THE NEW FRONTIERS OF TOKENIZATION

IMPLICATIONS FOR THE NATIONAL MARKET

CONSOB | BLOCKCHAIN & DISTRIBUTED LEDGER OBSERVATORY
PROGRAM | 8/10/2021 - 04/03/2022

The world of finance is experiencing a time of great transformation driven by regulatory and technological evolution and increasing competition. On the one hand, with the [Digital Finance Package](#), adopted by the European Commission on 24 September 2020, the EU is starting to establish a regulatory framework capable of encouraging the development of different crypto-assets typologies. On the other hand, Blockchain and Distributed Ledger technologies are already impacting financial markets around the world, leading to the emergence of new players, new business models and new assets, which are complementing and often competing with traditional ones. It is necessary to be prepared for this change.

CONSOB and the Blockchain & Distributed Ledger Observatory of the Politecnico di Milano organize a seminar-based course to explore the core challenges posed by these new technologies, mainly through the analysis of both the regulatory and of the more technical and business points of view.

All the meetings:

8 October 2021, from 11.00 a.m. to 13.00

Financial instruments in DLT: challenges and opportunities

5 November 2021, from 11.00 a.m. to 13.00
