# Presentation of the CONSOB Report on financial investments of Italian households

The Report presents evidence on the investment choices of Italian households with the aim of gaining insights as to how they manage investment decisions and the main risks they may take.

The Report is based on the Survey 'The approach to finance and investment of Italian households' administered by GfK Italia to a representative sample of Italian retail financial decision-makers.

The 2020 Report contains two sections focused on knowledge and attitude towards SRIs and attitude towards digital assets and financial services, respectively.
