1 Executive Summary

Reasons for publication

The European Single Electronic Format (ESEF) requires the use of a taxonomy for the digital reporting of consolidated financial statements prepared in accordance with International Financial Reporting Standards (IFRS). This taxonomy is based on, and extends from, the IFRS Accounting Taxonomy, which is updated annually by the IFRS Foundation to reflect various developments. These include the issuance of new IFRSs, amendments to existing standards, analysis of commonly reported disclosures and enhancements to the taxonomy's general content or underlying technology.

Following the adoption of Commission Delegated Regulation (EU) 2019/815, known as 'the RTS on ESEF', ESMA periodically issues draft RTS amending the RTS on ESEF to align with the updates to the IFRS Accounting Taxonomy and the latest developments concerning technical XBRL specifications.

Consistent with this approach, the draft RTS outlined in this Final Report corresponds to the publication of the full 2025 IFRS Accounting Taxonomy package and aims to update the taxonomy embedded in the RTS on ESEF to ensure it reflects the most recent version of the IFRS Accounting Taxonomy, including, notably, the taxonomy for IFRS 18 'Presentation and Disclosure in Financial Statements'. IFRS 18, as issued by the International Accounting Standard Board (IASB), is effective for annual reporting periods beginning on or after 1 January 2027, with earlier application permitted. At European level, the endorsement process of IFRS 18 is ongoing and is expected to be finalised by early next year. Once endorsed, it is also expected to be applicable for annual reporting periods beginning on or after 1 January 2027, with early application permitted from the date of endorsement. To facilitate timely preparation by issuers and software vendors, and to accommodate issuers who choose to apply IFRS 18 early, the RTS on ESEF is proposed to be amended to include the corresponding tagging elements, alongside those related to the currently applicable IAS 1 ('Presentation of Financial Statements'). This dual inclusion aims to ensure that electronic financial reporting remains aligned with both the already applicable reporting standards and the standards which will be available for early application. It also supports issuers in testing and familiarising themselves with the new taxonomy ahead of its mandatory implementation. It is important to note, however, that the updated 2025 RTS on ESEF – incorporating the taxonomy elements for IFRS 18 – may only be used to markup annual financial reports once IFRS 18 has been formally endorsed at the EU level and disclosures are made in accordance with this standard. The beforementioned approach is also intended to apply to IFRS 19.

The revised RTS aims to facilitate the effective implementation of tagging requirements, thereby enhancing the comparability of electronic financial statements prepared in accordance with IFRS—both across Europe and globally — for the benefit of all end-users.

Content

The draft RTS outlined in this Final Report amends and replaces annexes of the RTS on ESEF: Annex I (glossary of terms), Annex II (mandatory mark-ups), Annex III (applicable Inline XBRL specifications), Annex V (XBRL taxonomy files) and Annex VI (schema of the core taxonomy) of the RTS on ESEF. This update aligns the content of these annexes with the latest developments of the IFRS Accounting Taxonomy – specifically the 2025 update published by the IFRS Foundation on 27 March 2025 – and with the most recent Inline XBRL specifications.

The draft RTS represents a purely technical amendment of the original RTS. Therefore, in line with Article 10 of the ESMA Regulation¹, ESMA opted not to conduct an open public consultation, perform a cost-benefit analysis or request advice from the Securities and Markets Stakeholder Group. Such actions were deemed highly disproportionate given the limited scope and impact of the proposed amendments.

Next Steps

ESMA has submitted this Final Report – including the draft RTS set out in Annex I – to the European Commission (EC). The EC has three months to decide whether to endorse the proposed technical standards.

2 Background to the draft RTS contained in Annex I

2.1 Legal basis

1. Based on the empowerment provided under Article 4(7) of the Transparency Directive² (hereafter, the ‘TD’), the European Securities and Markets Authority (hereafter, ‘ESMA’) published a draft Regulatory Technical Standard (RTS) specifying a single electronic format – known as the European Single Electronic Format (ESEF) – on 18 December 2017. This format is mandated for the preparation of annual financial reports by issuers with securities listed on regulated markets.
2. Following adoption by the Commission on 17 December 2018, the RTS was published in the Official Journal of the European Union on 29 May 2019 as

¹ Regulation (EU) No 1095/2010 of the European Parliament and of the Council of 24 November 2010 establishing a European Supervisory Authority (European Securities and Markets Authority), amending Decision No 716/2009/EC and repealing Commission Decision 2009/77/EC (OJ L 331, 15.12.2010, p. 84).

² Directive 2004/109/EC of the European Parliament and of the Council of 15 December 2004 on the harmonisation of transparency requirements in relation to information about issuers whose securities are admitted to trading on a regulated market and amending Directive 2001/34/EC (OJ L 390 31.12.2004, p.38)

Commission Delegated Regulation (EU) 2019/815 (hereafter, ‘the RTS on ESEF’). The RTS on ESEF has applied to annual financial reports containing financial statements for financial years beginning on or after 1 January 2020³.

3. The draft RTS presented in Annex I constitutes a technical update to the existing Regulation. Its purpose is to reflect the latest IFRS Accounting Taxonomy updates and to provide additional support to preparers in tagging their financial statements. This draft RTS is developed under the same legal empowerment set out in Article 4(7) of the TD.
4. In line with Article 10 of the ESMA Regulation, ESMA did not conduct an open public consultation of this draft RTS, analyse the potential related costs and benefits or request the advice of the Securities and Markets Stakeholder Group as such steps would have been highly disproportionate in relation to the scope and impact of the draft RTS. It is important to highlight that this technical update does not introduce any new policy elements or material changes to existing policy.

2.2 Background

5. The RTS on ESEF requires that the taxonomy used to mark-up IFRS consolidated financial statements be based on the IFRS Accounting Taxonomy, which is maintained and updated by the IFRS Foundation. The IFRS Foundation reviews and revises the IFRS Accounting Taxonomy on an annual basis to incorporate: new or amended IFRS affecting its content, analysis of commonly reported disclosures and enhancements to the taxonomy’s general content or underlying technology. Each annual taxonomy reflects the presentation and disclosure requirements of the IFRS Standards as issued by the International Accounting Standards Board (IASB) as of 1 January of the relevant year.
6. Accordingly, ESMA has published draft RTSs to update the ESEF taxonomy, aligning them with the publication of the IFRS Accounting Taxonomy for the years 2019, 2020, 2021, 2022, 2023 and 2024 issued by the IASB on 27 March 2019, 16 March 2020⁴, 24 March 2021⁵ and 24 March 2022⁶, 23 March 2023⁷ and 27 March 2024⁸ respectively. These draft RTSs were subsequently published in the *Official Journal of the European Union* respectively on 16 December 2019 as Commission

³ In March 2021, taking into account that it was the first year of preparation and considering the constraints on issuers’ resources due to the COVID-19 pandemic, Article 4(7) of the TD was amended in order to grant Member States the option to allow their issuers to apply the ESEF requirements starting from 1 January 2021, provided that they notify the European Commission of their duly justified intention to do so. 23 Member States took up the option to delay.

Delegated Regulation (EU) 2019/2100, on 18 December 2020 as Commission Delegated Regulation (EU) 2020/1989, on 7 March 2022 as Commission Delegated Regulation (EU) 2022/352, on 30 December 2022 as Commission Delegated Regulation (EU) 2022/2553 and on 15 January 2025 as Commission Delegated Regulation (EU) 2025/19. It is important to note that ESMA decided to integrate both the 2023 and 2024 IFRS Accounting Taxonomies into a single update to the ESEF RTS in 2024.

7. On 27 March 2025, the IFRS Foundation published the 2025 IFRS Accounting Taxonomy⁹. The current proposed amendment to the RTS on ESEF aims to integrate this latest update on the IFRS Full taxonomy module into the EU regulatory framework. The IFRS SMEs taxonomy module remains outside of the scope, since it is not used in the context of ESEF.
8. Since 2017, ESMA has maintained a dedicated mailbox (esef@esma.europa.eu) to enable stakeholders to submit comments and suggestions regarding its work on ESEF. ESMA continuously reviews and evaluates the feedback received to assess whether the RTS and/or other guidance materials, published at ESMA's own initiative, could or should be improved or updated.

2.3 Description of the amendments to the RTS on ESEF

9. The RTS on ESEF states that its provisions should be periodically updated through a draft RTS prepared by ESMA. The annual update of the taxonomy used for the ESEF is intended to ensure that electronic reporting remains aligned with the already applicable IFRS reporting standards and the standards that are available for early application.
10. In line with this objective, the draft RTS included in this Final Report amends the existing RTS on ESEF to incorporate the 2025 update to the IFRS Accounting Taxonomy and provide additional guidance to preparers for tagging their financial statements. Notably, the 2025 IFRS Accounting Taxonomy includes updates to support both the current and revised presentation options of the financial statements under IAS 1 '*Presentation of Financial Statements*' and the newly issued IFRS 18 '*Presentation and Disclosure in Financial Statements*¹⁰' which will be effective for annual reporting periods beginning on or after 1 January 2027, with earlier application permitted. To accommodate this, the 2025 IFRS accounting

⁹ [IFRS - IFRS Accounting Taxonomy 2025](#)

¹⁰ [IFRS - IFRS 18 Presentation and Disclosure in Financial Statements](#)

taxonomy includes two entry points: a mandatory Full IFRS Accounting Standards Entry Point and an Early Application of IFRS 18 Entry Point.

11. Similarly, the 2025 IFRS accounting taxonomy incorporates the necessary changes to reflect the requirements of IFRS 19 'Subsidiaries without Public Accountability: Disclosures' which will also become effective for annual reporting periods on or after 1 January 2027, with earlier adoption permitted. IFRS 19 provides a simplified set of disclosure requirements that eligible subsidiaries may apply instead of the full disclosure requirements in other IFRS Accounting Standards. It achieves this by cross-referencing applicable disclosure requirements from other IFRS Standards, while also introducing a very limited number of new, IFRS 19-specific disclosure requirements. Although IFRS 19 has limited or no impact on companies listed in EU regulated markets that prepare consolidated annual financial reports but facilitates the digitalisation of the disclosures of their non-listed subsidiaries, for completeness and alignment with IFRS taxonomy, the IFRS 19 taxonomy is also incorporated into the ESEF taxonomy.
12. At European level, the adoption process of IFRS 18 and IFRS 19 are still ongoing. The endorsement of IFRS 18 is expected to be finalised by early next year, while IFRS 19 is anticipated to be adopted by mid-next year. Both standards are expected to come into effect for annual reporting periods beginning on or after 1 January 2027, with early application permitted. To support the early digital adoption of IFRS 18, ESMA has decided to provide both applicable reporting options and to include both sets of elements into the ESEF taxonomy. This dual approach will be appropriately reflected in the architecture of the ESEF XBRL Taxonomy. Similarly, for IFRS 19, all necessary references to the standard will be incorporated into the taxonomy elements. This approach will enable preparers to get familiarised and begin applying the new standards in electronic format ahead of their mandatory effective dates.

Impact assessment of IFRS Accounting Taxonomy 2025

13. The analysis conducted for the IFRS Accounting Taxonomy 2025 shows a significant impact on the ESEF taxonomy. The IFRS Foundation categorises changes into four groups: general improvements, common practice updates, technology updates, and new or amended standards.
14. The updates reflecting new or amended **presentation and disclosure requirements**, applicable to the IFRS Full module, came from the following amendments, in particular:
- IFRS 18 '*Presentation and Disclosure in Financial Statements*' includes both new presentation and disclosures requirements as well as requirements that

were carried forward from IAS 1. To support this, the IFRS taxonomy introduces the necessary elements to tag new or substantially changed disclosures and adds categorical and parent narrative elements to enhance structure and clarity. Additionally, the taxonomy deprecates outdated or redundant elements and structures. Notably, 37 common practices elements and one presentation group have been deprecated as part of this update.

- *Contracts Referencing Nature-dependent Electricity* (IFRS 9 ‘*Financial Instruments*’ and IFRS 7 ‘*Financial Instruments: disclosures*’) – addresses the challenges encountered by companies and introduces eleven new disclosure elements to reflect the requirements outlined in Contracts Referencing Nature-dependent Electricity. Additionally, it includes one further element to capture the disclosure of early application, all in accordance with established taxonomy modelling policies.
- IFRS 19 ‘*Subsidiaries without Public Accountability: Disclosures*’ – permits some subsidiaries to apply IFRS Accounting Standards with reduced disclosure requirements. The IASB incorporated references to IFRS 19 into IFRS Accounting Taxonomy elements, impacting approximately 25% of the elements within the Taxonomy. This facilitates the identification of the relevant taxonomy elements to be used but does not impose additional burden on preparers. Nine new elements were added to reflect requirements in IFRS 19 that were not drawn from other Accounting Standards to provide and complete the necessary hierarchical taxonomy structure.
- *Amendments to the Classification and Measurement of Financial Instruments* (Amendments to IFRS 9 and IFRS 7) – These amendments introduced the transitional disclosure requirements in IFRS 9 and the amended IFRS 7 disclosures requirements. To this end, the IASB created four new tables and thirteen new elements to reflect the disclosure requirements resulting from the amendments.
- *Annual Improvements to the IFRS Accounting Standards – Volume 11*. These improvements are limited to changes that either clarify the wording in an Accounting Standard or correct relatively minor unintended consequences, oversights or conflicts between the requirements in IFRS Accounting Standards. It does not introduce new disclosure requirements requiring changes to the IFRS Accounting Taxonomy, with the exception of the requirement for a company to disclose if it has applied the amendments arising from annual improvements for a period earlier than the effective date.

15. The table below provides a summary of the changes in the number of elements between the 2024 and 2025 versions of the IFRS Full module:

Number of taxonomy elements	IFRS 2024	IFRS 2025	Difference
Reportable elements	3,753	3,858	+105 -
Dimensional constructs	917	960	+43
Titles / headers	660	696	+36
Total number of taxonomy elements	5,330	5,514	+184

16. The IFRS XBRL accounting taxonomy 2024 consists of 3,753 reportable elements, whereas the 2025 version comprises 3,858 such elements. This reflects a net increase of 105 reportable elements in the current release. The IFRS XBRL accounting taxonomy 2025 includes one shared dictionary that supports both IFRS 18 and IAS 1 presentation options. From the reportable elements, the number of common practice elements under IAS 1 (1,345 elements) has remained unchanged, while, for IFRS 18, it has decreased by 37 elements (1,308 elements). Overall, the total number of taxonomy elements in use across all categories has grown by 184, driven by the addition of 185 new elements and the deprecation of one element.

17. At the same time, 2,533 taxonomy elements were modified by introducing changes regarding elements labels, references, documentation or element type and attributes. The goal is to facilitate the use of the IFRS 19 taxonomy by simply cross referring to other taxonomy elements without creating new elements and introducing additional burden. Moreover, to ensure consistency with previous versions of the taxonomy, the technical names of these elements remain unchanged. Instead, updates were made primarily to the label linkbase, as well as to supporting documentation, references, or element type and attributes where appropriate. The changes are intended to provide more meaningful business descriptions of the content of the elements and to align references with the latest amendments to the standards (e.g. updated expiration and effective dates).

18. Considering changes in **reporting structures** for IFRS 18, the total of 17 Extended Link Roles (so-called presentation groups or placeholders for sub-sections of the financial statements) and their structure contents were updated (incl. 2 ELRs changing their title), four extended link roles were added and two removed. In the

case of IAS 1, four Extended Link Roles and their structure contents were updated and one was added.

Amendments to the ESEF RTS

19. To incorporate the aforementioned adjustments in the IFRS Accounting taxonomies 2025, the draft RTS on ESEF amends:

- **Annex I**, which furnishes the glossary of terms used in the RTS on ESEF, to reflect new data and attribute types introduced, particularly in relation to IFRS 18 such as *percent, area, true/false or domain*;
- **Annex II**, which provides the mandatory mark-ups to be used by issuers in preparing their iXBRL consolidated financial statements, to introduce targeted amendments to Table 1 “Mandatory elements of the core taxonomy to be marked up for financial years beginning on or after 1 January 2026” in order to reflect the updates to the list of accounting policies and list of notes. Additionally, for issuers applying IFRS 18 already for financial years beginning on or after 1 January 2026, a new Table 2 “Mandatory elements of the core taxonomy to be marked up for financial years beginning on or after 1 January 2026” should be introduced to appropriately capture the corresponding changes in the list of accounting policies and of notes specific to the new standard; and
- **Annex VI**, which contains the description of the core taxonomy schema to be used for marking up the IFRS consolidated financial statements, to update the list of taxonomy elements to ensure alignment with the modifications introduced in the IFRS taxonomy elements. As this core taxonomy serves as common dictionary supporting both IFRS 18 and IAS 1 presentation options, each element includes the appropriate label types that clearly indicate whether the taxonomy element is applicable to IAS 1 or IFRS 18 or both, where relevant.

20. Although only specific sections of the above Annexes require updates, the draft RTS replaces the tables in their entirety. This approach is intended to enhance readability of the relevant tables and the core taxonomy schema for stakeholders, particularly in the context of consolidating the legal text.

21. In addition, **Annex III**, which sets out the applicable Inline XBRL specifications, is also amended to incorporate recent developments related to the technical specifications for performing validations of inline XBRL instance documents and corresponding issuer’s extension taxonomy files. ESMA proposes to amend Annex

III to clarify the use of Calculations 1.1 specification¹¹ which provides improved handling of rounded and duplicate facts which are particularly relevant to Inline XBRL-based reporting. This specification supports more accurate validations of Inline XBRL documents and extension taxonomies. Its adoption aims to improve ESEF data quality by reducing the number of calculation inconsistencies. Notably, a recent analysis¹² conducted by XBRL International on a sample of 3,000 ESEF reports showed that applying Calculation 1.1 reduced the number of inconsistencies from nearly 18,000 to fewer than 3,000. Accordingly, **Annex V** is also to be amended to reflect the reference to the Calculation 1.1 specifications.

22. The 2025 IFRS Accounting Taxonomy release has also introduced significant changes to XBRL file modularisation, notably affecting the ESEF XBRL Taxonomy structure. ESMA will reflect this revised modular approach in the upcoming ESEF XBRL files and accommodate both IFRS 18 and IAS 1 presentation options within a unified framework.

2.4 Implementation of the amended RTS on ESEF

23. This draft RTS aims to provide clarity in the applicable taxonomy and promote the highest level of comparability of electronic financial statements drawn up in accordance with IFRS, both at European and global level, for end-users. For each element of the core taxonomy, the draft RTS specifies all the relevant label types included in the IFRS 2025 financial taxonomy differentiating, where necessary, whether an element is applicable to IAS 1, IFRS 18 or both.

24. To minimise the burden on preparers, this amendment to the RTS on ESEF will become mandatorily applicable for financial years beginning on or after **1 January 2026** with **early application permitted**. Therefore, for annual financial reports including financial statements beginning on or after 1 January 2025, issuers are expected to use either the 2024 ESEF taxonomy or the 2025 ESEF taxonomy introduced by this draft RTS. It is important to note that the draft RTS does not permit the concurrent use of the 2025 and the 2024 ESEF taxonomies within one single ESEF filing.

25. Besides, the ESEF taxonomy is intended to markup only disclosures that are either required or permitted under the accounting standards endorsed in the EU. Although the taxonomy may include elements related to standards such as IFRS 18 or IFRS 19, issuers are not expected to use these unless the corresponding disclosures are mandated or permitted by the EU-endorsed standards. The taxonomy itself does

¹¹ [Calculations 1.1](#)

¹² XBRL International [Understanding Calculations 1.1 - XBRL Directions Webinar](#)

not create or impose any requirements on the issuer - it merely provides a set of elements in the eventuality that the disclosure requirement comes into effect.

26. For issuers that are also classified as foreign private issuers in the US, it is noteworthy that the US Securities and Exchange Commission (SEC) follows a similar approach, permitting the use of either the latest or the second-latest IFRS taxonomies when filing financial statements. Accordingly, financial statements for 2025 reporting period filed with the US SEC must be prepared in accordance with, or be equivalent to, either the 2025 or 2024 IFRS taxonomies – such as 2025 or 2024 ESEF taxonomies – but not any earlier version.
27. Given the upcoming mandatory application of IFRS 18 and the significant changes it introduces to financial reporting, issuers are **strongly encouraged** to engage in early familiarisation and preparation for implementation of the 2025 ESEF Taxonomy – particularly, the use of the IFRS 18 taxonomy as it introduces new structure and elements. Proactive preparation, including early adoption and testing, will facilitate a smoother transition and help ensure compliance with the tagging and new disclosure requirements.

2.5 Next Steps

28. ESMA has submitted this Final Report to the European Commission (EC). The EC has a three-month period to adopt the draft RTS. Once the Commission adopts and notifies them to the European Parliament and the Council, they each have the right to object to these standards within a three-month period, which may be extended by either institution for an additional three months.
29. As the IFRS standards continue to evolve, the IFRS Accounting Taxonomy is expected to undergo further development in the coming years. In response, ESMA intends to regularly update the RTS on ESEF as necessary to ensure continued alignment with future revisions of the IFRS Accounting Taxonomy.

3 Annex I

COMMISSION DELEGATED REGULATION (EU) .../...

of XXX

amending the regulatory technical standards laid down in Delegated Regulation (EU) 2019/815 as regards the 2025 update of the taxonomy for the single electronic reporting format

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Directive 2004/109/EC of the European Parliament and of the Council of 15 December 2004 on the harmonisation of transparency requirements in relation to information about issuers whose securities are admitted to trading on a regulated market and amending Directive 2001/34/EC¹³, and in particular Article 4(7) thereof,

Whereas:

- (1) Commission Delegated Regulation (EU) 2019/815¹⁴ specifies the single electronic reporting format to be used by issuers whose securities are admitted to trading on a regulated market for the preparation of their annual financial reports. Consolidated financial statements included therein are prepared either in accordance with International Accounting Standards, which are commonly referred to as International Financial Reporting Standards (IFRS), adopted pursuant to Regulation (EC) No 1606/2002 of the European Parliament and of the Council¹⁵, or in accordance with IFRSs as issued by the International Accounting Standards Board (IASB) which, based on Commission Decision 2008/961/EC¹⁶, are considered as equivalent to IFRSs adopted pursuant to Regulation (EC) No 1606/2002.

¹³ OJ L 390, 31.12.20004, p.38, ELI: <http://data.europa.eu/eli/dir/2001/34/oj>.

¹⁴ Commission Delegated Regulation (EU) 2019/815 of 17 December 2018 supplementing Directive 2004/109/EC of the European Parliament and of the Council with regard to regulatory technical standards on the specification of a single electronic reporting format (OJ L 143, 29.5.2019, p.1, ELI: http://data.europa.eu/eli/reg_del/2019/815/oj).

¹⁵ Regulation (EC) No 1606/2002 of the European Parliament and of the Council of 19 July 2002 on the application of international accounting standards (OJ L 243, 11.9.2002, p. 1, ELI: <http://data.europa.eu/eli/reg/2002/1606/oj>).

¹⁶ Commission Decision of 12 December 2008 on the use by third countries' issuers of securities of certain third country's national accounting standards and International Financial Reporting Standards to prepare their consolidated financial statements (OJ L 340, 19.12.2008, p. 112, ELI: <http://data.europa.eu/eli/dec/2008/961/oj>).

- (2) The IFRS Accounting Taxonomy reflects the presentation and disclosure requirements of the IFRS Accounting Standards. The core taxonomy to be used for the single electronic reporting format is based on the IFRS Accounting Taxonomy and is an extension thereof. The IFRS Foundation updates the IFRS Accounting Taxonomy annually to reflect, amongst other developments, the issuance of new IFRSs, amendments to existing IFRSs, the analysis of disclosures commonly reported in practice, or improvements to general content or technology of the IFRS Accounting Taxonomy. Therefore, it is necessary to regularly update the regulatory technical standards to reflect the updates of the IFRS Accounting Taxonomy.
- (3) In March 2025, the IFRS Foundation published updates to the IFRS Accounting Taxonomy. The 2025 update includes, inter alia, the taxonomy for IFRS 18 'Presentation and Disclosure in Financial Statements'. As issued by the International Accounting Standards Board (IASB), this standard is effective for annual reporting periods beginning on or after 1 January 2027, with earlier application permitted. Consequently, in addition to the current taxonomy related to IAS 1 'Presentation of Financial Statements' and in order to enable issuers who opt for the early application of IFRS 18 to do so in an electronic format, Delegated Regulation (EU) 2019/815 should be amended to incorporate the corresponding updates.
- (4) Annexes I, II and VI to Delegated Regulation (EU) 2019/815 should be updated to reflect those updates and provide additional guidance to issuers on tagging their consolidated financial statements. In particular, for issuers opting for the early application of IFRS 18, Annex II sets out an ad-hoc mandatory list of elements from the core taxonomy and Annex VI includes the appropriate label types indicating whether a given element is applicable to IAS 1 or IFRS 18 or both. Although only certain parts of those Annexes need to be updated, it is necessary to replace those Annexes in their entirety to enhance, in particular, the readability for stakeholders of the applicable tables of the 2025 updates. This will facilitate implementation of the tagging requirements and the highest standard of comparability of electronic financial statements drawn up in accordance with IFRS at Union and global level for end-users. Annexes III and V should also be amended to incorporate recent developments in the Inline XBRL specifications pertaining to Reporting Packages.
- (5) Delegated Regulation (EU) 2019/815 should therefore be amended accordingly.
- (6) To provide issuers with enough time for the effective implementation of the new requirements, and to minimise compliance costs, the new taxonomy should apply to annual financial reports containing financial statements for financial years beginning on or after 1 January 2026. However, issuers should be allowed to implement the new taxonomy for financial years beginning on or after 1 January 2025.
- (7) This Regulation is based on the draft regulatory technical standard submitted to the Commission by the European Securities and Markets Authority (ESMA).
- (8) This Regulation is a technical update to Delegated Regulation (EU) 2019/815 to reflect updates in the IFRS Accounting Taxonomy, in the Inline XBRL specifications and provide additional guidance to mark-up IFRS financial statements. This Regulation does not constitute new policy or a substantial change to existing policy. ESMA has not conducted open public consultations on the draft regulatory technical standards on which this Regulation is based nor analysed the potential related costs and benefits. It has not requested the advice of the Securities and Markets Stakeholder Group established under Article 37 of Regulation (EU) No 1095/2010 of the European

Parliament and of the Council¹⁷ because that would have been highly disproportionate to the scope and impact of this amendment,

HAS ADOPTED THIS REGULATION:

Article 1

Delegated Regulation (EU) 2019/815 is amended as follows:

- (1) Annex I is replaced by the text in Annex I to this Regulation;
- (2) Annex II is replaced by the text in Annex II to this Regulation;
- (3) in Annex III, point 5 is added:
‘5. Issuers shall ensure that both the Inline XBRL instance document and the issuer’s extension taxonomy are valid with respect to the Calculations 1.1 specification.’;
- (4) in Annex V, point (f) is replaced by the following:
‘(f) be valid according to XBRL 2.1. specifications, XBRL Dimensions 1.0 specifications, Calculations 1.1 specifications and be packaged according to the Reporting Package specification as set out in Annex III.’;
- (5) Annex VI is replaced by the text in Annex III to this Regulation.

Article 2

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

Delegated Regulation (EU) 2019/815, as amended by this Regulation shall apply to annual financial reports containing financial statements for financial years beginning on or after 1 January 2026.

However, Delegated Regulation (EU) 2019/815 as amended by this Regulation may be applied to annual financial reports containing financial statements for financial years beginning before 1 January 2026.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

¹⁷ Regulation (EU) No 1095/2010 of the European Parliament and of the Council of 24 November 2010 establishing a European Supervisory Authority (European Securities and Markets Authority), amending Decision No 716/2009/EC and repealing Commission Decision 2009/77/EC (OJ L 331, 15.12.2010, p. 84, ELI: <http://data.europa.eu/eli/reg/2010/1095/oj>).

			documentation	<p>The amount of liabilities that are: (a) a contractual obligation: (i) to deliver cash or another financial asset to another entity; or (ii) to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the entity; or (b) a contract that will, or may be, settled in the entity's own equity instruments and is: (i) a non-derivative for which the entity is, or may be, obliged to deliver a variable number of the entity's own equity instruments; or (ii) a derivative that will, or may be, settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments. For this purpose, rights, options or warrants to acquire a fixed number of the entity's own equity instruments for a fixed amount of any currency are equity instruments if the entity offers the rights, options or warrants pro rata to all of its existing owners of the same class of its own non-derivative equity instruments. Also, for those purposes the entity's own equity instruments do not include puttable financial instruments that are classified as equity instruments in accordance with paragraphs 16A-16B of IAS 32, instruments that impose on the entity an obligation to deliver to another party a pro rata share of the net assets of the entity only on liquidation and are classified as equity instruments in accordance with paragraphs 16C-16D of IAS 32, or instruments that are contracts for the future receipt or delivery of the entity's own equity instruments. As an exception, an instrument that meets the definition of a financial liability is classified as an equity instrument if it has all the features and meets the conditions in paragraphs 16A-16B or paragraphs 16C-16D of IAS 32. 			documentation	<p>This member stands for hedging instruments. A hedging instrument can be a designated: (a) derivative measured at fair value through profit or loss, except for some written options (see paragraph B6.2.4 of IFRS 9); (b) non-derivative financial asset or non-derivative financial liability measured at fair value through profit or loss, unless it is a financial liability designated as at fair value through profit or loss for which the amount of its change in fair value that is attributable to changes in the credit risk of that liability is presented in other comprehensive income in accordance with paragraph 5.7.7 of IFRS 9. For a hedge of foreign currency risk, the foreign currency risk component of a non-derivative financial asset or a non-derivative financial liability may be designated as a hedging instrument provided that it is not an investment in an equity instrument for which an entity has elected to present changes in fair value in other comprehensive income in accordance with paragraph 5.7.5 of IFRS 9.
