver are not flagged as such. All pre-trade waivers flags are mutually exclusive. Pre-trade waiver flags can be combined with the flags under i), ii) and iv),

iv. Algorithmic trading flag: The 'ALGO' flag applies to transactions executed as a result of an investment firm engaging in algorithmic trading as defined in Article 4(1)(39) of MiFID II. The definition of algorithmic trading refers to generation of orders and not to the execution of transactions. In case an order generated automatically by an algorithm matches another order generated with human intervention and results in a transaction, the regulated market or the MTF should report the transaction with the mentioned flag. The flag can be combined with i), ii) and iii).

v. Flags related to Systematic Internalisers: 'SIZE', 'ILQD' and 'RPRI'. They can be combined among each other and with the flags under i), ii) and vi).

vi. Flag related to reporting to APAs: 'DUPL'. In accordance with Article 16(2) of RTS 13²¹ APAs should require reporting firms that intend to make public the transaction via more than one APA to flag the original report for publication with 'ORGN', and all consecutive duplicative reports concerning the same transaction sent to other APAs as 'DUPL'. The flag 'ORGN' is only used for the communication between the investment firm and the APA that receives the original report. APAs are not expected to use 'ORGN' when making a transaction public. However, in accordance with Article 16(1) of RTS 1 APAs should always use the flag 'DUPL' where the published trade is a duplicate, that is the transaction was flagged as 'DUPL' when the reporting firm sent it to the APA for publication. The flag can be combined with the equity flags under (i), (ii) and (v).

²¹ Commission Delegated Regulation (EU) 2017/571 of 2 June 2016 supplementing Directive 2014/65/EU of the European Parliament and of the Council with regard to regulatory technical standards on the authorisation, organisational requirements and the publication of transactions for data reporting services providers (OJ L 87, 31.3.2017, p. 126–141).

TABLE 69 – EQUITY: SUMMARY OF THE POSSIBLE COMBINATIONS OF FLAGS

	Descriptive flags (i)	Post-trade flag (ii)	Pre-trade waiver flags (iii)	Algorithmic trading flag (iv)	Flags related to Systematic Internalisers (v)	Flag related to reporting to APAs (vi)
Descriptive flags (i) (BENC' 'ACTX' 'NPFT' 'PORT' 'CONT' 'SDIV')	ACTX, PORT and CONT cannot be combined with NPFT, otherwise other combinations are possible	combinations are possible	combinations are possible	combinations are possible	combinations are possible	combinations are possible
Post-trade flag (ii) (LRGS)		No combinations possible, there is only one flag	combinations are possible	combinations are possible	combinations are possible	combinations are possible
Pre-trade waiver flags (iii) (RFPT' 'NLIQ' 'OILQ' 'PRIC')			No combinations possible, all pre-trade waivers flags are mutually exclusive	combinations are possible	No combinations possible	No combinations possible
Algorithmic trading flag (iv) (ALGO)				No combinations possible, there is only one flag	No combinations possible	No combinations possible
Flags related to Systematic Internalisers (v) (SIZE' 'ILQD' 'RPRI')					combinations are possible	combinations are possible
Flag related to reporting to APAs (vi) (DUPL' 'ORGN')						No combinations possible

4.2.5.4 Non-equity flags specified in Table 3 of Annex II of RTS 2

[Last update on: 10/07/2023]

i. Descriptive flags: 'BENC', 'ACTX'²², 'PORT' and 'NPFT'. Descriptive flags can be combined with each other, with the exception of ACTX that cannot be combined with NPFT. ~~These flags can be combined with flags as well as with flags under ii), iii) with the exception of 'PORT' + 'TPAC' and iv) and v).~~

ii. Post-trade deferral flags: 'LRGS', 'ILQD' and 'SIZE'. The application of the deferred publication is an option and not an obligation. Post-trade deferral flags should only be used in case of the effective use of the deferred publication. In case of the use of supplementary deferrals under iv), these flags should be used after the supplementary deferral period has lapsed and all the details of the transactions on an individual basis are published. These flags can be combined among each other, except 'LRGS' + 'SIZE', and with flags under i), iii) and v).

iii. Package transaction flags: 'TPAC' and 'XFPH'. These flags are mutually exclusive. In case of the use of supplementary deferral under iv), these flags should be used after the supplementary deferral period has lapsed and all the details of the transactions on an individual basis are published. These flags can be combined with flags under i), ~~with the exception of 'PORT' + 'TPAC', ii) and v), with the exception of PORT which cannot be combined with package transaction flags.~~

iv. Supplementary deferral flags: 'LMTF', 'DATF', 'VOLO', 'FWAF', 'IDAF', 'VOLW' and 'COAF'. These flags are mutually exclusive. They cannot be combined with flags under ~~i), ii), iii)~~ and v). ~~These flags can be combined with flags under i) and iii).~~ However, ~~f~~For components of a package transactions, only the supplementary deferrals providing for volume omission under Article 11(3)(a) and (b) of MiFIR should be used. In case a package transaction benefitted from a deferral, all components should use the applicable flags under ii) and iv) (except DATV, FWAF and IDAF) regardless of whether those components would have qualified for such a deferral if they had been traded outside a package.

v. Full details flags: 'FULF', 'FULA', 'FULV' and 'FULJ'. They should be reported once the deferral time period lapses and all the details of the transactions on an individual basis are published. These flags are mutually exclusive and should be combined with the post-trade deferral flags under ii). These flags can be combined with flags under i) and iii).

²² ACTX should only be used when the buyer and the seller is the same investment firm acting on behalf of clients.

TABLE 70 – NON-EQUITY: SUMMARY OF THE POSSIBLE COMBINATIONS OF FLAGS

	Descriptive flags	Post-trade flags	Package transaction flags	Supplementary deferral flags	Full details flags
	(i)	(ii)	(iii)	(iv)	(v)
Descriptive flags (i) (‘BENC’ ‘ACTX’ ‘PORT’ ‘NPFT’)	ACTX and PORT cannot be combined with NPFT, otherwise other combinations are possible	combinations are possible	combinations are possible except ‘PORT’ + ‘TPAC’	combinations are possible	combinations are possible
Post-trade flags (ii) (‘LRGS’ ‘ILQD’ ‘SIZE’)		these flags can be combined among each other, except ‘LRGS’ + ‘SIZE’	combinations are possible	No combinations possible	combinations are possible
Package transaction flags (iii) (‘TPAC’ ‘XFPH’)			No combinations possible, the flags are mutually exclusive	combinations are possible(*)	combinations are possible
Supplementary deferral flags (iv) (‘LMTF’ ‘DATF’ ‘VOLO’ ‘FWAF’ ‘IDAF’ ‘VOLW’ ‘COAF’)				No combinations possible, the flags are mutually exclusive	No combinations possible
Full details flags (v) (‘FULF’ ‘FULA’ ‘FULV’ ‘FULJ’)					No combinations possible, the flags are mutually exclusive

(*) For components of a package transactions, only the supplementary deferrals providing for volume omission under Article 11(3)(a) and (b) of MiFIR should be used. In case a package transaction benefitted from a deferral, all components should use the applicable flags under ii) and iv) (except DATV, FWAF and IDAF) regardless of whether those components would have qualified for such a deferral if they had been traded outside a package

4.2.6 Package transactions

TABLE 71 – GUIDANCE ON PACKAGE TRANSACTIONS

DEFINITION		
Level 1	<i>Where is a package transaction defined?</i>	A package transaction is defined in Article 2(1)(50)(b) of MiFIR.
MEFFROC		
Guidance	<i>How is the requirement for a package order/transaction that ‘Each component of the transactions bears meaningful economic or financial risk related to all the other components’ to be interpreted?</i>	<p>[Last update on: 15/11/2017]</p> <p>The requirement of meaningful economic and financial risk related to all the other components (mefroc) aims at ensuring that only components that are economically and financially related can constitute a package order/transaction, and to avoid that components that are not economically or financially related in a meaningful manner are declared as a package order/transaction with the main objective of benefitting from the transparency regime for package orders/transactions.</p> <p>ESMA expects trading venues and market participants trading packages to document how the meffroc requirement is met, either in the contract specifications for packages traded on trading venues or on a package-by-package basis in case of OTC-transactions.</p>

COMPOSITION OF THE PACKAGE		
Guidance	<i>Can package transactions also include equity instruments? If yes, how is post-trade transparency applied?</i>	<p>[Last update on: 15/11/2017]</p> <p>No, they cannot. Package transactions have to be exclusively composed of non-equity instruments. The deferrals for packages are available under Article 11 of MiFIR, which cover only non-equity instruments.</p>
Guidance	<i>Can package transactions (Article 2(1)(50)(b) of MiFIR) include components from more than one trading venue, i.e. packages composed of instruments traded on different venues (e.g. invoice spreads) or where one component is traded OTC (e.g. spread overs)?</i>	<p>[Last update on: 15/11/2017]</p> <p>Yes, the definition of package transactions in Article 2(1)(50)(b) of MiFIR, does not specify the method of execution of the different legs of the package. ESMA is therefore of the view that, as long as the transaction meets all conditions under Article 2(1)(50)(b) of MiFIR, the different components of the package can be traded on different venues or OTC.</p>
Guidance	<i>Can package transactions (Article 2(1)(50)(b) of MiFIR) also include instruments that are not admitted to trading or traded on a venue?</i>	<p>[Last update on: 15/11/2017]</p> <p>No. Package transactions as defined in Article 2(1)(50)(b) of MiFIR can only be composed of instruments that are admitted to trading or traded on a trading venue.</p>
POST-TRADE TRANSPARENCY		
Level 2	<i>How shall the post-trade transparency information be made available for package transactions?</i>	<p>Articles 7(8) and 8(1)(d) of RTS 2 defines how post-trade transparency information shall be made available for package transactions.</p>

Guidance	<i>Which party to a package transaction is required to make the transactions public via an APA?</i>	<p>[Last update on: 15/11/2017]</p> <p>In order to provide meaningful information to the market all components of a package transaction should be reported by the same investment firm. Where only one of the investment firms party to the transaction is a systematic internaliser in at least one component of the package only that investment firm should make the transaction public through an APA. Where two investment firms enter into a package transaction where neither (or both) is/are systematic internaliser(s), ESMA expects the investment firms to agree among themselves who should be reporting the transactions through an APA. In both cases, the party that reports the transactions to the APA shall inform the other party of the action taken.</p>
-----------------	--	---

4.2.7 Guidance and Schemes of non-equity post-trade transparency publication

4.2.7.1 Guidance on non-equity post-trade transparency publications

TABLE 72 – GUIDANCE ON NON-EQUITY POST-TRADE TRANSPARENCY PUBLICATIONS

AGGREGATION OF TRANSACTIONS			
Guidance	<input checked="" type="checkbox"/> Article 11(3)(a) of MiFIR <input checked="" type="checkbox"/> Article 11(3)(c) of MiFIR <input checked="" type="checkbox"/> Article 11(3)(d) of MiFIR	How should an APA aggregate transactions in order to publish them in case it is requested/allowed by the regime applicable to the investment firm?	<p>[Last update on: 15/11/2017]</p> <p>APAs should aggregate all transactions in a given financial instrument reported to them. Only transactions reported by investment firms for which the respective NCA has not requested an aggregated publication as per Article 11(3)(a) of MiFIR should not be included when the APA publishes information on transactions in an aggregated form.</p> <p>The same approach should also apply for the aggregation of transactions by APAs where NCAs allow the publication of several transactions in an aggregated form for an extended period of deferral or for an indefinite period of time as per Article 11(3)(c) and (d) of MiFIR.</p>
Guidance	<input checked="" type="checkbox"/> Article 11(3)(a) of MiFIR <input checked="" type="checkbox"/> Article 11(3)(c) of MiFIR <input checked="" type="checkbox"/> Article 11(3)(d) of MiFIR	How is the trade ID used in the case of aggregation of transactions?	<p>[Last update on: 15/11/2017]</p> <p>Article 11(3) of MiFIR allows competent authorities to make use of supplementary deferrals in conjunction with an authorisation for deferred publication. One of the possibilities for a supplementary deferral is the publication of transactions in an aggregated form.</p> <p>Where several transactions are published in such an aggregated form, this report should not include a Transaction identification code (Trade ID) as required under Table 2 of Annex II of RTS 2 since this report is only meant to provide temporary information pending the publication of the full details</p>

AGGREGATION OF TRANSACTIONS			
			of the transactions on an individual basis. Those subsequent single-transaction reports should incorporate a trade ID as required for all other transactions.
Guidance	<input checked="" type="checkbox"/> Article 11(3)(a) of MiFIR <input checked="" type="checkbox"/> Article 11(3)(c) of MiFIR <input checked="" type="checkbox"/> Article 11(3)(d) of MiFIR	What is the minimum number of transactions in order for trading venues and APAs to publish transactions in an aggregated form under Article 11(3)(a), 11(3)(c) or 11(3)(d) of MiFIR?	<p>[Last update on: 10/07/2023]</p> <p>Concerning the aggregation under Article 11(3)(a) of MiFIR, the minimum number of transactions required is defined in Article 11(1)(a)(ii) of RTS 2. Where CAs allow the publication of transactions in an aggregated form under Article 11(3)(c) or (d) of MiFIR as supplemented by Article 11(1)(c) or (d) of RTS 2, a minimum number of two transactions executed in the same instrument and in the course of a week is required.</p> <p>Concerning the aggregation under Article 11(3)(c) of MiFIR, if there are less than two transactions in the course of one calendar week, the transactions cannot be aggregated and APAs and trading venues only need to make public the full details of the transaction after the deferral period lapsed.</p> <p>Concerning the aggregation under Article 11(3)(d) of MiFIR, either on a standalone basis or in conjunction with Article 11(3)(b) of MiFIR, if there are less than two transactions in the course of one calendar week, there should be no publication in aggregated form in that calendar week. However, the transaction will be included in the count for the number of transactions executed in the following calendar week(s). Once the minimum number of two transactions has been reached, all transactions during that calendar week as well as the transaction that has not yet been published should be published in an aggregated form.</p>

AGGREGATION OF TRANSACTIONS			
Guidance	<input checked="" type="checkbox"/> Article 11(3)(a) of MiFIR <input type="checkbox"/> Article 11(3)(c) of MiFIR <input type="checkbox"/> Article 11(3)(d) of MiFIR	Publication of transactions in aggregated form (Article 11(3)(a) of MiFIR, Article 11(1)(a)(ii) of RTS 2): What happens if there are less than five transactions executed on the same day? Does this imply that no publication has to be made?	[Last update on: 03/10/2017] Article 11(3)(a) of MiFIR allows NCAs to request, in conjunction with an authorisation for deferred publication, the publication of several transactions in aggregated form during the time period of deferral. This requirement is further specified in Article 11(1)(a)(ii) of RTS 2 which requires that, where NCAs make use of this supplementary deferral requirement, transactions should be published in an aggregated form where a minimum number of 5 transactions have been executed on the same day. Therefore, in case less than five transactions were executed on the same day, no details of those transactions in an aggregated form have to be made public.
Guidance	<input checked="" type="checkbox"/> Article 11(3)(a) of MiFIR <input checked="" type="checkbox"/> Article 11(3)(c) of MiFIR <input checked="" type="checkbox"/> Article 11(3)(d) of MiFIR	Should APAs and trading venues update the publication of transactions in an aggregated form (Article 11(3) of MiFIR) if a transaction that has been included in the publication is subsequently cancelled or amended? What steps should trading venues and APAs follow in case of late reporting of trades in the context of publication of transactions in an aggregated form?	[Last update on: 29/05/2020] According to Article 11(3) of MiFIR, NCAs may, in combination with an authorisation for deferred publication, allow the publication of several transactions in aggregated form. Article 11(3) of MiFIR, as further specified by Article 11 of RTS 2, provides for three types of aggregated reports: Daily Aggregation (Article 11(3)(a) of MiFIR, DATF); Four weeks aggregation (Article 11(3)(c) of MiFIR, FWAF); Indefinite Aggregation (Article 11(3)(d) of MiFIR, IDAF). As per guidance above, where transactions are published in aggregated form, the aggregated publication should not include a Transaction Identification Code. ESMA understands that in the absence of this code, market participants may not be able to track changes in aggregated publications, especially for the case of weekly and indefinite aggregated form publications.

AGGREGATION OF TRANSACTIONS

			<p>ESMA therefore considers that trading venues and APAs should deal with the situation of amended or cancelled transactions and late reporting in the context of publication in an aggregated form (for the three types of aggregated reports) as follows:</p> <p><u>Amendment:</u></p> <p>Where a transaction is amended after it has been published in aggregated form, the aggregated form publication does not have to be updated. Where an amendment occurs before the transaction was published in aggregated form, the aggregated form publication should reflect this amendment.</p> <p>The publication of full details at the end of the deferral period should always reflect the latest amendment of a transaction. Where at the time of the amendment of a transaction full details have already been disclosed, APAs and trading venues should republish the information using the 'CANC' and 'AMND' flags in accordance with Article 7(3) of RTS 2.</p> <p><u>Cancellation:</u></p> <p>Where a transaction is cancelled after it has been published in aggregated form, the aggregated form publication does not have to be amended. Where a transaction is cancelled before the publication of information in an aggregated form, the aggregated form publication should not include it.</p> <p>Concerning the publication of full details at the end of the deferral period, ESMA expects that APAs and trading venues do not publish full details in case the transaction is cancelled before the end of the deferral period. Where at the time of the cancellation of a transaction full details have</p>
--	--	--	--

AGGREGATION OF TRANSACTIONS

already been disclosed, APAs and trading venues should republish the information using the 'CANC' flag in accordance with Article 7(2) of RTS 2.

Late reporting of trades

When a trade has been only reported after the publication of transactions in an aggregated form, information on this trade should be reflected in the next aggregated publication (daily or weekly), as long as the supplementary deferral period continues applying. Where a trade is only reported after the end of the deferral period, it should not be published in aggregated form.

ESMA expects that APAs and trading venues publish the full details of late trade reports at the lapse of the supplementary deferral period; or, where the transaction is only reported after the deferral period has lapsed, immediately after the trade report has been submitted.

In all cases Furthermore, ESMA reminds APAs of their obligation under Article 64(5) of MiFID II to have 'systems in place that can effectively check trade reports for completeness, identify omissions and obvious errors [...]'. This obligation is further specified in Article 10(8) of RTS 13 requiring APAs to publish 'non-discretionary policies on information cancellation and amendments in trade reports which set out the penalties that APAs may impose on investment firms providing trade reports where the incomplete or erroneous information has led to the cancellation or amendment of trade reports'.

4.2.7.2 Scheme of non-equity post-trade transparency publications

Legend

91. The examples below represent the post-trade monitoring sequence (i.e. visualisation of a trading or data vendor screen). The rows in the tables can be of two different colours:

- the **green row** represents the published information of the post-trade report.
- the **grey row** represents the hidden information of the post-trade report.
- the information in **red** are details on which we draw your attention to better understand the dynamics of the regime with respect to the use of flags and the date and time of publication.

Assumptions valid for all examples

92. The trades considered are neither benchmark, nor agency cross, nor non-price forming. Therefore, the use of the descriptive flags is not simulated in the examples.

93. The trades are executed on a trading venue.

Examples

4.2.7.2.1 Case 1: D+2 deferral

[Last update on: 10/07/2023]

Legal references: Article 11(1) of MiFIR + Article 8(1) of RTS 2

Trade description: a trade of an illiquid bond at a price of 165.89% is executed on 17 June 2016. The nominal value of the bond is EUR 1,000 and the total nominal value of the trade is EUR 5,000.

STEP 1: execution of the transaction, at this moment there is no publication

1	2	3	4	5	6	7	10	11	12	13	14	15	16	17	18	19
Trading Date and Time	Instrument identification code	Price	Missing Price	Price Currency	Price notation	Quantity	Notional Amount	Notional Currency	Venue of Execution	Third-country trading venue of execution	Publication Date and Time	Venue of Publication	Transaction Identification Code	Transaction to be cleared	Flags	Number of transactions

STEP 2: publication of the aggregated information

Trading date and time (field 1): the field trading date and time is populated with the day on which all transactions occurred as per Article 11(4)(a) of RTS 2 (in this example 17 June 2016). **However, the time is set to 00:00:00.**

Price (field 3): the field price is the VWAP of the aggregated transactions as per Article 11(4)(a) of RTS 2.

²³ In this example, compared to the version published in the Q&A document, more transactions are added as well as different details on the price and notional amount

Publication date and time (field 14): as per Article 11(1)(a)(ii) of RTS 2, before 9:00 CET of the working day following the execution date (in this example 17 June 2016), the record with the aggregated transactions in a daily format is published as per below. In this example the publication shall occur before 9:00 CET of 20 June 2016 (Saturday and Sunday 18 and 19 June are assumed to be closed days of the trading venue) and it is done at 08:59:59 of 20 June 2016.

Transaction identification code (field 16): this field should be left empty as defined in the guidance in Section 4.2.7.1

1	2	3	4	5	6	7	10	11	12	13	14	15	16	17	18	19
Trading Date and Time	Instrument identification code	Price	Missing Price	Price Currency	Price notation	Quantity	Notional Amount	Notional Currency	Venue of Execution	Third-country trading venue of execution	Publication Date and Time	Venue of Publication	Transaction Identification Code	Transaction to be cleared	Flags	Number of transactions

STEP 2: publication of the aggregated information

Publication date and time (field 14): as per Article 11(1)(c) of RTS 2 the record with the aggregated transactions in a weekly format should be published before 9:00 local time on the Tuesday of the following week compared to the week over the transactions were executed, which in this example means before 9:00 CET of 21 June 2022. In this example the publication is done on 21 June 2016 at 08:59:59.

Trading date and time (field 1): this field should be left empty.

Price (field 3): the field price is the VWAP of the aggregated transactions as per Article 11(4)(a) of RTS 2.

Transaction identification code (field 16): this field should be left empty as defined in the guidance in Section 4.2.7.1

1	2	3	4	5	6	7	10	11	12	13	14	15	16	17	18	19
Trading Date and Time	Instrument identification code	Price	Missing Price	Price Currency	Price notation	Quantity	Notional Amount	Notional Currency	Venue of Execution	Third-country trading venue of execution	Publication Date and Time	Venue of Publication	Transaction Identification Code	Transaction to be cleared	Flags	Number of transactions

STEP 2: publication of the aggregated information

Publication date and time (field 14): as per Article 11(1)(d) of RTS 2, the record with the aggregated transactions in a weekly format is published as per below before 9:00 local time on the Tuesday of the following week compared to the week over the transactions were executed (in this example the calendar week 13-19 June 2016) which, in this example means before 9:00 CET of 21 June 2016. In this example the publication is done on 21 June 2016 at 08:59:59.

Trading date and time (field 1): this field should be left empty.

Price (field 3): the field price is the VWAP of the aggregated transactions as per Article 11(4)(a) of RTS 2.

Transaction identification code (field 16): this field should be left empty as defined in the guidance in Section 4.2.7.1

SSTI

STEP 3: publication of the aggregated information

Publication date and time (field 14): as per Article 11(1)(c) of RTS 2, the record with the aggregated transactions in a weekly format is published, before 9:00 local time on the Tuesday following the expiry of the extended period of deferral of four weeks counting from the last day of the that calendar week.

In this example, the last day of that calendar week (13 - 19 June 2016) over which the trades which are to be aggregated were executed is 19 June 2016. Therefore, the four weeks end on 17 July 2016 and the following Tuesday is 19 July 2016²⁴. Consequently, the aggregated report should be published before 9:00 CET of 19 July 2016. In this example the publication is done on 19 July 2016 at 08:59:59.

Trading date and time (field 1): this field should be left empty.

Price (field 3): the field price is the VWAP of the aggregated transactions as per Article 11(4)(a) of RTS 2.

Transaction identification code (field 16): this field should be left empty as defined in the guidance in Section 4.2.7.1

1	2	3	4	5	6	7	10	11	12	13	14	15	16	17	18	19
Trading Date and Time	Instrument identification code	Price	Missing Price	Price Currency	Price notation	Quantity	Notional Amount	Notional Currency	Venue of Execution	Third-country trading venue of execution	Publication Date and Time	Venue of Publication	Transaction Identification Code	Transaction to be cleared	Flags	Number of transactions
	ES0000000000	166.24			PERC		27,750,000		XXYY		2016-07-19T08:59:59	XXYY			COAF	8

²⁴ In this example, compared to the version published in the Q&A document, a clerical error in the field "Publication Date and Time" is corrected. The date is now 19 July instead of 17 July which is a Sunday and not a Tuesday.

4.2.7.2.8 Case 8: Cancellation

Case 8.1 Cancellation after publication in the case publication of aggregated information for an indefinite period - for sovereign debt only

[Last update on: 10/07/2023]

Legal references: Article 11(3)(d) of MiFIR + Article 11(1)(d) of RTS 2

Trade description: 8 trades in an illiquid sovereign bond whose nominal value is EUR 1,000 are executed between 13 and 17 June 2016. Some trades are above the relevant post-trade LIS and SSTI for sovereign bonds.

STEP 3: publication of the aggregated information

Publication date and time (field 14): as per Article 11(1)(d) of RTS 2, the record with the aggregated transactions in a weekly format is published as per below before 9:00 local time on the Tuesday of the following week compared to the week over the transactions were executed (in this example the calendar week 13-19 June 2016) which, in this example means before 9:00 CET of 21 June 2016. In this example the publication is done on 21 June 2016 at 08:59:59.

Trading date and time (field 1): this field should be left empty.

Price (field 3): the field price is the VWAP of the aggregated transactions as per Article 11(4)(a) of RTS 2. In this example, the VWAP is calculated not considering the transaction for EUR 750,000 at a price of 165.73%.

Transaction identification code (field 16): this field should be left empty as defined in the guidance in Section 4.2.7.1

5 Transparency calculations

[Last update on: 10/07/2023]

94. As briefly referred to in Section 3.2, to determine the transparency obligations applicable to a financial instrument, several parameters have to be calculated based on its trading activity. Those parameters are calculated by the ESMA IT systems, which collect and process the data and publish the results of those calculations.
95. The previous sections have described the instruments and transactions which have to be made post-trade transparent, the following sections are then devoted to further clarify how the transparency calculations are performed in practice.

5.1 IT Systems and type of data used

[Last update on: 10/07/2023]

96. As mentioned in Figure 1, FITRS is the main IT system designed for the performance of the transparency calculations. However, a more detailed overview is necessary for a complete understanding of this process.
97. The transparency calculations are performed using financial instruments' reference data and quantitative data. The reference data used is that reported to both FIRDS and FITRS and the quantitative data used is that reported to FITRS as described in Figure 6 below. Therefore, there is a clear interdependency between the two systems.
98. The data is collected through the provisions in Article 22(1) of MiFIR, which empowers ESMA and the national competent authorities (NCAs) to request the information necessary to perform the transparency calculations from trading venues, APAs and CTPs, as well as Article 27 of MiFIR, which requires trading venues, to provide reference data for the purpose of transaction reporting under Article 26 of MiFIR.

Box 1: Some concepts to know

Market Identifier Codes (MIC): is a universal method of identifying exchanges, trading platforms, regulated or non-regulated markets and trade reporting facilities. The MIC is a unique four alphanumeric character code defined by the International Organisation for Standardisation (ISO). Two types of MICs can be assigned, the Operating MIC and the Segment MIC. One Operating MIC can be assigned to different Segment MICs. The creation, maintenance and deactivation of MIC is operated by the ISO 10383 Registration Authority.

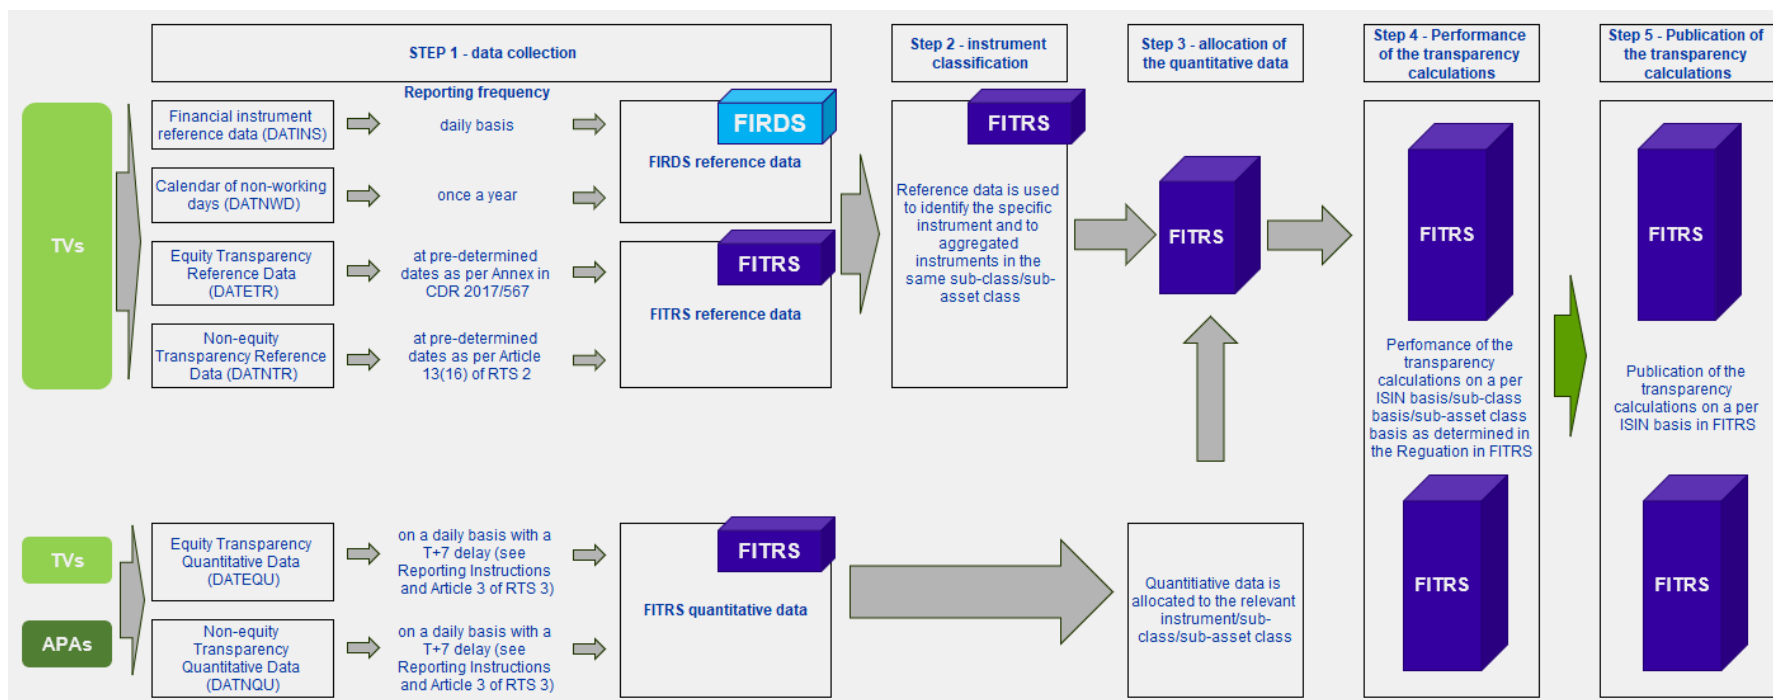

Relevant Competent Authority (RCA): ESMA determines which of the national competent authorities (NCAs) is the RCA of a given financial instrument as per Article 16 of RTS 22. The designated RCA will be the authority where most relevant market in terms of liquidity, for the

respective instrument, is located for the purposes clarified in Recital (18) of RTS 22. This determination is outside the scope of this Manual.

This concept has not to be confused with the most relevant market in terms of liquidity (MRMTL) as defined in Article 4 of RTS 1 which serves the tick-size regime (RTS 11) and the pre-trade waivers for equity and equity-like financial instruments reference to Article 4 of MiFIR and RTS 1. The determination of the MRMTL is in the scope of this Manual and further explained in the following sections.

“RCA-MIC” or “relevant MIC”: This concept is not a legislative concept, but it is a concept that had to be defined at implementation level of MiFID II/MiFIR. Indeed, whenever an RCA has under its jurisdiction more than one trading venue offering for trading one financial instrument, one of them has to be selected and assigned to the financial instrument. The use of this concept is further explained in Box 2.

FIGURE 6 – DESCRIPTION OF THE PROCESS OF THE PERFORMANCE OF THE TRANSPARENCY CALCULATIONS^{25 26}

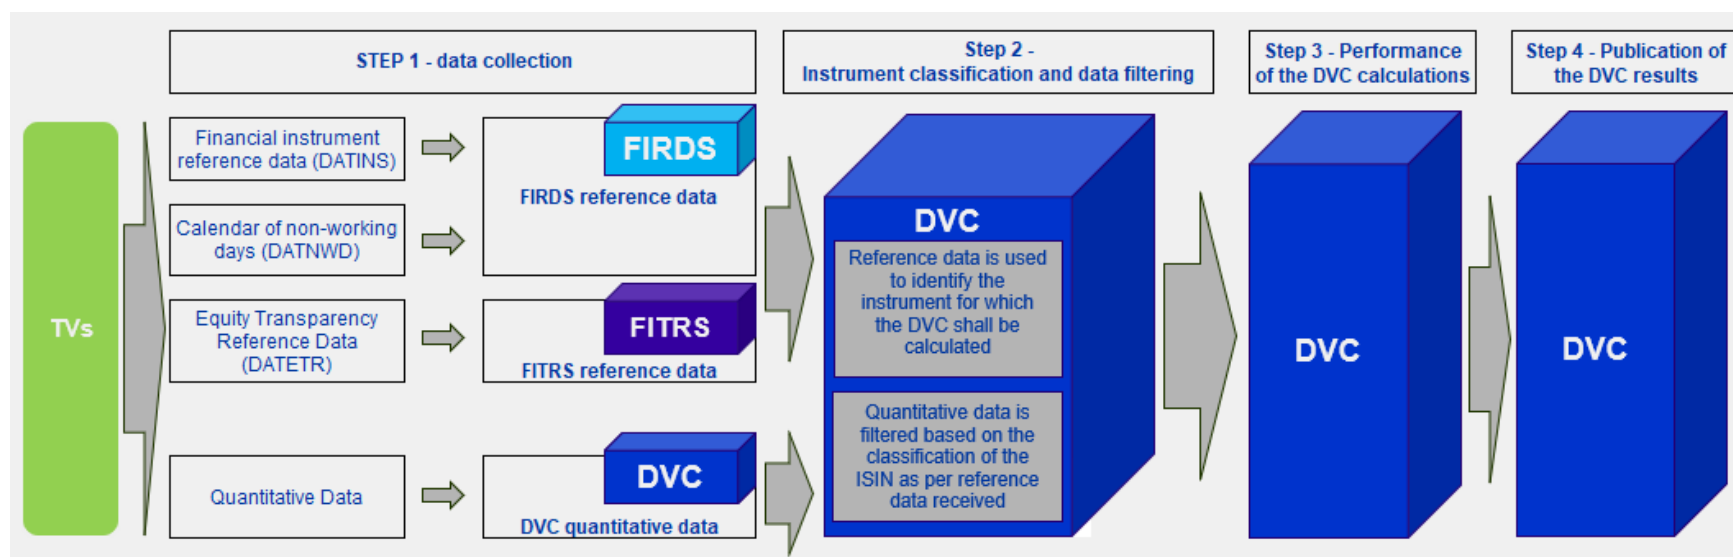

²⁵ SIs also report reference data to FIRDS. However, the instruments for which an SI reports this data are out of the scope of the transparency regime, therefore not used.

²⁶ Link to [Reporting Instructions](#)

99. Furthermore, it is necessary to clarify that the transparency calculations also cover the DVC calculations. The ESMA IT system which provides for the monthly publication of the DVC results is the DVC system which relies on FIRDS and FITRS reference data for the determination of the instruments for which the calculations shall be provided and, on the quantitative data received by the DVC system for the performance of the results for each instrument. Figure 7 below provides for a description of the process for the performance of these calculations

FIGURE 7 – DESCRIPTION OF THE PROCESS OF THE PERFORMANCE OF THE DVC CALCULATIONS²⁷

²⁷ SIs also report reference data to FIRDS. However, the instruments for which an SI reports this data are out of the scope of the transparency regime, therefore not used.

5.2 Scope of instruments

5.2.1 CFI code - MiFIR identifier mapping table

[Last update on: 10/07/2023]

100. Before proceeding with providing more details on the transparency calculations, it is important to clarify how instruments are identified and classified for the purposes of such calculations. In this context, two remarks are of high relevance:
101. **Remark #1:** the scope of the instruments subject to the transparency calculations is the same as the scope of instruments subject to the transparency regime. However, certain calculations might be limited to a sub-set of those instruments, e.g. the DVC applies only to equity and equity-like financial instruments. The details will be provided under each relevant section describing in more detail each type of calculations.
102. **Remark #2:** considering that a significant number of instruments are admitted to trading or traded on more than one trading venue, it is key to ensure that they are classified as the same instrument (on a per ISIN basis) consistently with the same MiFIR identifier in order for the system to correctly calibrate and apply the transparency regime for the instrument as well as correctly apply the DVC results. To tackle this issue and ensure an operationally feasible EU wide consistent approach, ESMA produced a mapping table between CFI code and MiFIR identifier. This mapping allows to assign to each CFI code (using in most of the cases the first two attributes and more attributes in few ones) a MiFIR identifier. This mapping also allows in the first instance the classification of the instrument and by consequence it determines whether it is inside or outside the scope of the MiFID II transparency regime and the DVC and therefore what is the reference and quantitative data to be reported to the FITRS and DVC systems.
103. ESMA is constantly reviewing the CFI code - MiFIR identifier mapping table to reach the highest level of granularity of the mapping as possible to ensure the highest possible level of convergence of the classification of the instruments. The latest version of the CFI code - MiFIR identifier mapping table at the following [link](#).
104. It is reminded that there is no one-to-one correspondence between a CFI code and the MiFIR identifier. Indeed, the former is an industry-based identifier while the latter closely follows the classification of financial instruments in MiFID II/ MiFIR as it serves the purpose of classifying them to perform the transparency calculations. Therefore, there are some instances where a CFI code identified by the first two characters allows to choose among two MiFIR identifiers. The MiFIR identifier assigned will determine the classification of that financial instruments for the purposes of the transparency calculations and regime to apply.

5.2.2 The use of reference data

[Last update on: 10/07/2023]

105. As described in Figures 6 and 7 above, the reference data is a key element to perform the transparency calculations. However, while in the equity space it is necessary only to distinguish instruments among shares, ETFs, DRs, certificates and other equity-like (see Table 2 of Annex II of RTS 1), in the non-equity space the classifications are more granular and touch on the contract types and product characteristics (see Table 2 of Annex IV of RTS 2). Indeed, the transparency calculations for certain non-equity instruments are determined at class level and not at instrument (ISIN) level. As a result, a combination of reference data from FIRDS and FITRS is used to define those classes. A more comprehensive description of this is provided in Section 5.4.3.

Box 2: The use of the RCA-MIC to define reference data

The “RCA-MIC” or “relevant MIC” is a key concept in FIRDS and FITRS systems as it is defined as *“the segment MIC of the reporting entity that provides the consistent value of the reference data for both FIRDS and FITRS”*. In other words, the reference data provided by this MIC to FIRDS and FITRS overwrite that provided by other trading venues when they are inconsistent among each other. Therefore, the instrument classification for the purpose of the transparency and the related transparency regime applied are defined by this MIC. This concept is mentioned in Box 1.

5.3 Transparency calculations: types and frequency of publication

[Last update on: 10/07/2023]

106. Since now it is clear how instruments are classified for the purposes of the transparency calculations, we can further detail the transparency calculations which can be divided into two groups:

- transparency calculations *strictu sensu*; and
- additional transparency calculations.

107. The transparency calculations are described in general terms in the following sub-sections 5.3.1 to 5.3.3 and, more in detail in section 5.4.

5.3.1 Transparency calculations *strictu sensu*

[Last update on: 10/07/2023]

108. The transparency calculations *strictu sensu* are those calculations determining several parameters that in turn define the transparency regime applicable to a financial instrument. Those calculations are performed using financial instruments' reference data and quantitative data. The reference data used is that reported to both FIRDS and FITRS and the quantitative data used is that reported to FITRS as described in Figure 6 above. The parameter determining the transparency calculations *strictu sensu* are described in Table 73 below.

TABLE 73 – TRANSPARENCY CALCULATIONS *STRICTU SENSU* PARAMETERS

Equity and equity-like parameters	Non-equity parameters
Liquidity status	Liquidity status
MRMTL	LIS thresholds
ADT for the determination of the LIS threshold	SSTI thresholds
AVT for the determination of the SMS for liquid instruments	
ADNTE on the MRMTL for the determination of the tick-size	

5.3.2 Additional transparency calculations

[Last update on: 10/07/2023]

109. The additional transparency calculations are provided in Table 74 below. The DVC calculations are required to be performed by ESMA on a monthly basis by Article 5 of MiFIR. The process of data collection and performance of those calculations is described in Figure 7 above.
110. The SI and CTP calculations instead are performed and published by ESMA on a voluntary basis using the FITRS system. Those additional calculations support market participants in meeting their MiFID II/ MiFIR obligations and the data used is the same as that collected for the purpose of the transparency calculations *strictu sensu* as described in Figure 6 above²⁸.

TABLE 74 – ADDITIONAL TRANSPARENCY CALCULATIONS

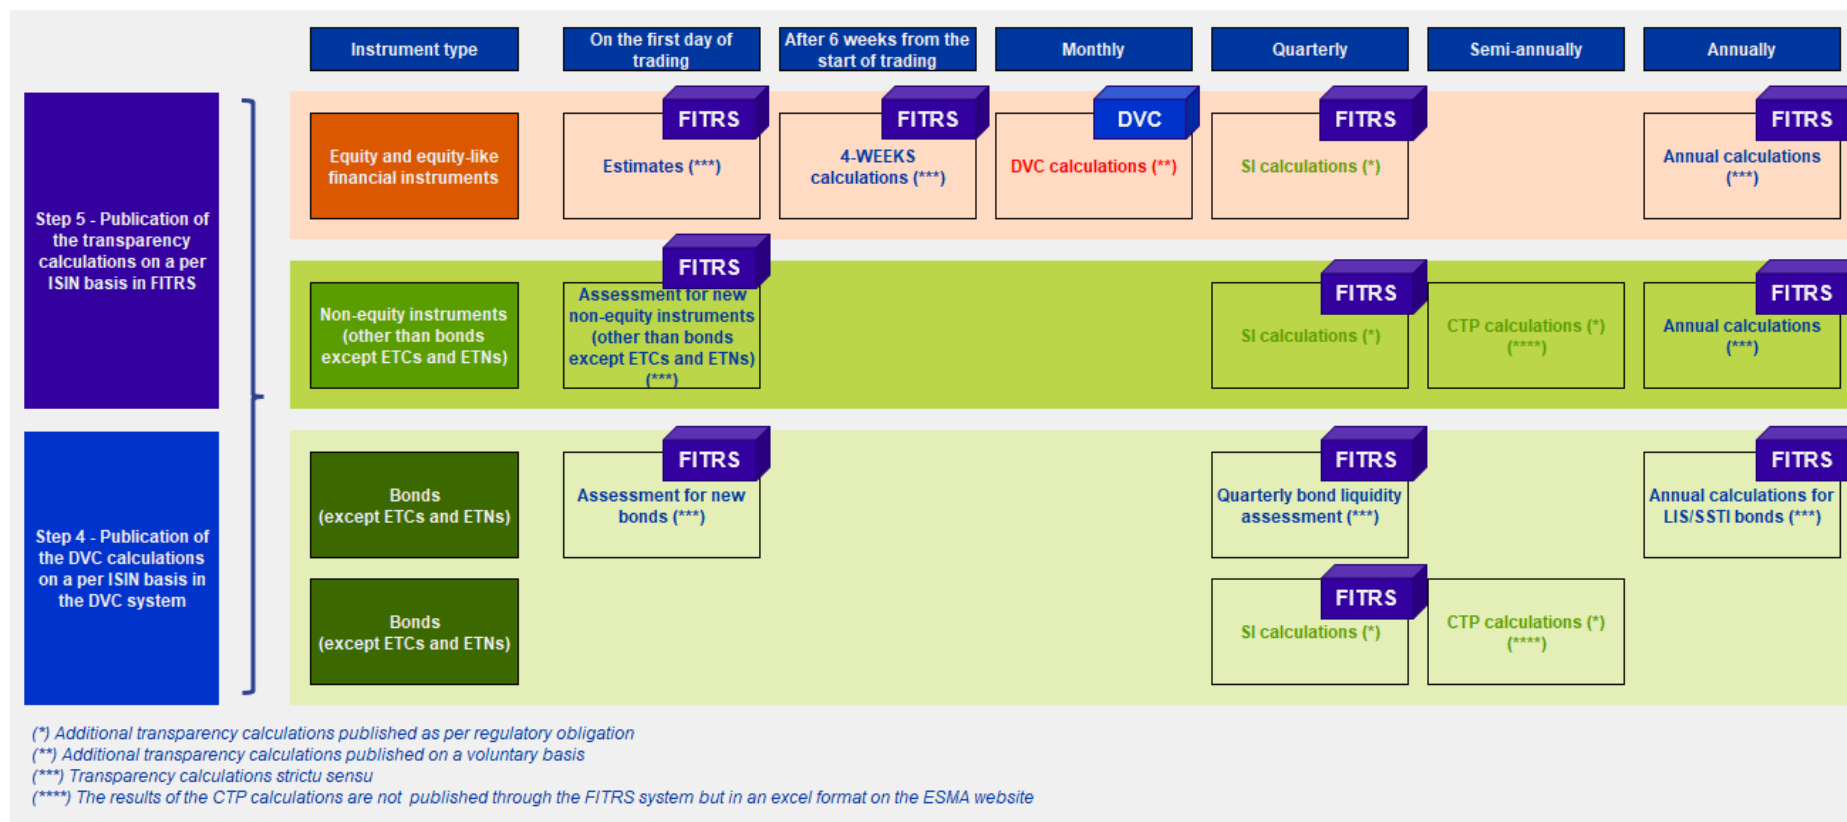

Equity and equity-like additional transparency calculations	Non-equity additional transparency calculations
DVC calculations	CTP calculations
SI calculations	SI calculations

²⁸ The results of the calculations for the CTP publication are not provided through FITRS but in excel files on the ESMA website.

5.3.3 Frequency of publication

[Last update on: 10/07/2023]

FIGURE 8 – FREQUENCY OF PUBLICATION OF THE TRANSPARENCY CALCULATIONS

5.4 Detailed description of the transparency calculations

5.4.1 The use of quantitative data

111. To give legal certainty on the quantitative data to be reported to FITRS, Annex IV and Annex V, mirroring the Reporting Instructions of FITRS, were introduced in the reviewed RTS 1 and 2 respectively.

TABLE 75 – NON-EQUITY INSTRUMENTS: GUIDANCE ON THE USE OF QUANTITATIVE DATA

	Guidance
What is the use of Table 4 of Annex II of RTS 2?	<p>[Last update on: 10/07/2023]</p> <p>RTS 2 determines how the measure of volume is to be calculated for the purpose of the different transparency parameters.</p> <p>This table cross refers to Field #10 “Notional amount” and Field #8 - “Quantity in measurement unit” of Table 2 of Annex II of RTS 2, which is the table with the list of details for the purpose of post-trade transparency. Therefore, there should be consistency in the values reported to the post-trade transparency reports and to FITRS.</p> <p>Table 4 of Annex II of RTS 2 is used for the determination of the following transparency parameters: (i) the Average daily notional amount (ADNA) and Average daily amount (ADA) for emission allowances and emission allowance derivatives for the determination of the liquidity (ii) Large in scale (LIS) (iii) Size specific to the instrument (SSTI).</p>

TABLE 76 – EQUITY, EQUITY-LIKE AND NON-EQUITY INSTRUMENTS: GUIDANCE ON THE USE OF QUANTITATIVE DATA

	Guidance
<p>How should APAs report trading activity volume to competent authorities for the purpose of the transparency calculations?</p>	<p>[Last update on: 10/07/2023]</p> <p>RTS 3 requires trading venues, APAs and CTPs to provide to competent authorities the data necessary for the performance of the transparency calculations. For this purpose, these reporting entities should provide trading activity volume (in terms of number of transactions and turnover/notional amount/nominal amount). Recital (12) of RTS 3 specifies that in order to provide competent authorities and ESMA with accurate data, trading venues, APAs and CTPs should ensure that their reports include single-counted transactions only.</p> <p>Whereas Article 21(2) MiFIR requires each individual transaction on non-equity instruments to be made public once through a single APA, this requirement is not provided in relation to the publication of transactions in equity and equity-like instruments. In order to avoid double-reporting, Article 16 of RTS 13 provides that either investment firms certify to the APA that they report the transaction in a particular financial instrument only through that APA, or if the transactions is reported to more than one APA, one report is flagged as the original report ('ORGN') and all other reports of the same transaction as duplicates ('DUPL').</p> <p>Consequently, when reporting the necessary data for the performance of the transparency calculations to competent authorities, APAs should provide the aggregated trading activity data including only original reports for equity and equity-like instruments.</p>

	Guidance
How is the trading activity of a terminated instrument considered in the performance of the calculations?	<p>[Last update on: 10/07/2023]</p> <p>Equity and equity-like financial instruments</p> <p>When an instrument is terminated the transparency calculations are no longer applicable to this instrument. However, if the instrument is subject to a corporate action and there is an ISIN change, the two ISINs are considered as two separated instruments. Therefore, the trading activity of the “old ISIN” is not considered when performing the transparency calculations for the “new ISIN”.</p> <p>Non-equity financial instruments</p> <p>In the case of bonds, ETCs, ETNs and, where the first test is passed, also in the case of SFPs, since the calculations are performed at ISIN level, the same approach for equity and equity-like instruments is applied. In other words, when a instrument is terminated the transparency calculations are no longer applicable to this instrument. However, if the instrument is subject to a corporate action and there is an ISIN change, the two ISINs are considered as two separated instruments. Therefore, the trading activity of the “old ISIN” is not considered when performing the transparency calculations for the “new ISIN”.</p> <p>For all the other instruments, where the transparency calculations are performed at sub-asset class or sub-class level, the trading activity of terminated instruments is taken into account if occurred during the observation period relevant for the calculations, i.e. if the relevant observation period is 01/01/2021 – 31/12/2021, the trading activity of instruments terminated on 11/02/2021 which was executed between 1 January and 10 February 2021 is considered in the transparency calculations. However, it must be noted that the trading activity will be assigned to the relevant sub-asset class or sub-class to which the instrument belongs over the course of the relevant observation period.</p>

5.4.2 Equity and equity-like financial instruments transparency calculations *strictu sensu*

[Last update on: 10/07/2023]

112. The parameters determined by the transparency calculations *strictu sensu* for equity and equity-like financial instruments are the following:
- the liquidity of the instrument;
 - the average daily turnover (ADT) for the purpose of identifying the size of orders that are large in scale (LIS);
 - the average value of transactions (AVT) for the purpose of determining the standard market size (SMS) applicable to liquid instruments only;
 - the trading venue which is the most relevant market in terms of liquidity for the instrument (MRMTL);
 - the average daily number of transactions of the most relevant market in terms of liquidity for the instrument (ADNTE on MRMTL).
113. The following tables provide an overview of those parameters and specify how they are determined, with which frequency and their application period based on Level 2.
114. Table 86 provides further guidance either common to all parameters / instruments or relevant for one or more.
115. The transparency calculations *strictu sensu* for equity and equity-like financial instruments are performed at the instrument level, identified by the ISIN.

5.4.2.1 Liquidity

5.4.3 Non-equity financial instruments transparency calculations *strictu sensu*

[Last update on: 10/07/2023]

116. The parameters determined by the transparency calculations *strictu sensu* for non-equity financial instruments are the following:
- the liquidity of the instrument;
 - the pre-trade and post-trade size specific to the instruments (SSTI) thresholds;
 - the pre-trade and post-trade large in scale (LIS) thresholds.
117. The following tables provide an overview of those parameters and specify how they are determined, with which frequency and their application period based on Level 2.
118. Table 91 provides further guidance either common to all parameters / instruments or relevant for one or more.
119. The transparency calculations *strictu sensu* for non-equity financial instruments are performed at different levels based on the type of instrument, namely:
- at ISIN level: Bonds (excluding ETCs and ETNs), ETCs and ETNs and, if the first test is passed, SFPs;
 - at asset class level: securitised derivatives and FX derivatives;
 - at sub-asset class level: emission allowance, emission allowance derivatives and equity derivatives (liquidity for all equity derivatives except swaps and portfolio swaps);

- at sub-class level: interest rate derivatives, equity derivatives (LIS and SSTI for all equity derivatives and liquidity for swaps and portfolio swaps), commodity derivatives, credit derivatives, C10 derivatives and CFDs.

120. Table 92 provides guidance on the transparency reference data fields to be reported to FITRS in the Non-Equity Transparency Reference Data files (DATNTR) which are used to define these classes at which the transparency calculations *strictu sensu* are performed.

5.4.3.1 Liquidity for BONDS (excluding ETCs and ETNs)

[Last update on: 10/07/2023]

Guidance

[Last update on: 04/10/2017]

In case the liquidity assessment for a bond under Article 2(1)(17)(a) of MIFIR as further specified in Article 13(18), (19) and (20) of RTS 2 is not published, what is the liquidity status of the bond to be applied until it is published by ESMA or the relevant non-delegating NCA?

In case the necessary liquidity assessment for a bond is not published in FITRS, the bond should be considered illiquid.

More specifically, a bond should be deemed illiquid if:

- in the case the necessary liquidity assessment for the bond is the one based on issuance size under Article 2(1)(17)(a) of MIFIR (further specified under Article 13 (19) and (20) of RTS 2 because the bond is newly admitted to trading or first traded, and such assessment is not published in FITRS; or
- in the case the necessary liquidity assessment for the bond is the one of the latest quarterly liquidity assessment based on the trading activity defined under Article 2(1)(17)(a) of MIFIR (further specified under Article 13(18) of RTS 2) when the bond is no longer considered a newly admitted to trading or first traded bond and such assessment is not published in FITRS.

[Last update on: 04/01/2019]

In case the large in scale (LIS) and size specific to the instrument (SSTI) thresholds for pre-trade and post-trade transparency for a bond are not published by ESMA or the relevant non-delegating NCA, what would be the applicable thresholds?

When:

- the LIS for pre-trade transparency under Article 9(1)(a) of MIFIR as further specified in Article 3 of RTS 2;
- the SSTI for pre-trade transparency under Articles 8(4) and 9(1)(b) of MIFIR as further specified in Article 5 of RTS 2;
- the LIS for post-trade transparency under Article 11(1)(a) of MIFIR as further specified in Article 9 of RTS 2;
- the SSTI for post-trade transparency under Article 11(1)(c) of MIFIR as further specified in Article 10 of RTS 2.

for a bond are not published in FITRS or on the ESMA website, the pre-trade transparency thresholds to be applied are the pre-trade threshold floors specified in Table 2.3 of Annex III in RTS 2 for both the pre-trade and the post-trade transparency LIS and SSTI.

This rule should be applied in all cases when one or more of the four thresholds are not published in FITRS.

The transparency parameters should apply from the day following publication.

Instrument type	Transparency parameter	Topic
<input checked="" type="checkbox"/> All except bonds (excluding ETCs and ETNs)	<input checked="" type="checkbox"/> Liquidity <input checked="" type="checkbox"/> LIS <input checked="" type="checkbox"/> SSTI	Default transparency regime
Guidance		
<p>[Last update on: 29/05/2020]</p> <p><i>In case the liquidity assessment, the large in scale (LIS) and size specific to the instrument (SSTI) thresholds for pre-trade and post-trade transparency for a non-equity instrument - other than a bond (except ETCs and ETNs) - under Article 2(1)(17)(a) of MIFIR as further specified in Article 13(1), (2) and (3) of RTS 2 is not published, what is the liquidity status of the instrument to be applied until it is published by ESMA or the relevant non-delegating NCA?</i></p> <p>When one or more of the parameters related to the transparency calculations are not published at per-ISIN basis by ESMA in the Financial Instruments Transparency System (FITRS) or the relevant non-delegating NCA, the transparency calculations published at sub-class level by ESMA should be used. These calculations are available in the Register containing the results of the annual transparency calculations for non-equity instruments.</p> <p>If also the results of the annual transparency calculations at sub-class level for non-equity instruments are not published in the Register, the following should be applied until the publication for all parameters is available:</p> <ul style="list-style-type: none"> - If the instrument is a securitised derivative: <ul style="list-style-type: none"> - the instrument should be deemed to have a liquid market; - the pre-trade and post-trade SSTI and LIS thresholds should be those provided in Table 4.2 of Annex III of RTS 2. 		

- If the instrument is an equity derivative of “Group I” which include Stock index options, Stock index futures/forwards, Stock options, Stock futures/ forwards, Stock dividend options, Stock dividend futures/ forwards, Dividend index options, Dividend index futures/ forwards, Volatility index options, Volatility index futures/ forwards, ETF options and ETF futures/ forwards:

- the instrument should be deemed to have a liquid market;

- the pre-trade and post-trade SSTI and LIS thresholds should be those provided in Table 6.2 of Annex III of RTS 2.

- If the instrument is neither a securitised derivative nor an equity derivative of “Group I”:

- the instrument should be deemed not to have a liquid market;

- the pre-trade and post-trade SSTI and LIS thresholds should be those provided in the following Tables of Annex III of RTS 2:

- the second table of Table 2.5 for ETCs and ETNs;
- Table 3.2 for structured finance products (SFPs);
- Table 5.3 for interest rate derivatives;
- Table 6.3 for equity derivatives other than those included in “Group I”;
- Table 7.3 for commodity derivatives;

Guidance		
<p>[Last update on: 29/05/2020]</p> <p><i>How should trading venues convert large in scale (LIS) and size specific to the instrument (SSTI) thresholds into lots under Article 13(9) of RTS 2?</i></p> <p>RTS 2 determines the LIS and the SSTI thresholds for derivatives in monetary value. Since many trading venues trade derivatives in lots, i.e. a standardized quantity as set out by the trading venue, Article 13(9) of RTS 2 allows market operators and investment firms operating a trading venue to convert the LIS and SSTI trade sizes to the corresponding number of lots.</p> <p>This provision can be used where all the following conditions are met:</p> <ul style="list-style-type: none"> irrespectively of the asset class of the derivative contract, the corresponding number of lots of the LIS and SSTI trade sizes should: <ul style="list-style-type: none"> be determined in advance by the trading venue. More specifically, the methodology to convert into lots should be made public and any change should be communicated at least 1 month in advance of the implementation date of the new methodology; be defined for the respective sub-class of: 		

- ☐ commodity derivatives as per Table 7.1 of Annex III of RTS 2;
- ☐ equity derivatives as per Table 6.2 of Annex III of RTS 2;
- o be defined for the respective sub-class of;
- o be calculated once per year, made public within 15 working days after publication of the annual transparency calculations by ESMA and be maintained until the application of the results of the next calculations performed in accordance with Article 13(17) of RTS 2. The LIS and SSTI thresholds expressed in lots may be modified during the course of the year in the case of both pre-determined ordinary, and extraordinary revisions of the lot sizes of the underlying derivative contracts communicated by the trading venue.
- o In the case where a corporate event determines the creation of a new series of derivative contracts:
 - ☐ the series existing before the corporate event shall have the lot adjusted in compliance with the corporate action policy of the trading venue which should be publicly available;
 - ☐ the series created after the corporate event shall have a lot determined on the basis of the non-adjusted lot of the correspondent series before the corporate event and the adjusted prices of the relevant contracts and underlying instruments in compliance with the corporate action policy of the trading venue which should be publicly available.
- o where the financial instrument is not denominated in Euros, the LIS or SSTI threshold should first be converted to the currency in which that financial instrument is denominated according to Article 13(8) of RTS 2 before applying the lot size conversion formula.
- the formulas to be used for the conversion of the monetary values of the LIS and SSTI thresholds into lots are provided in the following tables. The formulas are provided on the basis of contract types contract types

Contract type	Formula for the conversion of the LIS/SSTI thresholds into lots
Futures/ forwards	$\text{Threshold in lots} = \frac{\text{notional value of the threshold}}{\text{Lot size} * \text{Arithmetical average closing price of the underlying}}$ <p>Where the notional value is the notional value in the trading currency of the derivative contract, the lot size is the contract size (price multiplier in the case of index futures/forwards) determined by the trading venue for that derivative contract and the arithmetical average closing price of the underlying is determined by the value resulting from the average of the available closing prices of the underlying (or, when not available, the reference value determined by the relevant market of the underlying) during the 12-months of the previous year, or in the case of a newly admitted to trading underlying</p>

	<p>instrument or a corporate action, the available actual or theoretical underlying price(s) taking account the corporate action adjustment.</p> <p>In all cases, the threshold in lots resulting from the division shall be rounded to the minimum tradable number of lots for orders. The value can be rounded up or down, but the type of rounding shall be determined by the end-value that is closer to the pre-rounding value.</p>
Contract type	Formula for the conversion of the LIS/SSTI thresholds into lots
Options	$\text{Threshold in lots} = \frac{\text{notional value of the threshold}}{\text{Lot size} * \text{Strike price}}$ <p>Where the notional value is the notional value in the trading currency of the derivative contract, the lot size is the contract size (price multiplier in the case of index options) determined by the trading venue for that derivative contract and the strike price is the strike price of the at-the-money option. The at-the-money option should be determined on the basis of the arithmetical average of the closing price of its underlying instrument. The latter is the value resulting from the arithmetical average of the available closing prices of the underlying instrument of the option (or, when not available, the reference value determined by the relevant market of the underlying) during the 12-months of the previous year, or in the case of a newly admitted to trading underlying instrument or a corporate action, the available actual or theoretical underlying price(s), taking into account the corporate action adjustment. In the case of an option whose underlying is another derivative contract (e.g. a future or a forward contract), the at-the-money option shall be determined on the basis of the arithmetical average of the closing price of the underlying instrument of the derivative contract underlying the option.</p> <p>In all cases, the threshold in lots resulting from the division shall be rounded to the minimum tradable number of lots for orders. The value can be rounded up or down, but the type of rounding shall be determined by the end-value that is closer to the pre-rounding value.</p>

Contract type	Formula for the conversion of the LIS/SSTI thresholds into lots

24	Reference rate	<p>[Last update on: 20/05/2022]</p> <p><i>How should Field 24 in Table 2 of Annex IV of RTS 2, the “Reference rate”, be populated when the reference rate is not included in the {INDEX} list?</i></p> <p>Field 24 in Table 2 of Annex IV of RTS 2 should be populated with a 4-letter code. In general, the relevant code can be found in Table 1 of Annex IV - Symbol table for Table 2, i.e. the {INDEX} list.</p> <p>However, since it requires some lead time to integrate new reference rates in such list, the list is not always comprehensive and needs to be updated regularly. This is typically the case for the Risk Free Rates (RFR) created in the context of the Benchmark transition.</p> <p>In order to accommodate for such cases, Field 24 can also be populated with an appropriate code if the reference rate is not yet included in the {INDEX} list. In this case, the 4-letter code assigned to that reference rate in the ISO 20022 standard should be used. The list ISO 20022 Benchmark Curve Name Code is available here.</p>

#	Field name	Guidance
25	Term of the underlying interest rate	<p>[Last update on: 30/09/2021]</p> <p><i>How should Field 25 in Table 2 of Annex IV of RTS 2, the “IR Term of contract”, be populated?</i></p> <p>Field 25 in Table 2 of Annex IV of RTS 2, the “IR Term of contract”, should be populated with the term of the underlying interest rate, expressed in days, weeks, months or years.</p> <p>The population of term for field 25 is limited to integers and can be populated using different time units. In general, the less granular time unit should be used. This means that:</p> <ul style="list-style-type: none"> a. If the term is a whole number of years, that value should be populated in field 25 using the {INTEGER-3}+‘YEAR’ format; b. If the term is a whole number of months (based on actual dates not notional 30-day month), that value should be populated in field 25 using the {INTEGER-3}+‘MNTH’ format; c. If the term is a whole number of weeks, that value should be populated in field 25 using the {INTEGER-3}+‘WEEK’ format; d. In other cases, the correct number of days should be populated in field 25 using the {INTEGER-3}+‘DAYS’ format. <p>However, in the latter case, where it is not possible to populate field 25 with the correct number of days due to the restriction of a maximum of 999 days, the term should be calculated with the next time unit (i.e. weeks)</p>

#	Field name	Guidance
		<p>using a standard week of 7 days. If this still exceeds the maximum number of weeks to populate (i.e. 999 weeks) then the term should be calculated in the next time unit (i.e. months) using a standard 30-day month method.</p> <p>In both cases the remainder should then be rounded up or down based on the following methodology: (i) if the term is calculated in weeks, the remainder should be rounded up if \geq to 4 days (otherwise rounded down) and (ii) if the term is calculated in months, the remainder should be rounded up if \geq to 15 days (otherwise rounded down). By way of example, a contract has a term of 19 years 11 months and 6 days = $19 \times 12 + 11$ months with remainder of 6 days, which should be rounded down. Therefore, the term to be populated in field 25 is 239 months.</p>

5.4.4 Additional transparency publications

5.4.4.1 DVC publication

[Last update on: 10/07/2023]

121. Under certain conditions, the transparency requirements for equity and equity-like instruments may be waived or deferred. However, the use of two of those waivers, namely the reference price waiver (Article 4(1)(a) of MiFIR) and the negotiated trade waiver for liquid instruments (Article 4(1)(b)(i) of MiFIR), is limited by the so-called DVC mechanism defined in Article 5 of MiFIR.
122. As regards the latter, the DVC is not applied to negotiated transactions which are in a share, depositary receipt, ETF, certificate or other similar financial instrument for which there is no liquid market. Hence, while the negotiated transaction waiver covers only liquid instruments, the reference price waiver covers both liquid and illiquid instruments. Considering the above, the double volume cap applies to both liquid and illiquid instruments.
123. Such mechanism provides that the trading volume under the waivers against the total volume traded on EU trading venues over the last 12 months for a specific instrument should not be higher than 4% at the level of a single trading venue, or higher than 8% for all the venues combined. In such cases NCAs have to suspend the use of the authorized waivers for the relevant instruments for a period of 6 months.
124. As described in Figure 7, to perform such calculations ESMA relies on the quantitative data provided to the DVC which in turn depends on the reference data reported to FIRDS and FITRS for the definition of the scope of the instruments subject to the DVC.
125. When a trading venue does not deliver the expected data, the system sends reminders every day (until the third ESMA working day after the end of the month) to the relevant submitting entity. If despite measures taken by NCAs and ESMA one or more trading venues do not deliver data for one or more financial instruments, the percentages of trading under the waivers cannot be calculated with accuracy. To ensure the publication of a credible set of results based on the data available, the current condition for publication is completeness of an ISIN across all MICs of at least 98%. This completeness is defined as the percentage of effectively reported periods by trading venues to the number of expected periods.
126. Furthermore, whenever a data quality issue that significantly affects the reliability of the DVC calculation for individual ISINs is detected, ESMA might not publish the calculation for that ISIN. In these cases, ESMA will promptly communicate the issue to the NCA(s) of the trading venue(s) to clarify the validity of the provided data.

127. In the case of late submissions or corrections of data occurring after the cut-off time, the system processes the data and will only publish the new results with the next monthly publication. The figures are updated for maximum six months after the publication date foreseen in MiFIR.
128. The results of the DVC calculations are published, between 6:30pm CET and 10:00pm CET, within five working days of the end of each calendar month. A suspension becomes effective at the start of the third working day after the publication. All relevant dates, as regards the publication calendar and the suspension period for the concerned instruments, is available on ESMA double volume cap website.

TABLE 93 – DVC CALCULATIONS

Observation period	Publication date	Application of the results	Guidance
One calendar year	5 th working day of each month. The calendar is published on the ESMA website [link]	Within 2 working days from publication of the results trading under the relevant waivers has to be suspended. The calendar is published on the ESMA website [link]	See Q&As on the double volume cap mechanism [link]

5.4.4.2 SI publication

[Last update on: 10/07/2023]

129. The goal of the Systematic Internaliser (SI) regime is (i) to make transactions which take place outside of a trading venue more transparent and (ii) to strengthen the level playing field between trading venues and to investment firms which trade on own account.
130. Therefore, investment firms are required to perform a periodic test to see if they qualify as an SI and consequently are subject to certain requirements. The SI test aims at determining if an investment firm deals on own account when executing client orders outside a regulated market, an MTF or an OTF without operating a multilateral system on an organised, frequent systematic and substantial basis (Article 4(1)(20) of Directive 2014/65/EU (MiFID II)). More specifically, investment firms are required to assess whether they are SIs in a specific instrument or for a (sub-) class of instruments. For each specific instrument/sub-class, an investment firm is required to compare the trading it undertakes on its own account compared to the total volume and number of transactions executed in the European Union (EU).

131. To support market participants in performing the SI test, ESMA computes on a voluntary basis the total volume and number of transactions executed in the EU since that data is essential for the operation of the SI regime and is not easily available. To perform such calculations ESMA uses data submitted by trading venues and APAs to FIRDS and FITRS based on the same process as described in Figure 7.
132. The following table provides a brief description of the publication dates, the observation periods used and the dates by which the test has to be performed by the investment firms.

TABLE 94 – SI CALCULATIONS FOR EQUITY AND NON-EQUITY INSTRUMENTS

1 April - 30 September	1 November	15 November	

5.4.4.3 Consolidated Tape Provider (CTP) publication

[Last update on: 10/07/2023]

133. According to Article 15a(2) of Commission Delegated Regulation (EU) 2017/571, the data made public by a CTP in accordance with Articles 10 and 21 of Regulation (EU) No 600/2014 (MiFIR) shall represent at least 80% of both (i) the total number of transactions and (ii) the total volume of transactions in the relevant asset class published in the Union by all APAs, and of all trading venues during the assessment period.
134. ESMA publishes, on a voluntary basis to support CTPs, data on the total number of transactions and the total volume of transactions for non-equity instruments specified in Article 15a(1) of Commission Delegated Regulation (EU) 2017/571.
135. To perform such calculations ESMA uses data submitted by trading venues and APAs to FIRDS and FITRS based on the same process as described in Figure 7. The following table provides the publication dates and the observation periods used.

TABLE 95 – CTP CALCULATIONS FOR NON-EQUITY INSTRUMENTS

5.5 Scope of transactions

[Last update on: 10/07/2023]

Execution venue (including third-country aspects)

136. While Section 4.1.3 described the transactions subject to transparency requirements, Tables 96 and 97 in Section 5.5.1 illustrate the general principles to identify the type of transactions which are to be reported to FITRS for the performance of the transparency calculations.
137. In this context, it is also relevant to analyse transactions with third-country aspects and for this the same rules applicable to determine if a transaction is subject to post-trade transparency or not apply. To this refer to Section 4.1.3.2.

Type of transaction

138. Finally, Tables 98 and 99 in Section 5.5.2 analyse on a per transparency parameter basis the type of transactions which are be reported (or not) to FITRS for the performance of the transparency calculations.

5.5.1 Execution venue: general principles

[Last update on: 10/07/2023]

TABLE 96 – EQUITY: SCOPE OF TRANSACTIONS TO BE REPORTED TO FITRS FOR THE TRANSPARENCY CALCULATIONS, THE BASICS

	TOTV instrument	non-TOTV instrument
On-venue transaction	<p>All transactions executed on-venue, which are, by definition, executed on TOTV instruments, are to be reported to FITRS for the performance of the transparency calculations, irrespectively from the fact that the publication of post-trade transparency reports was done real-time or deferred.</p> <p>However, certain transactions which fall under the definition of Articles 2 and 6 should be excluded in certain circumstances. See Table 98 below.</p>	By definition, they do not exist.
Off-venue transaction	<p>All transactions executed off-venue on TOTV instruments are to be reported to FITRS for the performance of the transparency calculations, irrespectively from the fact that the publication of post-trade transparency reports was done real-time or deferred unless they fall under Article 13 of RTS 1 which in turn cross refer to Article 2(5) of RTS 22.</p> <p>Furthermore, certain transactions which fall under the definition of Articles 2 and 6 should be excluded in certain circumstances. See Table 98 below.</p>	All transactions executed off-venue on non-TOTV instruments are not to be reported to FITRS for the performance of the transparency calculations.

TABLE 97 – NON-EQUITY: SCOPE OF TRANSACTIONS TO BE REPORTED TO FITRS FOR THE TRANSPARENCY CALCULATIONS, THE BASICS

	TOTV instrument	non-TOTV instrument
On-venue transaction	<p>All transactions executed on-venue, which are, by definition, executed on TOTV instruments, are to be reported to FITRS for the performance of the transparency calculations, irrespectively from the fact that the publication of post-trade transparency reports was done real-time or deferred.</p> <p>However, certain transactions which fall under the definition of Article 14 and not of Article 15 of RTS 2 should be excluded in certain circumstances. See Table 99 below.</p>	By definition, they do not exist.
Off-venue transaction	<p>All transactions executed off-venue on TOTV instruments are to be reported to FITRS for the performance of the transparency calculations, irrespectively from the fact that the publication of post-trade transparency reports was done real-time or deferred unless:</p> <ul style="list-style-type: none"> - they fall under Article 12 of RTS 2 which in turn cross refer to Article 2(5) of RTS 22. See Table 99 below. - they fall under the definition of Article 14 and not of Article 15 of RTS 2 should be excluded in certain circumstances. See Table 99 below. 	All transactions executed off-venue on non-TOTV instruments are not to be reported to FITRS for the performance of the transparency calculations.

5.5.2 Type of transactions subject to post-trade transparency

[Last update on: 10/07/2023]
